## Il controllo dell'aria è potere

A.P.I. is an Italian company specialised in the design and production of industrial pneumatic components.

Since our start in 1987, company was built with a distinctive international printing and gained an increasingly important role in the market.

The innovation, design and technology of our products guarantee our customers not just with a product but excellence in the industry.

We provide solutions to specific needs and offer customised products tailored to each application area.

## Physical magnitudes and data

The pneumatic components use compressed air. Pressure is a force that is applied per unit of area. The pressure can be measured with an instrument - the manometer - is called manometric or relative to the atmospheric pressure in which the instrument is placed. Absolute pressure is obtained by adding atmospheric pressure to the manometric pressure.

## Units of measurement - International System (SI)

The SI units were introduced in the majority of Countries on the basis of international conventions. The aim is to achieve sole units of measurement in order to avoid the difficult conversions from one system of measurement to another.

The SI system consider seven fundamental physical magnitudes with their respective units of measurement. All the other units are derived from these.

The fundamental units are:

length in meters [ m ], mass in kilograms [ Kg ], time in seconds [ s ], electrical current in amperes [ A ], temperature in degrees Kelvin [ °K ], molecular quantity in moles [ mol ], luminous intensity in candelas [ cd ].

Forces are derived magnitudes and are expressed in Newtons [ N ]. According to the fundamental law of dynamics, one Newton is the force required to accelerate a mass of 1 Kg to 1 m/s<sup>2</sup>. As 1 Kp is the force required to give a mass of 1 Kg the acceleration of gravity, which is equivalent to 9.81 m/s<sup>2</sup>, it follows that 1 Kp = 9.81 N = 10 N (approximately).

Indeed, the latter value is assumed in order to avoid an excessive precision of calculation. Pressure is thus measured in N/m<sup>2</sup>, a unit known as the Pascal [ Pa ]. The unit of measurement that is equivalent to 100x10<sup>3</sup> Pa [ bar ] is still accepted. We can write 1 bar = 100 KP.a.

## SI units

Magnitude	Symbol of formula	SI units			Accepted measurement units		Conversion factors
		Name	Unit	Multiple	Name	Unit	
Length	l	Meter	m	km cm mm	-	-	-
Area	A	Square meter	m <sup>2</sup>	cm <sup>2</sup> mm <sup>2</sup>	Are Hectare	a ha	1 a = 102 m <sup>2</sup> 1 ha = 104 m <sup>2</sup> (used only for land)
Volume	V	Cubic meter	m <sup>3</sup>	cm <sup>3</sup> mm <sup>3</sup>	Litre	l	1 l = dm <sup>3</sup> = 0,001 m <sup>3</sup>
Mass	m	Kilogram	kg	Mg g mg	Ton	t	1 t = 1000 kg = 1 Mg
Time	t	Second	s	-	Minute Hour Day	min h d	1 min = 60 s 1 h = 60 min = 3600 s 1 d = 24 h = 86400 s
Numbers of revolutions	n	Revs per second	1/s s <sup>-1</sup>	-	Revs per second	1/min min <sup>-1</sup>	1/min = $\frac{1}{60}$ s
Speed	v	Meter per second	m/s	-	Kilometre per hour	km/h	1 km/h = $\frac{1}{3,6}$ m/s
Flow	V	Cubic meter per second	m <sup>3</sup> /s	m <sup>3</sup> /h l/min l/s	-	-	1 m <sup>3</sup> /h = 16,67 l/min = 0,28 l/s 1 m <sup>3</sup> /s = 60.000 l/min
Force	F	Newton	N	-	-	-	1 N = 1 kg m/s <sup>2</sup> 1 kp = 9,81 N = 10 N 1 kp = 1 da N
Pressure	P	Newton per square meter Pascal	N/m <sup>2</sup> Pa	-	Bar	bar	1 N/m <sup>2</sup> = 1 Pa 1 bar = 105 Pa
Energy Work Quantity of calories	W	Joule	J	-	Kilowatt-hour	kWh	1 J = 1 Nm = 1 Ws = 1 kg m <sup>2</sup> /s <sup>2</sup> 1 kWh = 3,6 MJ
Momentum, torque	M	Newton-meter	Nm	-	-	-	1 kpm = 9,81 Nm
Power Energy absorption Heat absorption	P	Watt	W	-	-	-	1 W = 1 J/s = 1 Nm/s 1 kpm/s = 9,81 W
Dynamic viscosity	$\eta$ ( $\mu$ )	Pascal-second	Pas	-	-	-	1 Pas = 1 Ns/m <sup>2</sup> = 1000 mPas 1 cp = 1 mPas
Kinetic viscosity	$\nu$	Square meter per second	m <sup>2</sup> /s	-	-	-	1 cSt = 10 <sup>-6</sup> m <sup>2</sup> /s 1 cSt = 1 mm <sup>2</sup> /s
Temperature	-	Kelvin degree	°k	-	Centigrade degree	°C	-
Frequency	f	Hertz	Hz	-	-	-	-

## Volume in normal conditions

The following are considered normal conditions of the fluid: temperature °K = 273 + 20°C, pressure = 1 bar.

For the following considerations, the equation of state of perfect gases is also accepted as valid for the actual air gas.

This is:  $PV = nRT$  where  $P$  = absolute pressure of the gas [ bar ]

$V$  = volume [ m<sup>3</sup> ],

$T$  = absolute temperature [ °K ],

Assuming that we wish to bring a given volume of air  $V_1$ , subject to pressure  $P_1$  and temperature  $T_1$  back to the normal conditions  $P_0$ ,  $V_0$ ,  $T_0$ .

We can say that the situation will pass from  $P_1V_1 = nRT_1$  to  $P_0V_0 = nRT_0$ .

Therefore,  $P_1V_1/T_1 = P_0V_0/T_0$ , from which it follows that:

$$V_0 = (P_1/P_0) \times (T_0/T_1)$$

In normal conditions volume is directly proportional to the pressure ratio and inversely the temperature ratio. As the latter are expressed as 273 + °C, the influence of their ratio is negligible, consequently we normally consider:

$$V_0 = (P_1/P_0) \times V_1 [ Nm^3 ].$$

## Table of symbols

Symbol	Meaning	Symbol	Meaning	Symbol	Meaning
	Compressor		Single acting cylinder spring return		Double acting magnetic cylinder (piston - mobile equipment)
	Vacuum pump		Double acting cylinder		Conditioning unit F.R.L. (filter, regulator, lubricator)
	Pneumatic motor with one direction of rotation		Double acting cylinder with permanent magnet		Filter
	Pneumatic motor with two direction of rotation		Double acting cylinder with dampers at both ends		Manually operated water separator
	Pneumatic motor with one direction of rotation and variable displacement volume		Double acting cylinder with adjustable cushionings at both ends		Water separator with automatic drain
	Pneumatic motor with two direction of rotation and variable displacement volume		Single acting telescopic cylinder		Filter with water separator (with automatic drain)
	Rotary cylinder		Double acting telescopic cylinder		Air dryer
	Single acting cylinder with return by external force		Double acting cylinder with through rod		Lubricator

Table of symbols

Symbol	Meaning	Symbol	Meaning	Symbol	Meaning
	Cooler (with representation of the cooling pipes)		3/3-way valve with closed neutral position		Mechanical operation by uni-directional roller
	Vessel (air-reservoir)		4/3-way valve with closed neutral position		Pneumatic operation with pressure
	Silencer		4/3-way valve exhausting in neutral position		Pneumatic operation with pressure exhaust
	Pressure source		5/3-way valve with closed neutral position		Pneumatic operation by different control surfaces (in the symbol the larger rectangle represents the larger control surface)
	Exhaust		5/3-way valve with exhausting neutral position		Pneumatic operation with pressure to the pilot
	Pressure gauge		General manual operation (without specifying type of control)		Electrical operation
	Visual display		Manual operation by pushbutton		Combined operation by solenoid and pilot valve
	2/2-way valve N.C. (two ports, closed in neutral position)		Manual operation by pushbutton with mechanical grip		Combined operation: by solenoid, pilot valve and generic manual
	2/2-way valve N.O. (two ports, flow in neutral position)		Manual operation by lever		Generically electrical and manual operation and piloted at both ends: two stable positions
	3/2-way valve N.C. (in 1 <sup>st</sup> switch position inlet is closed)		Manual operation by pedal		Generically electric and manual operation and piloted for three position valve
	3/2-way valve N.O. (in the 2 <sup>nd</sup> position air is exhausted or the return flow line is closed)		Mechanical operation by stem or key		Shuttle valve ("OR" type)
	4/2-way valve (with two open positions and one exhaust)		Mechanical operation by spring		Two pressure valve ("AND" type)
	5/2-way valve (with two open positions and two exhausts)		Mechanical operation by roller		Quick-exhaust valve

Table of symbols

Symbol	Meaning	Symbol	Meaning	Symbol	Meaning
	Non-return valve without spring		Sequence valve (priority valve)		Air barrier sender (emitter)
	Non-return valve with spring		Shut off valve		Air barrier receiver
	Piloted non-return valve		Vacuum generator (for venturi effect)		Gap sensor
	Flow restrictor with constant section		Pneumatic counter		Magnetically operated pneumatic reed switch
	Diaphragm flow restrictor with constant section		Pneumatic timer delayed energising, with valve 3/2 N.C.		
	Adjustable flow control valve		Pneumatic timer delayed energising, with valve 3/2 N.O.		
	Flow control valve with unidirectional adjustment		Pneumatic timer delayed de-energising, with valve 3/2 N.C.		
	Connected quick-lock couplings without valve		Pneumatic timer delayed de-energising, with valve 3/2 N.O.		
	Connected quick-lock couplings with valve		Pressure switch (adjustable)		
	Uncoupled (with open end) quick-lock couplings without valve		Pneumatic-electrical converter		
	Uncoupled quick-lock couplings with ends blocked by valve		Reflex sensor		
	Regulator without relieving		Back pressure end stop		
	Regulator with relieving				

### The Directive

The 2014/34/EU Directive was adopted by the European Union to regulate the market for products suitable for use in potentially explosive atmospheres, harmonizing their technical characteristics and application standards.

The 2014/34/EU Directive came into force on the 30<sup>th</sup> of March 2014 and repeals Directive 94/9/EC with effect from 20<sup>th</sup> of April 2016; it imposes ATEX certification on all products marketed in the European Union, no matter of manufacture place and regulations in force there, if installed in potentially explosive environments.

### Criteria for classifying equipment groups into categories

Group **I** includes equipment intended for underground work in mines and their surface installations (category **M1** and **M2**).

Group **II** includes equipment intended for use in other locations liable to be endangered by explosive atmospheres (categories **1**, **2**, **3**).

Products classified in the two groups may have different modes of explosion protection depending on the area in which the equipment is to be used.

For further information on Group II and its classification, please see the table on page III.4

### Equipment Protection Level (EPL)

The EN 60079-14 standard introduced a method for risk assessment that takes into account equipment protection levels, called EPL, which indicates the ignition risk inherent within the equipment, regardless the protection mode adopted.

The Atex Category letters "**G**" and "**D**" define whether the equipment can be used in areas containing hazardous gas (**G**) or dust (**D**). In the EPL classification, categories 1, 2 and 3 were replaced by the letters **a**, **b** and **c**.

The meaning of the markings is as follows:

- For Gases:

**Ga** identifies equipment for use in explosive atmospheres due to the presence of gas, with a "very high" level of protection that is not a source of ignition during normal operation or when subject to expected failure or when subject to rare failure;

**Gb** identifies equipment for use in explosive gas atmospheres, with a "high" level of protection, which is not a source of ignition during normal operation or when subject to anticipated malfunction, although not on a regular basis;

**Gc** identifies equipment for use in explosive gas atmospheres, with an "increased" level of protection, which is not a source of ignition during normal operation and which has some additional protective measures to ensure that it remains an inactive ignition source when subject to regularly expected events (e.g. lamp failure).

- For Dusts:

**Da** identifies equipment for explosive atmospheres due to the presence of combustible dusts, with a "very high" level of protection and which is not a source of ignition in normal operation or when subject to rare failures;

**Db** identifies equipment for explosive atmospheres due to the presence of combustible dusts, with a "high" level of protection and which is not a source of ignition in normal operation or when subject to expected, but not frequent, failures;

**Dc** identifies equipment for explosive atmospheres due to the presence of dust, with an "increased" level of protection, which is not a source of ignition in normal operation and which may have additional protections to ensure that it remains inactive as an ignition source in the event of regular and expected failures.

### Gas and Dust groups

The ATEX regulation proposes a classification of explosion-hazardous gases and dusts against which the user can protect himself by using a product with an appropriate protection system.

For Group **II** materials, the hazardousness of gases and dust covered by the product increases from subdivision **IIA-IIIA**, the least hazardous, to subdivision **IIC-IIIC**, the most hazardous.

To determine the gases and dust potentially present and their subdivisions, please refer to the subdivision table for Group II on page III.4

### Temperature classes for gases and dusts

The housing of the appliance must not have any flash points on its outer surface which could cause spontaneous combustion.

Different substances can ignite at different temperatures. The lower the flash point temperature, the more dangerous the substance. Consequently, any equipment used in an explosive atmosphere is classified according to the maximum surface temperature it generates.

The maximum surface temperature of the material must always be well below the auto-ignition temperature of the dusts and gases present.

For more information on the corresponding temperature classes and maximum surface temperatures, see the relevant table on page III.4

Classification and labeling of areas at risk of explosion

Flammable subjects	Hazardous environments (Presence of Potentially Explosive Atmospheres)	Explosion risk areas (Partition)	Device classification		Equipment Protection Level (EPL)
			Group	Category	
Gases Steam Mists	Continuously, for long periods or frequently	Zone 0	II		
	Occasionally	Zone 1	II	1G	Ga
	Rarely or for very short periods	Zone 2	II	2G 3G	Gb Gc
Dusts	Continuously, for long periods or frequently	Zone 20	II		
	Occasionally	Zone 21	II	1D	Da
	Rarely or for very short periods	Zone 22	II	2D 3D	Db Dc

Subdivision and differentiation of gases, mists and steams

Explosion group	Most common gases in reference to explosion group and temperature classes				
	IIB	Ammonia Methane Ethane Propane	Ethanol Cyclohex. n-Butane	Gasoline Diesel n-Hexane	Acetaldehyd.
IIC	Smog Acrylic Nitrile	Ethylene Ethylene oxide	Ethylene glycol Hydrogen sulphide	Ethyl ether	
	Coal hydrogen	Acetylene			Disulfide

T1 < 450°C
T2 < 300°C
T3 < 200°C
T4 < 135°C
T5 < 100°C
T6 < 85°C

API & ATEX

For more than 50 series of components in the catalogue, API offer the ATEX version on request, while some specific types of products are supplied as standard in accordance with Directive 2014/34/EU, in different classifications.

Below is an overview of the components concerned, with indications of the classifications that can be adopted.

For further information, please refer to the data sheets of the single products.

Cylinders

Cylinders ISO 6432	from page 1.2.1	On request can be supplied according to 2104/34/EU ATEX Directive in Ex h classification, with the following marking:	
Cylinders ISO 15552	from page 1.5.1		
Round cylinders	from page 1.11.1		
CNOMO cylinders	from page 1.14.1		
Compact cylinders ISO 21287	from page 1.16.1		
Compact cylinders UNITOP	from page 1.17.1		
Short stroke cylinders	from page 1.20.1		
Compact cylinders "L"	from page 1.21.1		
Compact guided cylinders	from page 1.23.1		
Slide units for ISO cylinders	from page 1.70.1		

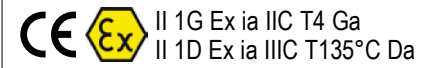

Stainless Steel cylinders

Cylinders ISO 6432	from page 5.2.1	On request can be supplied according to 2104/34/EU ATEX Directive in Ex h classification, with the following marking:	
Cylinders ISO 15552	from page 5.5.1		
Round cylinders	from page 5.11.1		
Compact cylinders ISO 21287	from page 5.20.1		

Magnetic reed switches for cylinders

Magnetic reed switch type MK500A	page 5.113.1	Supplied as standard according to 2104/34/EU ATEX Directive with marking:	
			
Magnetic reed switch type MK502A	page 5.113.1	Supplied as standard according to 2104/34/EU ATEX Directive with marking:

Find out about API Key Products

### What are the API Key Products

Within API wide range - which include Cylinders, Valves, Air Treatment, Accessories and Stainless Steel Components - API made a selection of products for its Customers, that represent the solution for most industrial applications and are characterised by excellent value for money, wide availability and fast delivery.

Therefore this selection was named "Key Products", and the components that are part of it are immediately identifiable in the API catalogue by the symbol  next to the code or article suffix.

### Solution for most applications

A careful selection of products suitable for installation in the most popular applications of industrial automation.

### Excellent value for money

Competitiveness is now more than ever a very important factor, but is also crucial to install a quality components on applications to guarantee performance, reliability and long lasting lifetime.

### Easy and intuitive choice

Is sufficient to recognise the symbol  next to the code or article suffix of the component, to know that it is part of the API Key Product selection.

### Wide availability

The products offered in the API Key Products selection are in stock (or the company stock the necessary components for their assembly) even in considerable quantities.

### Fast delivery

In an increasingly dynamic market, delivery schedules, condition customers' choices, so the products in the API selection are all featured by fast delivery possibility.

# CYLINDERS

## CHAPTER 1

General informations

Cylinders technical features	Page 1.1.1
------------------------------	------------

Cylinders conforming to standards

Series		Type	Page
ISO 6432		MS, MSM, MD, MDM, MDMA	1.2.1
ISO 15552		AMA, AMT, BMA, BMT	1.5.1
CNOMO		CX, CM	1.14.1
Compact ISO 21287		CIS, CI	1.16.1
Compact UNITOP		CS, CD	1.17.1

Cylinders not conforming to standards

Series		Type	Page
Round		RS, RD, RMD, RDMA	1.11.1
Compact		DU, DUM	1.18.1
Short stroke		BS, BSM, BD, BDM	1.20.1
Compact guided		GEDB, GEDS, GPB, GPS	1.23.1
Twin-rod		GSB, GSS	1.24.1
Rodless		S1, S2, S3, S4, S5, S6	1.26.1
Cartridge			1.55.1

Rotary cylinders and actuators

Series		Type	Page
Rotary cylinders		CRTH, CRTHD, CRTF	1.40.1
Rotary vane cylinders		ARTM, ARTMF	1.50.1
Rotary actuators		ARC, ARP	1.52.1

Hand grips

Mountings for rodless cylinders		In aluminium	1.100.250
Mountings for hand grips		In aluminium	1.100.350
Brackets for slide units		In aluminium	1.100.400
Screws, nuts and growers		In steel	1.101.1

Definition and main features

The pneumatic cylinder is an engine that uses pneumatic energy, transforming it into mechanical work by means of rectilinear movement. It is composed of a barrel, closed at the ends by two heads, within which a piston moves, separating two chambers. The piston is equipped with a rod that, when exiting through one or both of the heads, permits the exploitation of the force developed by the cylinder.

The characteristic parameters of a cylinder are:

Bore = internal diameter of the [ mm ]  
 Stroke = working movement to be performed [ mm ]  
 Diameter of the piston rod = closely correlated to the bore [ mm ]  
 Number of actings = number of strokes per cycle during which work is performed. These may be either one (single acting); or two (double acting).

Operating pressure range [ bar ]  
 Operating temperature range [ °C ]  
 Translation velocity [ m/s ]  
 Number of adjustable end cushionings  
 Kinetic energy absorbed by the cushionings [ Nm ]  
 Air consumption [ nl/min ]  
 Theoretical force [ N ]

Bore Ø	Pressure range P	Piston rod diameter d	Stroke c
A finite number of bores are available, all of which are standardized. The range goes from bores measuring just a few millimetres to those of 320 mm	This value is not very variable, due to technical-economical reasons. It covers the range 5 ÷ 7 bar. A system operating at 6 bar is considered optimized.	This is standardized for all the available bores.	The most frequently requested strokes are available in our warehouse. Any technically compatible stroke can be supplied in a short time.  It is advisable to choose easily available strokes that are greater than the operating strokes, halting the stroke at the desired value by means of external mechanical stops, in order to obtain mechanical precision and greater durability of the cylinder.

Operating temperature range

Ambient temperature must not be such as to make the cylinder assume values outside the temperature range for which it was constructed. It is possible to construct cylinders that are resistant to very low or very high temperatures, using special materials. The catalogues always show the operating temperature range.

The cylinder can also reach high temperatures due to particular conditions of use: in general, when the friction between the tube and the mobile apparatus increases greatly (e.g. due to high speeds with insufficient lubrication, the exhaustion of assembly lubrication or excessive compression of the air). The seals of the cylinder are the most short-lived component and those that are most sensitive to temperature.

Translation velocity v

It is advisable to adjust the translation velocity by means of the air discharge. The movement of the piston is fairly regular even with minimum velocities of 40 mm/s. The maximum velocity acceptable without additional lubrication to assembly lubrication, is equivalent to 1000 mm/s. Velocities of 2 ÷ 3 m/s can be reached with appropriate lubrication. For high velocities, as for high masses, the kinetic energy to be reabsorbed is excessive for the air cushionings. It is necessary to use external hydraulic cushionings of an appropriate size.

Theoretical force Ft

The theoretical force generated by a cylinder can be calculated by multiplying the actual area of the piston subjected to pressure by the operating pressure. For cylinders during pushing, the effective area of the piston corresponds to the bore:

$$F_t = \pi \Phi^2 p / 40 \text{ [ N ]}$$

$\Phi$  = bore [ mm ]  
 $P$  = operating pressure [ bar ]

N.B.: the formula considers passages from bars to N/m<sup>2</sup> and from mm<sup>2</sup> to m<sup>2</sup>.

For cylinders in traction, it is necessary to subtract the area of the rod from that of the piston:

$$F_t = \pi (\Phi^2 - d^2) p / 40 \text{ [ N ]}$$

Motion force F

The available motion force to the piston rod is:

$$F = F_t - R$$

Where R represents a force of reaction that comprises numerous factors: friction, form and type of seals, operating pressure, counter-pressure at discharge. The value of R is not easy to quantify as its component factors are not only numerous, but also variable. A cautious estimate for usual applications could be 30% Ft.

As shown by the graph illustrated below, which indicates the progress of the pressure values of delivery and discharge during the uniform movement of a cylinder, the delivery value Pm and the discharge value Ps remain constant during the stroke of the cylinder, if we exclude the brief transitory periods: of acceleration following the switching of the distributing valve and cushion at the end of the stroke.

The cylinder is thus prevalently subject to a motion force F proportional to Pm and the pushing surface, and to a counter-pressure force Fs proportional to the pressure Ps and the section upon which it acts, both of which are constant. The load reaction Fc must be added to these two forces.

In other words, the cylinder, in dynamic equilibrium, will - like all engines in this state - find itself under the action of contrasting forces that balance each other. It will move at a constant speed under the action of a constant force.

**Ft - Fs - Fa = Fc** Where Fs is the counter-pressure force and Fa is a force that bears in mind the friction and reduction of the operating power, to which Ft is linked, which does not reach the static network pressure, as can be seen in the graph.

During the transitory acceleration period, the force Fs is very low, as the air is being discharged. As the speed of the piston increases, the air being discharged is compressed and the force Fs increases until the state of equilibrium is reached.

For example, we wish to find the cylinder capable of overcoming the load value **Fc = 1200 [ N ]**

The theoretical force Ft must be at least 30% greater. Let's assume that: **Ft = 1600 [ N ]**

This gives the following result:

$$\Phi = \sqrt{40Ft/\pi p} \quad \Phi = \sqrt{40 \times 1600 / (3,14 \times 6)} \quad \cong 58 \text{ [ mm ]}$$

The closest standardized bores turn out to be: 50 mm and 63 mm It is advisable to choose the bore  $\Phi = 63$  mm, also because it enables a reserve of power to be obtained.

The uniform movement of the cylinder can be obtained by regulating the air at the discharge.

In order to obtain high values, on the other hand, it is necessary to make an appropriate increase in the discharge space in order to obtain accelerated movements, as the equilibrating force of counter-pressure is no longer present.

Peak load

In the case of long strokes, the load that can be applied to the piston rod is reduced due to the decrease in resistance at peak load.

The lifespan of a cylinder depends largely on its mechanical application. Installation must be performed in such a way as to avoid, or at least minimize, bending moments and radial loads on the piston rod (the most onerous kind of anchorage is the hinge type).

If only axial loads need be applied, the piston rod will be subjected to the peak load during pushing.

As the acceptable peak load is proportional to the diameter of the piston rod d (through the elastic modulus and the inertia moment) and inversely proportional to twice the stroke (length of free inflexion), in the case in which it does not allow the application of the required force, it is necessary to increase the diameter of the piston rod, passing to a suitably larger bore.

The choice of the standardized bore that best satisfies the requirements of the application in question is not just linked to the satisfaction of the force to be provided, but also to that of other conditions. These include the need to always have a power reserve (by choosing a larger size) and that of not causing excessive stress to the cushionings.

Air consumption NI/min

Air consumption air is a working value; it has a significant influence on costs. It is possible to calculate the average air consumption using the following formula:

$$Q = \pi \Phi^2 / 4 \times 60 \text{ c/t} \times (p+p_0) / p_0 \times 10^{-3} \times 10^{-3} \text{ [ nl/min ]}$$

Where:

Q = air consumption [ nl/min ]

$\Phi$  = bore [ mm ]

c = stroke [ mm ]

t = time taken to perform the stroke [ s ]

p = atmospheric operating pressure [ bar ]

p0 = atmospheric pressure: 1 bar

For example, we want to calculate the consumption of the following cylinder:

d = 50 mm; c = 300 mm; t = 0,45 s; p = 6 bar

$$Q = 3,14 \times 25 \times 10^2 / 4 \times (60 \times 3 \text{ w } 10^2 / 0,45) \times 7 \times 10^{-3} \times 10^{-3} = 550 \text{ [ nl/min ]}$$

Piston force F

The piston force (F) can be determined on the basis of the following formulae relating to the area of the piston rod (A), operating pressure (p) and friction (R).

Piston force  $F = a \cdot p - R$

(final pressure)  $F = p \cdot 10 \frac{d^2 \cdot \pi \cdot 10}{4} - R$

p = bar  
d = bore (mm)  
R = friction = 10% (N)  
A = area of piston rod  
F = actual force of piston (N)

Theoretical cylinders force

## Features and certifications

Series of cylinders conforming to ISO 6432 standards, available in bores from Ø 8 to 25, single or double acting, magnetic or non-magnetic. The heads joined to the barrel through rolling ensure perfect tightening. Supplied as standard in compliance with Reach and RoHS directives, and SIL certified. On request, they can be also supplied according to the 2014/34/EU ATEX Directive.

### Type MS Ø 8 ÷ 25

from page 1.2.20

Cylinders conforming to ISO 6432 standards, available in bores from Ø 8 to 25, single acting, non magnetic, the heads joined to the barrel through rolling ensure perfect tightening. Equipped with rubber bumpers to cushion the impact of the piston. Complete with head nut and rod nut.

### Type MSM Ø 8 ÷ 25

from page 1.2.20

Cylinders conforming to ISO 6432 standards, available in bores from Ø 8 to 25, single acting, magnetic, the heads joined to the barrel through rolling ensure perfect tightening. Equipped with rubber bumpers to cushion the impact of the piston. Possibility of applying one or more magnetic reed switches. Complete with head nut and rod nut.

### Type MD Ø 8 ÷ 25

from page 1.2.50

Cylinders conforming to ISO 6432 standards, available in bores from Ø 8 to 25, double acting, non magnetic, the heads joined to the barrel through rolling ensure perfect tightening. Equipped with rubber bumpers to cushion the impact of the piston. Complete with head nut and rod nut.

### Type MDM Ø 8 ÷ 25

from page 1.2.50

Cylinders conforming to ISO 6432 standards, available in bores from Ø 8 to 25, double acting, magnetic, the heads joined to the barrel through rolling ensure perfect tightening. Equipped with rubber bumpers to cushion the impact of the piston. Possibility of applying one or more magnetic reed switches. Complete with head nut and rod nut.

### Type MDMA Ø 16 ÷ 25

from page 1.2.70

Cylinders conforming to ISO 6432 standards, available in bores from Ø 16 to 25, double acting, magnetic, the heads joined to the barrel through rolling ensure perfect tightening. Equipped with adjustable air cushioning on both ends. Possibility of applying one or more magnetic reed switches. Complete with head nut and rod nut.

Options		
Description	Symbol	Suffix
Through rod (available from Ø 16)		<b>P</b>
Rear spring (available only for MS and MSM type, from Ø 16)		<b>T</b>
Extended rod in hardened and chrome plated steel suitable for static piston rod brake (available from Ø 20)		<b>B</b>
FKM seals <span style="float: right;">-20°C ÷ +150°C</span>		<b>V</b>
Anti-rotating hexagonal rod (available from Ø 16)		<b>Q</b>
ATEX versions on request		<b>/ATEX</b>

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of cylinders conforming to ISO 15552 standards in bores from Ø 32 to 320, double acting, magnetic. The cylinders of these series differ from each other for the heads, light or flat, and the barrel, with profile tube or round tube with tie-rods. Supplied as standard in compliance with Reach and RoHS directives, and SIL certified. On request, they can be also supplied according to the 2014/34/EU ATEX Directive. These features, combined with a modern and clean design, and the wide range of applications for which they are suitable place these cylinders among the core products of the company.

### Type AMA Ø 32 ÷ 125

from page 1.5.20

Cylinders ISO 15552, available in bores from Ø 32 to 125, double acting magnetic with adjustable cushioning, with profile barrel and two different kind of grooves (T type on the port side, and "C" type on the opposite side), to apply magnetic reed switches directly, and interchange with most competitors. The design is modern and clean, the heads are light and characterized by powder-coating.

### Type AMT Ø 32 ÷ 125

from page 1.5.20

Cylinders ISO 15552, available in bores from Ø 32 to 125, double acting magnetic with adjustable cushioning, made with round tube and tie-rods. The design is modern and clean, the heads are light and characterized by powder-coating.

### Type BMA Ø 32 ÷ 125

from page 1.5.50

Cylinders ISO 15552, available in bores from Ø 32 to 125, double acting magnetic with adjustable cushioning, with profile barrel and two different kind of grooves (T type on the port side, and "C" type on the opposite side), to apply magnetic reed switches directly, and interchange with most competitors. The design is modern and clean, the heads are flat.

### Type BMT Ø 32 ÷ 125

from page 1.5.50

Cylinders ISO 15552, available in bores from Ø 32 to 125, double acting magnetic with adjustable cushioning, made with round tube and tie-rods. The design is modern and clean, the heads are flat.

### Type AMT Ø 160 ÷ 320

from page 1.5.70

Cylinders ISO 15552, available in bores from Ø 160 to 320, double acting magnetic with adjustable cushioning, made with round tube and tie-rods. The design is characterized by the heads light and powder-coated.

Options		
Description	Symbol	Suffix
Through rod		<b>P</b>
Stainless Steel AISI 304 rod		<b>K</b>
Stainless Steel AISI 316 rod		<b>K316</b>
Stainless Steel tie-rods (available only for AMT and BMT type)		<b>K1</b>
Stainless head nuts and rod nut (available only for AMT and BMT type up to Ø 200)		<b>K2</b>
Extended rod in hardened and chrome plated steel suitable for static piston rod brake (available up to Ø 125)		<b>B</b>
Extended rod in hardened and chrome plated steel suitable for dynamic piston rod brake (available up to Ø 100)		<b>B1</b>
FKM seals -20°C ÷ +150°C		<b>V</b>
FKM rod seal -20°C ÷ +80°C		<b>V1</b>
Rod seal scraper in special elastomer for applications in dirty and dusty environment (available up to Ø 200) -20°C ÷ +80°C		<b>E8</b>
Low temperature seals -40°C ÷ +80°C		<b>BT</b>
Tandem forward movement piston rods coupled together		<b>TA1</b>
Tandem forward movement piston rods independent		<b>TA2</b>
Tandem back to back		<b>TA3</b>
Tandem front to front		<b>TA4</b>
Extended rod (indicate the requested WH dimension in mm, E.g.: WH=100; for further information please contact the sales department)		<b>WH=..</b>
Without adjustable cushionings		<b>D</b>
Adjustable rear cushioning only		<b>D1</b>
Adjustable front cushioning only		<b>D2</b>
Special male thread (indicate the requested thread. E.g.: R-M 10x1,5; the dimension AM of the special thread will be the same as the standard; cylinder will be supplied without rod nut; for further information please contact the sales department)		<b>R-M..</b>
Female thread		<b>F</b>
With bellow for protection of the rod (in this case the dimension WH should be extended according the stroke of the cylinder; for further information please contact the sales department)		<b>Z</b>
NBR seals -20°C ÷ +80°C		<b>H</b>
NBR rod seal -20°C ÷ +80°C		<b>H1</b>
Brass rod scraper (only with H, H1, V, V1 or BT options; for further information please contact the sales department)		<b>Y</b>
Stainless Steel AISI 316L tube (available only for AMT and BMT type)		<b>TX</b>
Epoxy coating (RAL 7035)		<b>EPX</b>
ATEX versions on request (only with K or K316 options; for further information please contact the sales department)		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see from page 1.5.4; For code key see from page 1.5.6.

Key

● allowed matching; - not allowed matching

Options matching notes

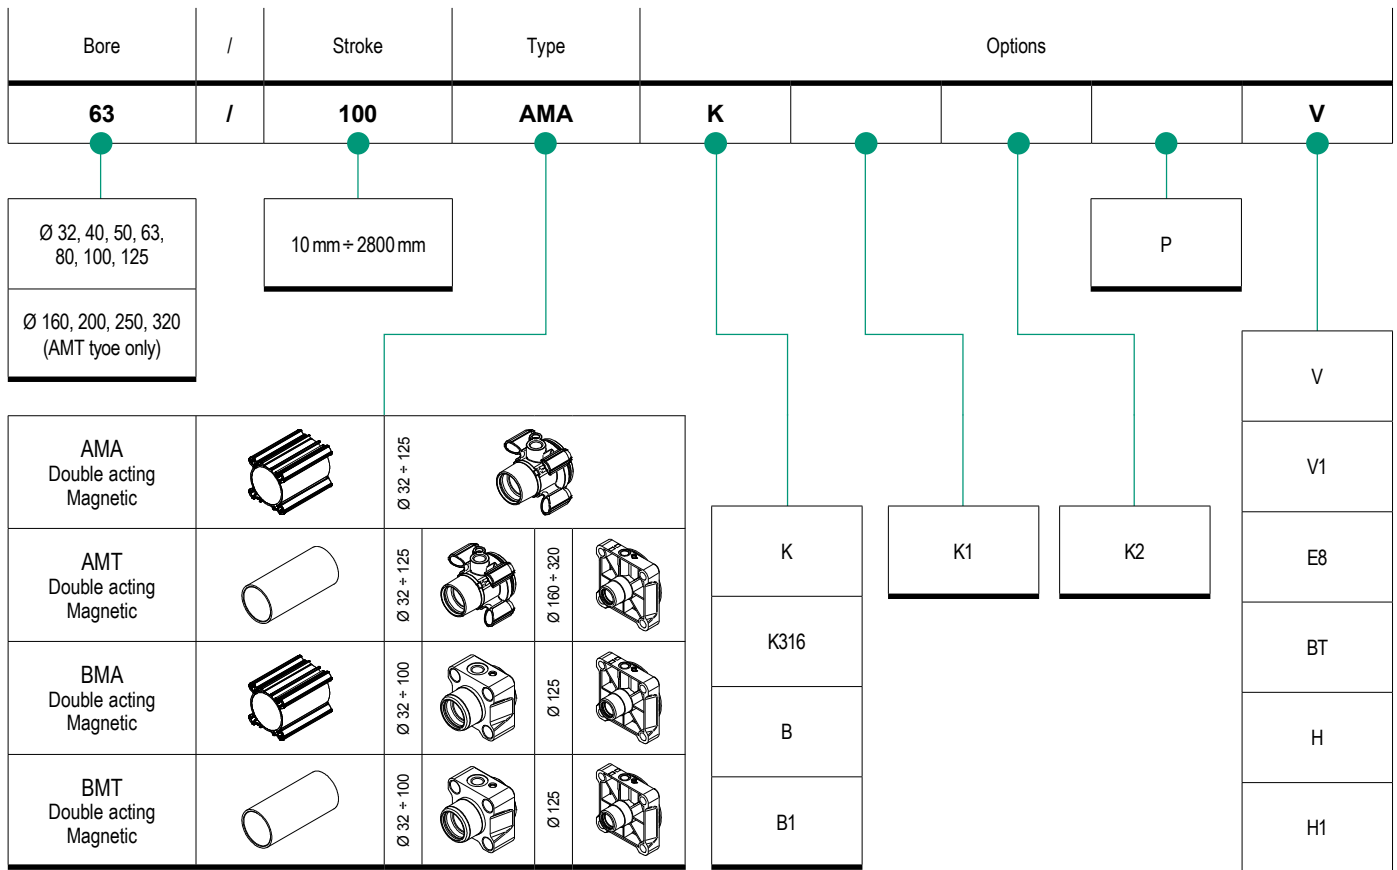

- (1) Option **WH=.** require to indicate the desired dimension in mm, whereas for some combinations the option **WH=.** should be required or optional. For further information please contact the sales department. If you choose the female thread (option **F**), please indicate the dimension **WF=.** and then the actual desired dimension in mm
- (2) Option **R-M.** require to indicate the desired thread. For further information please contact the sales department.
- (3) Option **Y** require that the cylinder mount seals of options **H, H1, V, V1** or **BT**. Not allowed in combination with option **E8**.
- (4) In the **/ATEX** versions, is required to mount the stainless steel rod (options **K** or **K316**).
- (5) With the options **B** or **B1**, for dimensions S or S1 (WH) please see the table in page 1.5.22 (series AMA and AMT) or page 1.5.52 (series BMA and BMT).
- (6) In the models with bellow (option **Z**) should be necessary the extended rod option (**WH=.**) for some bores or strokes. Otherwise the **WH=.** option can be chosen according to the customer's needs. For further information please contact the sales department.
- (7) With through rod (option **P**) the option female thread (**F**) and the option special male thread (**R-M.**) are applied on both sides of the rod. While the option extended rod (**WH=.**) is applied only to one side of the rod.

## Standard\* seal kit

Number of components	Description
n. 1	Rod seal
n. 2	Cushioning seal
n. 2	Piston seal
n. 1	Linear rubber ring for piston (damper)
n. 2	Tube-head o-ring
n. 1	Piston guiding ring
n. 2	Adjustment screw o-ring
n. 1	Sempiston o-ring

## Standard seal kit code key

\* For cylinders with options P, H, H1, V, V1 and BT, the kit include further components.

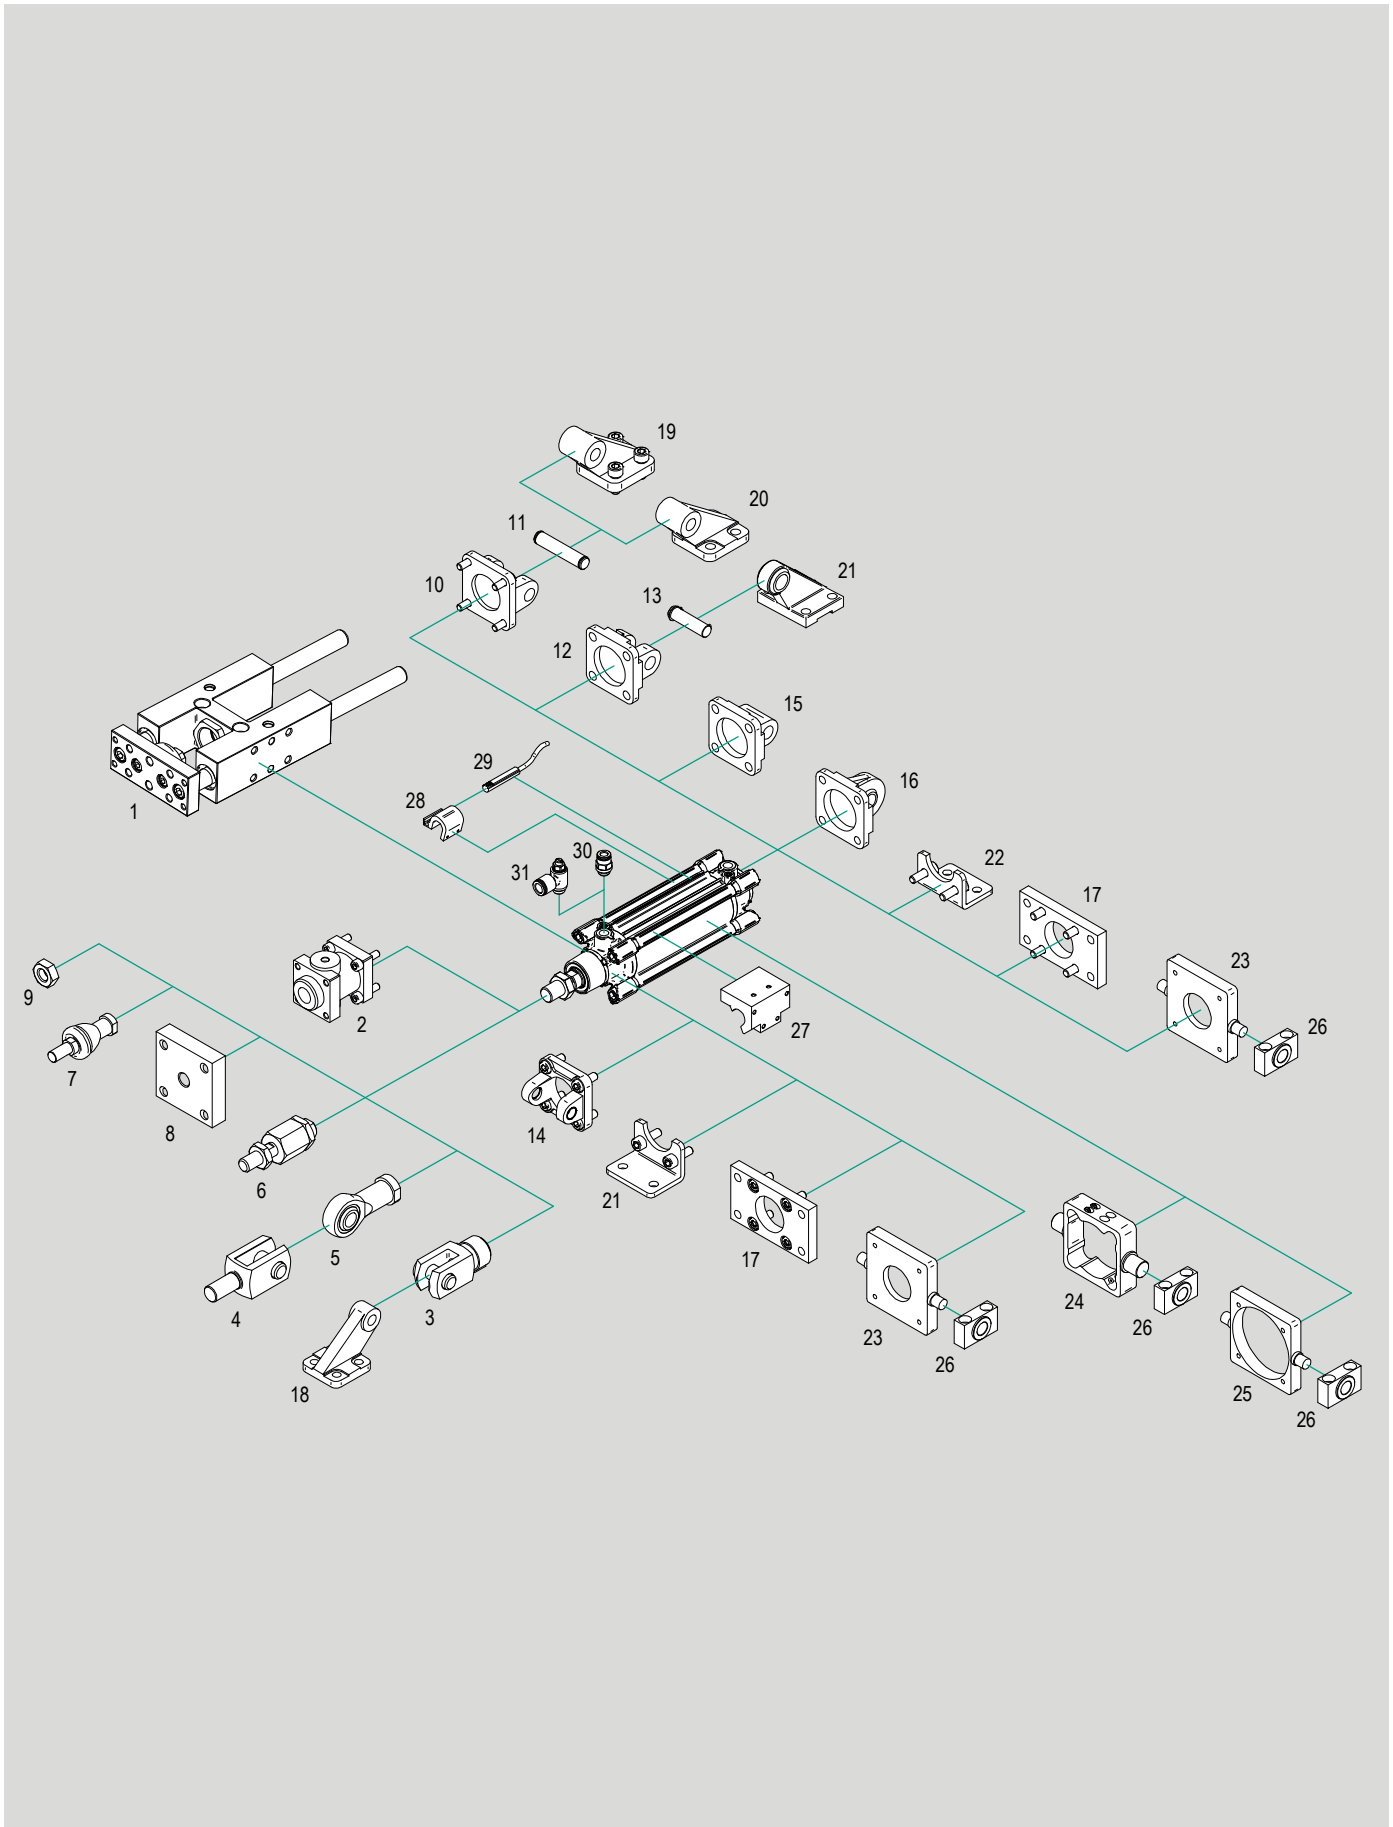

Standard materials

Position	Description	Material	
		Ø 32 ÷ 100	Ø 125 ÷ 320
1	Tube	Anodised aluminium	
2	Heads	Die cast painted aluminium (powder coating for AMA and AMT type, spray for BMA and BMT type)	
3	Rod	Chrome-plated C45 steel	
4	Piston	Die cast painted aluminium	
5	Bushing	Self-lubricating sintered bronze	
6	Guide ring	Acetalic resin (POM)	
7	Rod seals	Polyurethane (PU)	
8	Cushioning seals	Polyurethane (PU)	
9	Piston seals	Polyurethane (PU)	NBR
-	Tie-rods (for type AMT and BMT only)	Zinc-plated steel	
-	Other seals	NBR

## Features and certifications

Series of round cylinders not conforming to standards, available in bores from Ø 32 to 63, single acting or double acting, magnetic or non magnetic, with or without cushioning. The heads joined to the barrel through rolling ensure perfect tightening. Supplied as standard in compliance with Reach and RoHS directives, and SIL certificated. On request, they can be also supplied according to the 2014/34/EU ATEX Directive.

### Type RS Ø 32 ÷ 63

from page 1.11.20

Round cylinders not conforming to standards, available in bores from Ø 32 to 63, single acting, non magnetic. Heads joined to the barrel through rolling ensure perfect tightening. Supplied with rod nut and head nut.

### Type RD Ø 32 ÷ 63

from page 1.11.40

Round cylinders not conforming to standards, available in bores from Ø 32 to 63, double acting, non magnetic. Heads joined to the barrel through rolling ensure perfect tightening. Supplied with rod nut and head nut.

### Type RDM Ø 32 ÷ 63

from page 1.11.40

Round cylinders not conforming to standards, available in bores from Ø 32 to 63, double acting, magnetic. Heads joined to the barrel through rolling ensure perfect tightening. Supplied with rod nut and head nut. Possibility of applying one or more magnetic reed switches.

### Type RDMA Ø 32 ÷ 63

from page 1.11.60

Round cylinders not conforming to standards, available in bores from Ø 32 to 63, double acting, magnetic, adjustable cushioning. Heads joined to the barrel through rolling ensure perfect tightening. Supplied with rod nut and head nut. Possibility of applying one or more magnetic reed switches.

Options		
Description	Symbol	Suffix
Through rod (not available for RS type)		<b>P</b>
Rear spring (available only for RS type)		<b>T</b>
FKM seals	-20°C ÷ +150°C 	<b>V</b>
Low temperature seals	-40°C ÷ +80°C 	<b>BT</b>
Low friction		<b>L</b>
Special male thread (indicate the requested thread. E.g.: R-M 10x1,5; the dimension AM of the special thread will be the same as the standard; cylinder will be supplied without rod nut; for further information please contact the sales department)		<b>R-M..</b>
ATEX versions on request		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see from page 1.11.4; For code key see from page 1.11.5

## Features and certifications

Series of cylinders conforming to CNOMO standards. With round barrel and tie rods, available in bores from Ø 25 to 200, double acting, with adjustable cushionings at both ends, magnetic or non magnetic. Supplied as standard in compliance with Reach and RoHS directives, and SIL certificated. On request, they can be also supplied according to the 2014/34/EU ATEX Directive.

### Type CX Ø 32 ÷ 100

from page 1.14.20

Cylinders CNOMO, available in bores from Ø 32 to 100, double acting, with adjustable cushionings at both ends, non magnetic. Supplied with rod nut.

### Type CM Ø 25 ÷ 200

from page 1.14.40

Cylinders CNOMO, available in bores from Ø 32 to 200, double acting, with adjustable cushionings at both ends, magnetic. Supplied with rod nut.

Options		
Description	Symbol	Suffix
Through rod		<b>P</b>

n. 2	Cushioning screw o-ring

## Standard seal kit code key

## Standard\*\* seal kit for CX type

Number of components	Description
n. 1	Rod seal
n. 2	Cushioning seal
n. 1	Piston monobloc
n. 1	Seeger ring
n. 2	Tube-head o-ring
n. 2	Cushioning screw o-ring

\*\*For cylinders with options P, V or V1, the kit include further components.

Accessories

1 - CYLINDERS

100-125	041458	D27x2		
160-200	041459	D36x2		

## Bearing heads (DIN 648K) with female thread RF..SE

	For cylinder Ø mm	Code	Item	Compliance
	25-32	041565	RF10x1,5SE	
40-50	041557	RF16SE		
63-80	041559	RF20SE		
100-125	041562	RF30SE		
160-200	041563	RF35SE		

## Self-aligning articulated coupling GB..

	For cylinder Ø mm	Code	Item	Compliance
	25-32	041705	GB050	-
40-50	041708	GB100		
63-80	041709	GB120		
100-125	041711	GB130		
160-200	041712	GB160-200		

## Axial articulated coupling RBL..

	For cylinder Ø mm	Code	Item	Compliance
	25-32	041611	RBL10x1,5	-
50-63	041607	RBL16		
80-100	041609	RBL20		

## Angular articulated coupling RBL..

	For cylinder Ø mm	Code	Item	Compliance
	40-50	041657	RBL16	-
63-80	041659	RBL20		

## Self-aligning coupling GC..

	For cylinder Ø mm	Code	Item	Compliance
	40-50	041724	GCM16x1,5	-
63-80	041725	GCM20x1,5		
100-125	041726	GCM27x2		
160-200	041727	GCM36x2		

## Rear standard hinge in aluminium AN..ALCN

	For cylinder Ø mm	Code	Item	Compliance
	32	040281	AN032ALCN	
40-50	040282	AN040/050ALCN		
63-80	040284	AN063/080ALCN		
100-125	040286	AN100/125ALCN		
160-200	040288	AN160/200ALCN		

Nuts and growers to be ordered separately, see from page 1.101.20

## Rear clevis\* in aluminium CF..ALCN

	For cylinder Ø mm	Code	Item	Compliance
	32	040401	CF032ALCN	<b>CNOMO</b>
	40	040402	CF040ALCN	
	50	040403	CF050ALCN	
	63	040404	CF063ALCN	
	80	040405	CF080ALCN	
	100	040406	CF100ALCN	
	125	040407	CF125ALCN	
	160	040408	CF160ALCN	
200	040409	CF200ALCN		

\*Pin SEC..AQCN to be ordered separately, see page 1.14.110  
Nuts and growers to be ordered separately, see from page 1.101.20

## High foot\* in aluminium P..ALCN

	For cylinder Ø mm	Code	Item	Compliance
	32	040101	P032ALCN	<b>CNOMO</b>
	40	040102	P040ALCN	
	50	040103	P050ALCN	
	63	040104	P063ALCN	
	80	040105	P080ALCN	
	100	040106	P100ALCN	
	125	040107	P125ALCN	
	160	040108	P160ALCN	
200	040109	P200ALCN		

\*Supplied individually  
Nuts and growers to be ordered separately, see from page 1.101.20

## Rear 90° hinge in aluminium AS..ALCN

	For cylinder Ø mm	Code	Item	Compliance
	32	040321	AS032ALCN	<b>CNOMO</b>
	40-50	040322	AS040/050ALCN	
	63-80	040324	AS063/080ALCN	
	100-125	040326	AS100/125ALCN	
160-200	040328	AS160/200ALCN		

Nuts and growers to be ordered separately, see from page 1.101.20

## Low foot\* in steel PB..AQCNC

	For cylinder Ø mm	Code	Item	Compliance
	32	040161	PB032AQCNC	<b>CNOMO</b>
	40	040162	PB040AQCNC	
	50	040163	PB050AQCNC

	160	040168	PB160AQCNC	
	200	040169	PB200AQCNC	

\*Supplied individually; Nuts and growers to be ordered separately, see from page 1.101.20

## Counterbored flange in steel FL..AQCNC

	For cylinder Ø mm	Code	Item	Compliance
	32	040621	FL032AQCNC	<b>CNOMO</b>
	40	040622	FL040AQCNC	
	50	040623	FL050AQCNC	
	63	040624	FL063AQCNC	
	80	040625	FL080AQCNC	
	100	040626	FL100AQCNC	
	125	040627	FL125AQCNC	
	160	040628	FL160AQCNC	
200	040629	FL200AQCNC		

Nuts and growers to be ordered separately, see from page 1.101.20

## Threaded flange\* in steel FLF..AQCNC

	For cylinder Ø mm	Code	Item	Compliance
	32	040948	FLF032AQCNC	<b>CNOMO</b>
	40	040949	FLF040AQCNC	
	50	040950	FLF050AQCNC	
	63	040951	FLF063AQCNC	
	80	040952	FLF080AQCNC	
	100	040953	FLF100AQCNC	
	125	040954	FLF125AQCNC	
	160	040955	FLF160AQCNC	
	200	040956	FLF200AQCNC	

\*To be ordered together with the cylinder. For tie-rods dimensions, please see page 1.14.21 and 1.14.41; Nuts and growers to be ordered separately, see page 1.101.20

## Bracket AS.. for magnetic reed switches T groove

	For cylinder Ø mm	Code	Item	Cylinder matching
	25 ÷ 40	072912	AS105	<b>CM</b>

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of compact cylinders conforming to ISO 21287 standards. The barrel with grooves allows the mounting of magnetic reed switches directly in the tube without brackets. Available in bores from Ø 16 to 125, single acting or double acting, magnetic, with elastic dampers on the piston. These cylinders are compatible with ISO 15552 mounting accessories. Supplied as standard in compliance with Reach and RoHS directives, and SIL certificated. On request, they can be also supplied according to the 2014/34/EU ATEX Directive.

### Type CIS Ø 16 ÷ 100

from page 1.16.20

Compact cylinders conforming to ISO 21287, available in bores from Ø 16 to 100, single acting, magnetic, with elastic dampers on piston. Barrel with grooves allows mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder.

### Type CI Ø 16 ÷ 125

from page 1.16.20

Compact cylinders conforming to ISO 21287, available in bores from Ø 16 to 125, double acting, magnetic, with elastic dampers on piston. Barrel with grooves allows mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder.

Options		
Description	Symbol	Suffix
Anti-rotating plate (available only for CI type, up to Ø 100)		<b>N</b>
Rear spring (available only for CIS type)		<b>T</b>
Male threaded rod		<b>M</b>
Through rod		<b>P</b>
FKM seals <span style="float: right;">-20°C ÷ +150°C</span>		<b>V</b>
FKM rod seal <span style="float: right;">-20°C ÷ +80°C</span>		<b>V1</b>
Low temperature seals <span style="float: right;">-40°C ÷ +80°C</span>		<b>BT</b>
Tandem forward movement piston rods coupled together (available only for Ø 20, Ø 40 and Ø 63)		<b>TA1</b>
Tandem forward movement piston rods independent (available only for Ø 20, Ø 40 and Ø 63)		<b>TA2</b>
Tandem back to back (available from Ø 20)		<b>TA3</b>
Tandem front to front (available from Ø 20 up to Ø 100)		<b>TA4</b>
Extended rod (indicate the requested WH dimension in mm, E.g.: WH=100; for further information please contact the sales department)		<b>WH=..</b>
Special thread (indicate the requested thread. E.g.: R-M 10x1,5; if combined with option M, the AM dimension of the special thread will be the same as the standard; the cylinder will be supplied without rod nut; for further information please contact the sales department).		<b>R-M..</b>
ATEX versions on request		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see from page 1.16.4; For code key see from page 1.16.6

Options matching - notes

(1) Option **WH=.** require to indicate the desired dimension (in mm). For further information please contact the sales department.

(2) Option **R-M.** require to indicate the desired thread. For further information please contact the sales department. if combined with male threaded rod (option **M**) the cylinder will be supplied without rod nut.

(3) The male threaded rod (option **M**) in combination with through rod (option **P**) is applied on both sides of rod, except when combined with the anti-rotation plate (option **N**), in which case the male rod will only be applied on the side opposite the plate.

Ø mm	WH	ZA	B	C
20	6	37	9	13
25	6	39	11	13
32	7	44	12	15
40	7	45	13	15
50	8	45	15	15
63	8	49	15	15
80	10	54	16	17
100	10	67	20	19,5
125	11	81	-	19,5

## Female clevis with clip FF..ISO

	For cylinder Ø mm	Code	Item	Compliance
	16	041002	FF06ISO/DIN	<b>ISO</b> 8140
20-25	041003	FF08ISO/DIN		
32-40	041004	FF10ISO		
50-63	041005	FF12ISO		
80-100	041006	FF16ISO		
125	041007	FF20ISO		

Matching with option M only

## Female clevis with pin and seeger FFP..ISO

	For cylinder Ø mm	Code	Item	Compliance
	16	-	FFP06ISO/DIN	<b>ISO</b> 8140
20-25	-	FFP08ISO/DIN		
32-40	041051	FFP10ISO		
50-63	041040	FFP12ISO		
80-100	041013	FFP16ISO		
125	041017	FFP20ISO		

Matching with option M only

## Female clevis (body only) FFN..ISO

	For cylinder Ø mm	Code	Item	Compliance
	16	041011	FFN06ISO/DIN	<b>ISO</b> 8140
20-25	041018	FFN08ISO/DIN		
32-40	041014	FFN10ISO		
50-63	041016	FFN12ISO		
80-100	041012	FFN16ISO		
125	041015	FFN20ISO		

Matching with option M only

## Bearing heads (DIN 648K) with female thread RF..SE

	For cylinder Ø mm	Code	Item	Compliance
	16	041552	RF6SE	<b>ISO</b> 8139
20-25	041553	RF8SE		
32-40	041554	RF10SE		
50-63	041555	RF12SE		
80-100	041557	RF16SE		
125	041559	RF20SE		

Matching with option M only

## Bearing heads (DIN 648K) with male thread RM..SE

	For cylinder Ø mm	Code	Item	Compliance
	16	041500	RM4SE	<b>ISO</b> 8139
20-25	041502	RM6SE		
32-40	041503	RM8SE		
50-63	041550	RM10SE/M10x1,5		
80-100	041514	RM12SE/M12		
125	041517	RM16SE/M16		

Matching with option M only

## Self-aligning articulated coupling GB..

	For cylinder Ø mm	Code	Item	Compliance
	16	041702	GB010	-
20-25	041703	GB020		
32-40	041704	GB040		
50-63	041706	GB060		
80-100	041708	GB100		
125	041709	GB120		

Matching with option M only

## Axial articulated coupling RBI..

	For cylinder Ø mm	Code	Item	Compliance
	32-40	041604	RBI10	-
50-63	041605	RBI12		
80-100	041607	RBI16		
125	041609	RBI20		

Matching with option M only

## Angular articulated coupling RBL..

	For cylinder Ø mm	Code	Item	Compliance
	32-40	041654	RBL10	-
50-63	041655	RBL12		
80-100	041657	RBL16		
125	041659	RBL20		

Matching with option M only

## Self-aligning coupling GC..

	For cylinder Ø mm	Code	Item	Compliance
	32-40	041722	GCM10x1,25	-
50-63	041723	GCM12x1,25		
80-100	041724	GCM16x1,5		
125	041725	GCM20x1,5		

Matching with option M only

## Rear clevis in aluminium with screws and pin CF..ALIS+VP

	For cylinder Ø mm	Code	Item	Compliance
	32	042050		CF032ALIS+VP
40	042051		CF040ALIS+VP	
50	042052		CF050ALIS+VP	
63	042053		CF063ALIS+VP	
80	042054		CF080ALIS+VP	
100	042055		CF100ALIS+VP	
125	042056		CF125ALIS+VP	

## Narrow rear clevis in aluminium with screws and pin CFS..ALIS+VP

	For cylinder Ø mm	Code	Item	Compliance
	32	042110		CFS032ALIS+VP
40	042111		CFS040ALIS+VP	
50	042112		CFS050ALIS+VP	
63	042113		CFS063ALIS+VP	
80	042114		CFS080ALIS+VP	
100	042115		CFS100ALIS+VP	
125	042116		CFS125ALIS+VP	

## Rear clevis in aluminium\* with screws CF..ALIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	040441		CF032ALIS+V
40	040442		CF040ALIS+V	
50	040443		CF050ALIS+V	
63	040444		CF063ALIS+V	
80	040445		CF080ALIS+V	
100	040446		CF100ALIS+V	
125	040447		CF125ALIS+V	

\*Available also in steel (item CF..AQIS+V) in Ø 32 ÷ 125, see page 1.100.50

## Narrow rear clevis in aluminium\* with screws CFS..ALIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	040451		CFS032ALIS+V
40	040452		CFS040ALIS+V	
50	040453		CFS050ALIS+V	
63	040454		CFS063ALIS+V	
80	040455		CFS080ALIS+V	
100	040456		CFS100ALIS+V	
125	040457		CFS125ALIS+V	

\*Available also in steel (item CFS..AQIS+V) in Ø 32 ÷ 125, see page 1.100.50

## Rear eye in aluminium\* CM..ALUN

	For cylinder Ø mm	Code	Item	Compliance
	16	040701		CM012/016ALUN
20	040702		CM020ALUN	
25	040703		CM025ALUN	

\*Available also in steel (item CM..AQUN) in Ø 20 ÷ 25, see page 1.100.51  
Screws to be ordered separately, see page 1.101.40

## Rear eye in aluminium\* with screws CM..ALIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	042061		CM032ALIS+V
40	042062		CM040ALIS+V	
50	042063		CM050ALIS+V	
63	042064		CM063ALIS+V	
80	042065		CM080ALIS+V	
100	042066		CM100ALIS+V	
125	042067		CM125ALIS+V	

\*Available also in steel (item CM..AQIS+V) in Ø 32 ÷ 125, see page 1.100.51

## Narrow rear eye with bearing (DIN 648K) in aluminium\* with screws CMS..ALIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	042101		CMS032ALIS+V
40	042102		CMS040ALIS+V	
50	042103		CMS050ALIS+V	
63	042104		CMS063ALIS+V	
80	042105		CMS080ALIS+V	
100	042106		CMS100ALIS+V	
125	042107		CMS125ALIS+V	

Available also in steel (item CMS..AQIS+V) in Ø 32 ÷ 125, see page 1.100.52

## Rod nut D..

	For cylinder Ø mm	Code	Item	Compliance
	16	041450		D6x1
20-25	041451		D8x1,25	
32-40	041452		D10x1,25	
50-63	041454		D12x1,25	
80-100	041455		D16x1,5	
25	041456		D20x1,5	

Matching with option M only

## Pin with seeger\* in steel SEC..AQIS

	For cylinder Ø mm	Code	Item	Compliance
	32	040261	SEC032AQIS	
	40	040262	SEC040AQIS	
	50	040263	SEC050AQIS	
	63	040264	SEC063AQIS	
	80	040265	SEC080AQIS	
	100	040266	SEC100AQIS	
	125	040267	SEC125AQIS	

\*Supplied with 2 seeger

## Anti-rotating pin with seeger\* in steel SEC..ARAQIS

	For cylinder Ø mm	Code	Item	Compliance
	32	040571	SEC032ARAQIS	
	40	040572	SEC040ARAQIS	
	50	040573	SEC050ARAQIS	
	63	040574	SEC063ARAQIS	
	80	040575	SEC080ARAQIS	
	100	040576	SEC100ARAQIS	
	125	040577	SEC125ARAQIS	

\*Supplied with 1 seeger

## Flange in aluminium FL..ALUN

	For cylinder Ø mm	Code	Item	Compliance
	12-16	040721	FL012/016ALUN	
	20	040722	FL020ALUN	
	25	040723	FL025ALUN	

Screws to be ordered separately, see page 1.101.40

## Flange in aluminium with screws FLV..ALIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	042150	FLV032ALIS+V	
	40	042151	FLV040ALIS+V	
	50	042152	FLV050ALIS+V	
	63	042153	FLV063ALIS+V	
	80	042154	FLV080ALIS+V	
	100	042155	FLV100ALIS+V	
	125	042156	FLV125ALIS+V	

## Flange in steel FL..AQUN

	For cylinder Ø mm	Code	Item	Compliance
	12-16	040751	FL012016AQUN	
	20	040752	FL020AQUN	
	25	040753	FL025AQUN	

Screws to be ordered separately, see page 1.101.40

## Flange in steel with screws FLV..AQIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	042119	FLV032AQIS+V	
	40	042120	FLV040AQIS+V	
	50	042121	FLV050AQIS+V	
	63	042122	FLV063AQIS+V	
	80	042123	FLV080AQIS+V	
	100	042124	FLV100AQIS+V	
	125	042125	FLV125AQIS+V	

## Low foot\* in steel PB..AQUN

	For cylinder Ø mm	Code	Item	Compliance
	16	040761	PB012/016AQUN	
	20	040762	PB20AQUN	
	25	040763	PB25AQUN	

\*Supplied individually

Screws to be ordered separately, see page 1.101.40

## Low foot\* in steel with screws PB..AQIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	042129	PB032AQIS+V	
	40	042130	PB040AQIS+V	
	50	042131	PB050AQIS+V	
	63	042132	PB063AQIS+V	
	80	042133	PB080AQIS+V	
	100	042134	PB100AQIS+V	
	125	042135	PB125AQIS+V	

\*Supplied individually

## Center trunnion for heads in steel with screws CTA..AQIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	040591	CTA032AQIS+V	 MT5/MT6
	40	040592	CTA040AQIS+V	
	50	040593	CTA050AQIS+V	
	63	040594	CTA063AQIS+V	
	80	040595	CTA080AQIS+V	
	100	040596	CTA100AQIS+V	
	125	040598	CTA125AQIS+V	

Support ST..AQIS to be ordered separately, see next

## Support for center trunnion\* in steel ST..AQIS

	For cylinder Ø mm	Code	Item	Compliance
	32	040681	ST032AQIS	 AT4
	40-50	040682	ST040/050AQIS	
	63-80	040684	ST063/080AQIS	
	100-125	040686	ST100/125AQIS	

\*Supplied individually

## Rear 90° hinge in aluminium\* with screws ASV..ALIS+V

	For cylinder Ø mm	Code	Item	Compliance
	32	042081	ASV032ALIS+V	 AB7  RP 107P
	40	042082	ASV040ALIS+V	
	50	042083	ASV050ALIS+V	
	63	042084	ASV063ALIS+V	
	80	042085	ASV080ALIS+V	
	100	042086	ASV100ALIS+V	
	125	042087	ASV125ALIS+V	

\*Available also in steel: item CF..+P for Ø 16 ÷ 25 and item ASV..AQIS for Ø 32 ÷ 125, see page 1.100.53

## Rear 90° hinge in aluminium AS..ALIS

	For cylinder Ø mm	Code	Item	Compliance
	32	040361	AS032ALIS	 6431
	40	040362	AS040ALIS	
	50	040363	AS050ALIS	
	63	040364	AS063ALIS	
	80	040365	AS080ALIS	
	100	040366	AS100ALIS	
	125	040367	AS125ALIS	

## Rear 90° hinge with bearing (DIN 648K) in steel ASS..AQIS

	For cylinder Ø mm	Code	Item	Compliance
	32	040551	ASS032AQIS	 CS7
	40	040552	ASS040AQIS	
	50	040553	ASS050AQIS	
	63	040554	ASS063AQIS	
	80	040555	ASS080AQIS	
	100	040556	ASS100AQIS	
	125	040557	ASS125AQIS	

## Magnetic reed switch T groove ASV..

	For cylinder Ø mm	Code	Item	Cylinder matching
	16 ÷ 125	070946	ASV1C525	 CIS CI
		071863	ASV1C550

		072918	ASV1H525	

## ATEX magnetic reed switch T groove MK..

	For cylinder Ø mm	Code	Item	Compliance	Cylinder matching
	16 ÷ 125	071120	MK500A	 3D	 CIS CI
		071108	MK502A	 IIIG	

# COMPACT

## Cylinders UNITOP

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of compact cylinders conforming to European UNITOP standards. The barrel with grooves allows the mounting of magnetic reed switches directly in the tube without brackets. Available in bores from Ø 12 to 100, single acting or double acting, magnetic, with elastic dampers on the piston. Supplied as standard in compliance with Reach and RoHS directives, and SIL certificated. On request, they can be also supplied according to the 2014/34/EU ATEX Directive.

### Type CS Ø 12 ÷ 100

from page 1.17.20

Compact cylinders conforming to European UNITOP standards, available in bores from Ø 12 to 100, single acting, magnetic with elastic dampers on piston. Barrel with grooves allows mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder.

### Type CD Ø 12 ÷ 100

from page 1.17.20

Compact cylinders conforming to European UNITOP standards, available in bores from Ø 12 to 100, double acting, magnetic with elastic dampers on piston. Barrel with grooves allows mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder.

Options		
Description	Symbol	Suffix
Anti-rotating plate (available only for CD type, from Ø 16)		<b>N</b>
Rear spring (available only for CS type)		<b>T</b>
Male threaded rod		<b>M</b>
Through rod		<b>P</b>
FKM seals	-20°C ÷ +150°C 	<b>V</b>
ATEX versions on request		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see from page 1.17.4; For code key see from page 1.17.5

## Options matching

Series	Bore	Model	Standard options matching					
			N (Ø16÷100)	T	M	P	V	/ATEX
CS	Ø 12 ÷ 100	Standard	-	●	●	●	●	●
		Rear spring (T)	-		●	-	●	●
		Male threaded rod (M)	-	●		● <sup>1</sup>	●	●
		Through rod (P)	-	-	● <sup>1</sup>		●	●
CD	Ø 12 ÷ 100	Standard	●	-	●	●	●	●
	Ø 16 ÷ 100	Anti-rotating plate (N)		-	● <sup>1</sup>	●	●	●
	Ø 12 ÷ 100	Male threaded rod (M)	● <sup>1</sup>	-		● <sup>1</sup>	●	●
		Through rod (P)	●	-	● <sup>1</sup>		●	●

Key

● allowed matching; - not allowed matching

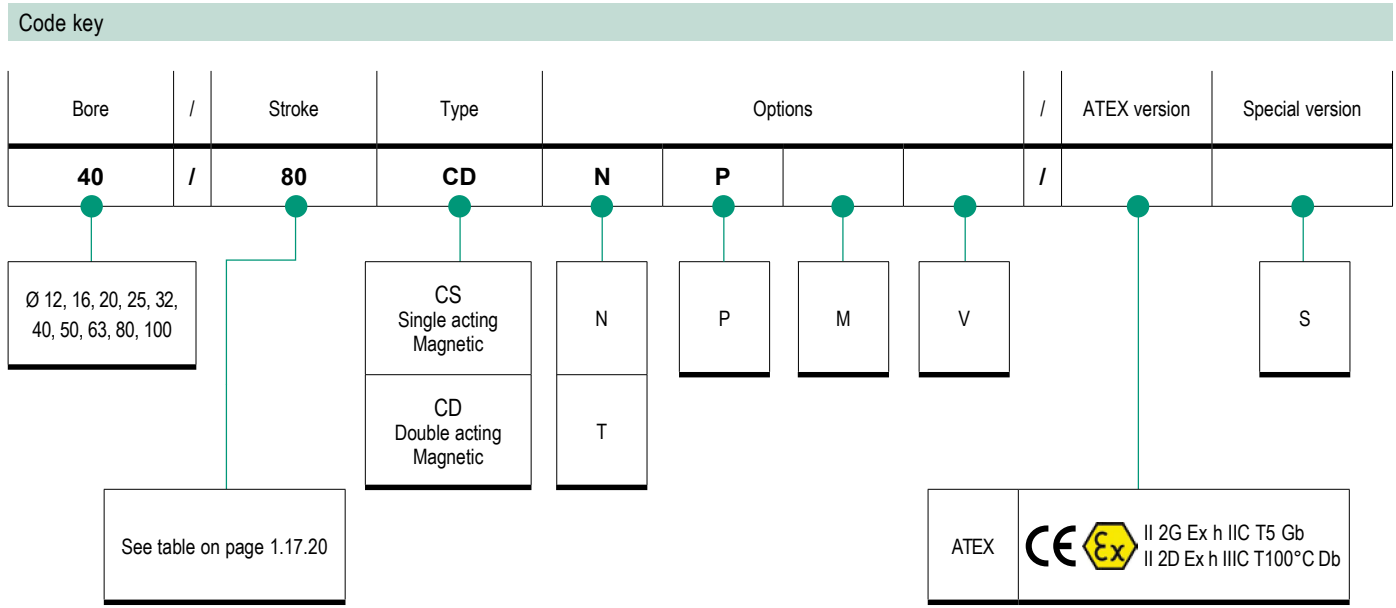

## Options matching - notes

(1) The male threaded rod (option **M**) in combination with through rod (option **P**) is applied on both sides of rod, except when combined with the anti-rotation plate (option **N**), in which case the male rod will only be applied on the side opposite the plate.

## Standard materials

Position	Description	Materials
1	Rod	Stainless Steel AISI 304
2	Heads	Anodised aluminium
3	Tube	Anodised aluminium
4	Piston	Aluminium
5	Seals	NBR / Polyurethane (PU)
-	Anti-rotating plate (option N)	Anodised aluminium

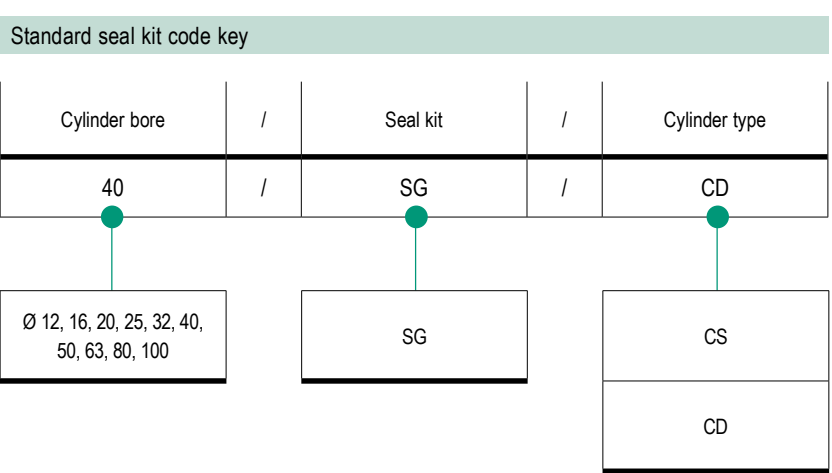

**Notes**

Options in the same grid are alternative to each others.  
 For further information on options and their matching, see page 1.17.3 and page 1.17.4  
 For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

**Standard\* seal kit**

Number of components	Description
n. 1	Rod seal
n. 2	Tube-head o-ring
n. 2	Piston seal

\*For cylinders with option P, the kit include further components

# COMPACT

## Cylinders

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of compact cylinders not conforming to standards, available in bores from Ø 6 to 32, double acting, magnetic or non magnetic. The barrel with grooves allows the magnetic versions to mount magnetic reed switches directly in the tube.  
Supplied as standard in compliance with Reach and RoHS directives.

### Type DU Ø 16 ÷ 32

from page 1.18.20

Compact cylinders not conforming to standards, available in bores from Ø 16 to 32, double acting, non magnetic.

### Type DUM Ø 6 ÷ 32

from page 1.18.20

Compact cylinders not conforming to standards, available in bores from Ø 16 to 32, double acting, magnetic.  
The barrel with grooves allows mounting magnetic reed switches directly.

## Options

Description	Symbol	Suffix
Anti-rotating plate (available from Ø 16)		<b>N</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching and code key, see the tables below.

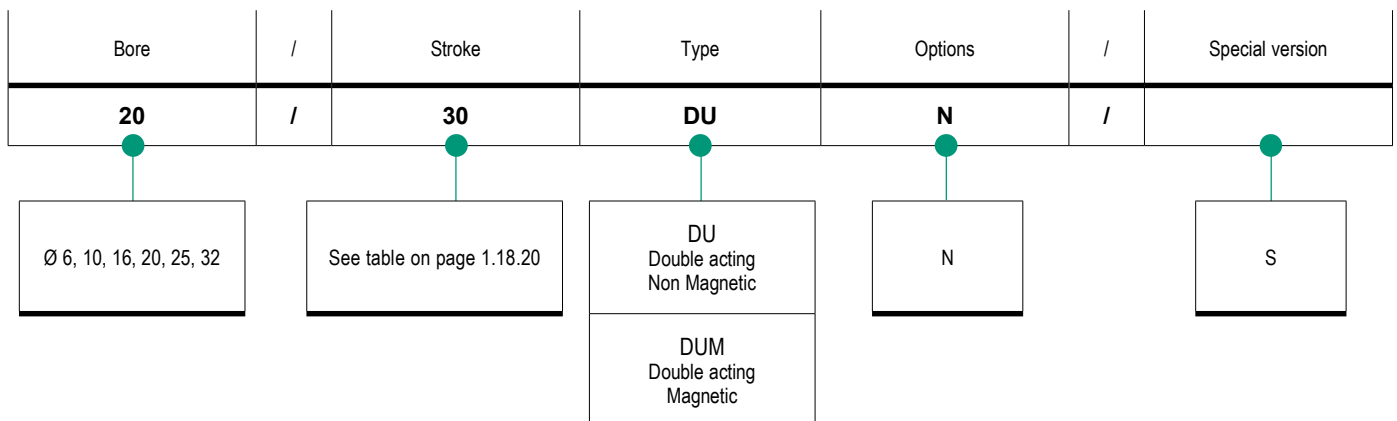

## Options matching

Series	Bore	Model	Standard options matching
			<b>N</b> (Ø16÷32)
DU	Ø 6 ÷ 32	Standard	●
	Ø 16 ÷ 32	Anti-rotating plate (N)	
DUM	Ø 6 ÷ 32	Standard	●
	Ø 16 ÷ 32	Anti-rotating plate (N)	

Key

● allowed matching; - not allowed matching

## Code key

## How to order

## Notes

For further information on options and their matching, see tables above.

# SHORT STROKE

## Cylinders

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of short stroke cylinders, available in bores from Ø 12 to 100, single acting or double acting, magnetic or non magnetic, with female thread. Up to bore Ø 100 with extruded aluminium profile barrel allowing the direct mounting of magnetic reed switches, and built-in mounting holes. Supplied as standard in compliance with Reach and RoHS directives, and SIL certificated. On request, they can be also supplied according to the 2014/34/EU ATEX Directive.

### Type BS Ø 12 ÷ 100

from page 1.20.20

Short stroke cylinders, available in bores from Ø 12 to 100, single acting, non magnetic, with female thread.  
Mounting holes are built-in the barrel.

### Type BSM Ø 12 ÷ 100

from page 1.20.20

Short stroke cylinders, available in bores from Ø 12 to 100, single acting, magnetic, with female thread and elastic dampers on the heads.  
Barrell present built-in mounting holes and grooves allowing the mounting of magnetic reed switches (with bracket to be ordered separately).

### Type BD Ø 12 ÷ 100

from page 1.20.40

Short stroke cylinders, available in bores from Ø 12 to 100, double acting, non magnetic, with female thread.  
Mounting holes are built-in the barrel.

### Type BDM Ø 12 ÷ 100

from page 1.20.40

Short stroke cylinders, available in bores from Ø 12 to 100, double acting, magnetic, with female thread and elastic dampers on the heads.  
Barrell present built-in mounting holes and grooves allowing the mounting of magnetic reed switches (with bracket to be ordered separately).

Options		
Description	Symbol	Suffix
Anti-rotating plate (available only for type BDM from Ø 20 to 100)		<b>N</b>
Rear spring (available only for type BS e BSM, from Ø 12 to 63)		<b>T</b>
Through rod (available from Ø 16 to 100)		<b>P</b>
FKM seals (available from Ø 16 to 100)	-20°C ÷ +150°C 	<b>V</b>
Stainless steel seeger for front head (from Ø 25 to 100)		<b>SGX</b>
ATEX versions on request		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see from page 1.20.4; For code key see from page 1.20.5

## Options matching

6	Seeger	Steel										
7	Seals	NBR										
8	Elastic dampers	NBR										

**Notes**

Options in the same grid are alternative to each others.  
 For further information on options and their matching, see page 1.20.3 e page 1.20.4

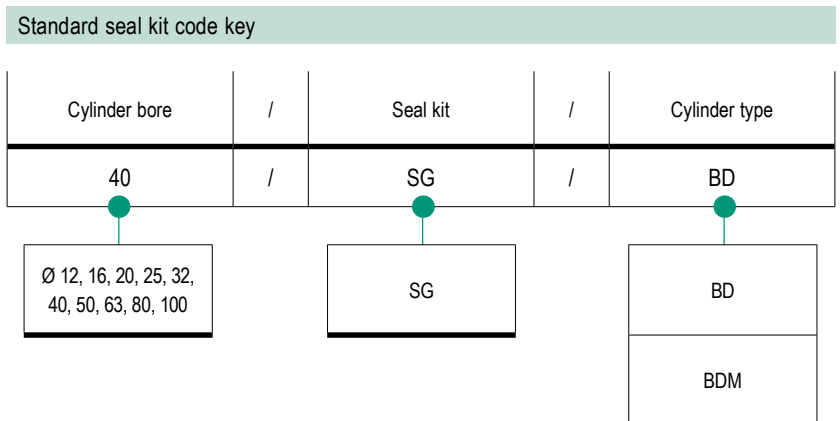

- (1) Available only for types BD and BDM from Ø 25 to 100
- (2) Available only for types BS and BSM from Ø 12 to 63
- (3) Available from Ø 16 to 100
- (4) Available from Ø 25 to 100

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

**Seal kit standard\***

Number of components	Description
n. 1	Rod seal
n. 2	Barrell o-ring
n. 1	Semipiston o-ring
n. 2	Piston seal
n. 2	Elastic dampers

\*For cylinders with options P or V, the kit include further components.

## Features and certifications

Series of cylinders with reduced overall dimensions, available in bores from  $\varnothing$  125 to 250, single acting or double acting, magnetic or non magnetic, with female thread. Made with round tube and tie-rods. Supplied as standard in compliance with Reach and RoHS directives, and SIL certified. On request, can be also supplied according to the 2014/34/EU ATEX Directive.

### Type CLS $\varnothing$ 125 ÷ 200

from page 1.21.20

Reduced overall dimension cylinders, available in bores from  $\varnothing$  125 to 200, single acting, non magnetic, with female thread, made with round tube and tie-rods.

### Type CLSM $\varnothing$ 125 ÷ 200

from page 1.21.20

Reduced overall dimension cylinders, available in bores from  $\varnothing$  125 to 200, single acting, magnetic, with female thread, made with round tube and tie-rods. Suitable for mounting magnetic reed switches on tie rods (with bracket to be ordered separately).

### Type CLD $\varnothing$ 125 ÷ 250

from page 1.21.40

Reduced overall dimension cylinders, available in bores from  $\varnothing$  125 to 250, double acting, non magnetic, with female thread, made with round tube and tie-rods.

### Type CLDM $\varnothing$ 125 ÷ 250

from page 1.21.40

Reduced overall dimension cylinders, available in bores from  $\varnothing$  125 to 250, double acting, magnetic, with female thread, made with round tube and tie-rods. Suitable for mounting magnetic reed switches on tie rods (with bracket to be ordered separately).

## Options

Description	Symbol	Suffix
Male threaded rod		<b>M1</b>
Anti-rotating plate (available only for type CLD and CLDM up to Ø 200)		<b>N</b>
Through rod (available only for type CLD and CLDM)		<b>P</b>
FKM seals <span style="float: right;">-20°C ÷ +150°C</span>		<b>V</b>
ATEX versions on request		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when possible, can be combined with each other. For options matching see from page 1.21.4; For code key see from page 1.21.5

Key

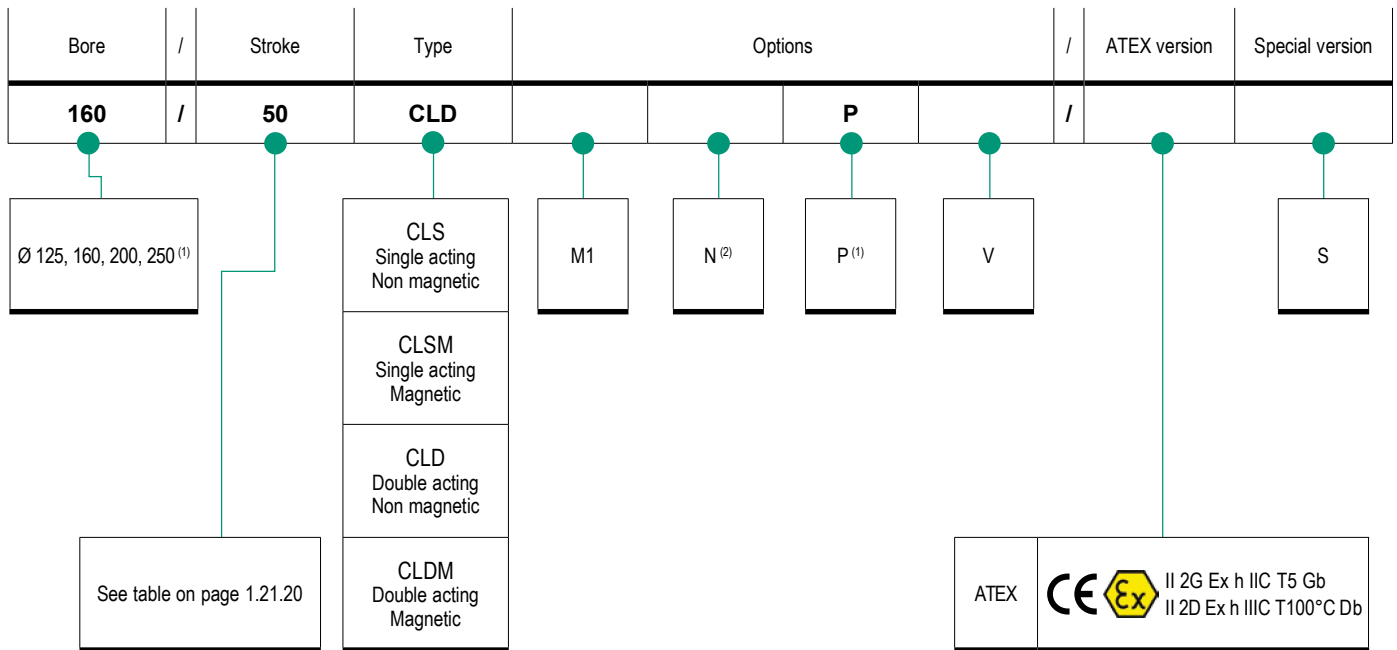

● allowed matching; - not allowed matching

## Option combinations - notes

**(1)** The male threaded rod (option **M1**) in combination with through rod (option **P**) is applied on both sides of rod, except when combined with the anti-rotation plate (option **N**), in which case the male rod will only be applied on the side opposite the plate.

## Code key

## How to order

## Notes

Options in the same grid are alternative to each others.

For further information on options and their matching, see page 1.21.3 and 1.21.4

For standard materials see page 1.21.3

(1) Available only for types CLD and CLDM

(2) Available only for types CLD and CLDM, up to Ø 200

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

## Seal kit standard\*

Number of components	Description
n. 1	Rod seal
n. 2	Barrell o-ring
n. 2	Piston seal
n. 2	Elastic dampers

\*For cylinders with option P or V, the kit include further components.

## Guided cylinders

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of compact guided cylinders, available in bores from  $\varnothing 6$  to 100, double acting, magnetic, with self-lubricating bushings or spherical bearings. Supplied as standard in compliance with Reach and RoHS directives. On request, type GEDB and GEDS can be also supplied according to the 2014/34/EU ATEX Directive.

### Type GEDB $\varnothing 6 \div 100$

from page 1.23.20

Compact guided cylinders, available in bores from  $\varnothing 6$  to 100, double acting, magnetic, with self-lubricating bushings.

The extruded body is machined with grooves allowing the mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder, and elastic dampers on front and end covers.

On request these cylinders can be supplied according to the ATEX Directive.

### Type GEDS $\varnothing 12 \div 100$

from page 1.23.20

Compact guided cylinders, available in bores from  $\varnothing 12$  to 100, double acting, magnetic, with spherical bearings.

The extruded body is machined with grooves allowing the mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder, and elastic dampers on front and end covers.

On request these cylinders can be supplied according to the ATEX Directive.

### Type GPB $\varnothing 12 \div 63$

from page 1.23.50

Compact guided cylinders, available in bores from  $\varnothing 12$  to 63, double acting, magnetic, with self-lubricating bushings.

Made of solid aluminium machined allow high torsion and lateral loads. Equipped with grooves for mounting magnetic reed switches directly, not protruding beyond the profile of the cylinder, and elastic dampers on front and end covers.

### Type GPS $\varnothing 12 \div 63$

from page 1.23.50

Compact guided cylinders, available in bores from  $\varnothing 12$  to 63, double acting, magnetic, with spherical bearings.

Made of solid aluminium machined allow high torsion and lateral loads. Equipped with grooves for mounting magnetic reed switches directly, not protruding beyond the profile of the cylinder, and elastic dampers on front and end covers.

Options			
Description		Symbol	Suffix

key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of twin rod cylinders, available in bores from  $\varnothing 6$  to 32, double acting, magnetic, with self-lubricating bushings or with spherical bearings. These cylinders are of double rod with double thrust force and smooth and precise operation. Supplied as standard in compliance with Reach and RoHS directives.

1 - CYLINDERS

### Type GSB $\varnothing 6 \div 32$

from page 1.24.20

Twin rod cylinders, available in bores from  $\varnothing 6$  to 32, double acting, magnetic, with self-lubricating bushings . These cylinders are double rod with double thrust force and smooth and precise operation. The extruded body is machined with grooves allowing the mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder, and elastic dampers on front and end covers.

### Type GSS $\varnothing 6 \div 32$

from page 1.24.20

Twin rod cylinders, available in bores from  $\varnothing 6$  to 32, double acting, magnetic, with spherical bearings. These cylinders are double rod with double thrust force and smooth and precise operation. The extruded body is machined with grooves allowing the mounting of magnetic reed switches directly, not protruding beyond the profile of the cylinder, and elastic dampers on front and end covers.

# RODLESS

## Cylinders

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of rodless cylinders, double acting, magnetic, available in bores from  $\varnothing$  18 to 63. Characterized by the absence of the rod and with a direct power transmission to the yoke, and equipped with newly developed adjustable dampers on both sides. The flow rate can be adjusted from 0 to 100% by turning a pin of an angle of  $90^\circ$ . The new barrel with huge deflection resistance, is provided with grooves for mounting various accessories. Magnetic reed switches can be mounted by a bracket or directly in the grooves, not protruding beyond the profile of the cylinder. Supplied as standard in compliance with Reach and RoHS directives.

1 - CYLINDERS

### Type S1 $\varnothing$ 18 ÷ 63

from page 1.26.20

Rodless standard cylinders, available in bores from  $\varnothing$  18 to 63, double acting, magnetic. Adjustable flow rate, dampers and newly developed tube.

### Type S2 $\varnothing$ 18 ÷ 63

from page 1.26.20

Rodless short standard cylinders, available in bores from  $\varnothing$  18 to 63, double acting, magnetic. In comparison with type S1, at 0 stroke, has reduced dimension around 42%, so the cylinder is more compact and economic, but suitable for lighter loads.

### Type S3 $\varnothing$ 18 ÷ 63

from page 1.26.40

Rodless guided cylinders, available in bores from  $\varnothing$  18 to 63, double acting, magnetic. The side carriage (which can also be mounted at a later date), is adjustable and allows the cylinder to be used with heavier loads than type S1 and S2. The guide moves by PTFE slides, fixed in the grooves of the barrel.

### Type S5 $\varnothing$ 18 ÷ 63

from page 1.26.40

Rodless short guided cylinders, available in bores from  $\varnothing$  18 to 63, double acting, magnetic. The side carriage (which can also be mounted at a later date), is adjustable and allows the cylinder to be used with heavier loads than type S1 and S2. The guide moves by PTFE slides, fixed in the grooves of the barrel. In comparison with type S3, at 0 stroke, has reduced dimension around 42%, so the cylinder is more compact and economic, but suitable for lighter loads.

### Type S6 $\varnothing$ 18 ÷ 63

from page 1.26.40

Rodless double guide cylinders, available in bores from  $\varnothing$  18 to 63, double acting, magnetic. The side carriages (which can also be mounted at a later date), are adjustable and allow the cylinder to be used with heavier loads than type S1, S2, S3 and S5. The guides move by PTFE slides, fixed in the grooves of the barrel.

### Type S4 $\varnothing$ 25 ÷ 63

from page 1.26.60

Rodless parallel cylinders, available in bores from  $\varnothing$  25 to 63, double effect, magnetic. With frontal and lateral yokes and wiper rings. Suitable for high loads and every-direction momentum. Double force and central air connections. If needed it's also possible mount (even at a later date), the lateral guides (special execution).

Options		
Description	Symbol	Suffix
Both ports on one head (available from Ø 25, not available for type S4)		<b>U</b>
Carriage with integral brake (available only for type S1)		<b>B</b>

The options, when this is possible, can be combined with each other. For options matching see the table below. Fod code key see page 1.26.4

Options matching

63	1680	180	590	1500	850	380	5	18	18

All data regarding the forces, refer to a speed of  $V \leq 0,35$  m/s.

Maintaining the indicated values will allow to optimize lifetime, noise and efficiency. Higher speeds greatly reduce allowable forces. If operating conditions are outside the allowable limits (see table above), the energy of the moving mass must be absorbed by appropriate devices (hydraulic decelerators, stops, and similar), mounted as close as possible to the mass center of gravity.

Maximum allowable deflections

With long strokes cylinders or heavy loads, you should pay attention to the tube deflection. One or more mid supports can be used according to the admissible deflection.

Example:  
When applying a force  $F_z = 500$  N to a cylinder 25 mm which could not deflect over 0,5 mm cannot be longer than 750 mm according to the diagram.  
Should you exceed 750 mm use one or more mid supports (for mid support see page 1.26.90).

63	1680	4200	4200	3700	1900	740	170	370	370

All data regarding the forces, refer to a speed of  $V \leq 0,35$  m/s.

Maintaining the indicated values will allow to optimize lifetime, noise and efficiency. Higher speeds greatly reduce allowable forces. If operating conditions are outside the allowable limits (see table above), the energy of the moving mass must be absorbed by appropriate devices (hydraulic decelerators, stops, and similar), mounted as close as possible to the mass center of gravity.

Maximum allowable deflections

With long strokes cylinders or heavy loads, you should pay attention to the tube deflection.

One or more mid supports can be used according to the admissible deflection.

Example:

When applying a force  $Fz = 500$  N to a cylinder 25 mm which could not deflect over 0,5 mm cannot be longer than 750 mm according to the diagram.

Should you exceed 750 mm use one or more mid supports (for mid support see page 1.26.90).

## Features and certifications

Series of rotary cylinders with rack and pinion, available in bores  $\varnothing 40$ , 63 and 80, double acting, magnetic, with  $90^\circ$  or  $180^\circ$  rotation angle. Equipped with adjustable cushionings, and with possibility to apply magnetic reed switches. Available in three configurations: male pinion, double male pinion or female pinion. Supplied as standard in compliance with Reach and RoHS directives.

1 - CYLINDERS

### Type CRTH $\varnothing 40 - 63 - 80$

from page 1.40.20

Rotary cylinders with male pinion, available in bores  $\varnothing 40$ , 63 and 80, double acting, magnetic, with  $90^\circ$  or  $180^\circ$  rotation angle. Equipped with adjustable cushionings, and with possibility to apply magnetic reed switches.

### Type CRTHD $\varnothing 40 - 63 - 80$

from page 1.40.20

Rotary cylinders with double male pinion, available in bores  $\varnothing 40$ , 63 and 80, double acting, magnetic, with  $90^\circ$  or  $180^\circ$  rotation angle. Equipped with adjustable cushionings, and with possibility to apply magnetic reed switches.

### Type CRTF $\varnothing 40 - 63 - 80$

from page 1.40.20

Rotary cylinders with female pinion, available in bores  $\varnothing 40$ , 63 and 80, double acting, magnetic, with  $90^\circ$  or  $180^\circ$  rotation angle. Equipped with adjustable cushionings, and with possibility to apply magnetic reed switches.

Wide availability

Fast delivery

## Features and certifications

Series of rotary vane cylinders, available in bores from Ø 4 to 25, double acting, with reduced overall dimensions. With fixed and adjustable rotation angles and equipped with elastic dampers (hydraulic shock absorbers in adjustable versions for bores from Ø 12 to 25) to relieve the impacts of vanes. Supplied as standard in compliance with Reach and RoHS directives.

### Type ARTM Ø 4 ÷ 10

from page 1.50.20

Rotary vane cylinders available in bores from Ø 4 to 10, double acting non-magnetic, with elastic dampers.  
Rotation angle: 90°, 180° or 270°.

### Type ARTMC Ø 4 ÷ 10

from page 1.50.20

Rotary vane cylinders available in bores from Ø 4 to 10, double acting magnetic, with elastic dampers.  
Rotation angle: 90°, 180° or 270°

### Type ARTML Ø 4 ÷ 10

from page 1.50.20

Rotary vane cylinders available in bores from Ø 4 to 10, double acting non-magnetic, with adjustable rotation angles and elastic dampers.  
Rotation angle: 90°, 180° or 270°

### Type ARTMLC Ø 4 ÷ 10

from page 1.50.20

Rotary vane cylinders available in bores from Ø 4 to 10, double acting magnetic, with adjustable rotation angles and elastic dampers.  
Rotation angle: 90°, 180° or 270°

### Type ARTMF Ø 4 ÷ 10

from page 1.50.40

Flanged rotary vane cylinders available in bores from Ø 4 to 10, double acting non-magnetic, with elastic dampers.  
Rotation angle: 90°, 180° or 270°.

### Type ARTMFC Ø 4 ÷ 10

from page 1.50.40

Flanged rotary vane cylinders available in bores from Ø 4 to 10, double acting magnetic, with elastic dampers.  
Rotation angle: 90°, 180° or 270°

Type ARTMFL Ø 4 ÷ 10

from page 1.50.40

Flanged rotary vane cylinders available in bores from Ø 4 to 10, double acting non-magnetic, with adjustable rotation angles and elastic dampers.  
Rotation angle: 90°, 180° or 270°

Type ARTMFLC Ø 4 ÷ 10

from page 1.50.40

Flanged rotary vane cylinders available in bores from Ø 4 to 10, double acting magnetic, with adjustable rotation angles and elastic dampers.  
Rotation angle: 90°, 180° or 270°

Type ARTM Ø 12 ÷ 25

from page 1.50.60

Rotary vane cylinders available in bores from Ø 12 to 25, double acting non-magnetic, with elastic dampers.  
Rotation angle: 90°, 180° or 270°.

Type ARTMC Ø 12 ÷ 25

from page 1.50.60

Rotary vane cylinders available in bores from Ø 12 to 25, double acting magnetic, with elastic dampers.  
Rotation angle: 90°, 180° or 270°

Type ARTML Ø 12 ÷ 25

from page 1.50.60

Rotary vane cylinders available in bores from Ø 12 to 25, double acting non-magnetic, with adjustable rotation angles and hydraulic shock absorbers.  
Rotation angle: 90°, 180° or 270°

Type ARTMLC Ø 12 ÷ 25

from page 1.50.60

Rotary vane cylinders available in bores from Ø 12 to 25, double acting magnetic, with adjustable rotation angles and hydraulic shock absorbers.  
Rotation angle: 90°, 180° or 270°

## Features and certifications

Series of rotary actuators, available in bores from Ø 10 to 63, double acting, magnetic. Supplied as standard in compliance with Reach and RoHS directives.

### Type ARC Ø 10 ÷ 63

from page 1.52.20

Rotary actuators with double rack, with rotation angles  $90^\circ \div 180^\circ$  and adjustment  $0^\circ \div 190^\circ$ . Double acting, magnetic, with grooves on the body allowing the direct mounting of magnetic reed switches. Equipped as standard with mechanical stoppers, on request these can be supplied with hydraulic shock absorbers.

### Type ARP Ø 15 ÷ 32

from page 1.52.50

Rotary actuators with piston and external mechanical stoppers. Rotation angles  $90^\circ$  and  $180^\circ$ . Double acting, magnetic, with grooves on the body allowing the direct mounting of magnetic reed switches. Equipped as standard with mechanical stoppers, on request these can be supplied with hydraulic shock absorbers.

## Options

## Features and certifications

Series of cartridge cylinders, available in bores from  $\varnothing 6$  to 16, single acting, with threaded body allowing a further adjustment of the end stroke position.  
Seal kit not available.  
Supplied as standard in compliance with Reach and RoHS directives.

### Type MCF $\varnothing 6 \div 16$

from page 1.55.20

Cartridge cylinders available in bores from  $\varnothing 6$  to 16, single acting, with threaded body (allowing a further adjustment of the end stroke position) and threaded rod.

### Type MCN $\varnothing 6 \div 16$

from page 1.55.20

Cartridge cylinders available in bores from  $\varnothing 6$  to 16, single acting, with threaded body (allowing a further adjustment of the end stroke position) and non-threaded rod.

## Features and certifications

Series of pneumatic hand grips available in bores from Ø 6 to 100, double acting, magnetic. Different type and configurations available. Supplied as standard in compliance with Reach and RoHS directives.

### Type PAB Ø 10 ÷ 32

from page 1.60.20

Angular hand grips available in bores from Ø 10 to 32, double acting (on request also single acting), magnetic, with grooves allowing the mounting of magnetic reed switches directly.

### Type PAC Ø 12 ÷ 32

from page 1.60.30

180° angular hand grips available in bores from Ø 12 to 32, double acting, magnetic, with grooves allowing the mounting of magnetic reed switches directly.

### Type PPB Ø 10 ÷ 32

from page 1.60.40

Parallel hand grips available in bores from Ø 10 to 32, double acting, magnetic, with grooves allowing the mounting of magnetic reed switches directly.

### Type PPC Ø 6 ÷ 40

from page 1.60.50

Guided parallel hand grips available in bores from Ø 6 to 40, double acting (on request also single acting), magnetic, with grooves allowing the mounting of magnetic reed switches directly.

### Type PPD Ø 10 ÷ 40

from page 1.60.60

Parallel hand grips with long stroke available in bores from Ø 10 to 40, double acting, magnetic, with grooves allowing the mounting of magnetic reed switches directly.

### Type PPE Ø 16 ÷ 100

from page 1.60.70

Hand grips with 3 fingers available in bores from Ø 16 to 100, double acting, magnetic, with grooves allowing the mounting of magnetic reed switches directly.

# SLIDE UNITS

for Cylinders

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of linear slide units for cylinders conforming to standard ISO 6432 and ISO 15552 possible to be fixed on four sides. These component are used with heavy loads to guarantee a better linearity of movement and an higher precision. Sometimes can be used as anti-rotating devices too. Available in three types with different features. The versions with spherical bearing slides better, but they can support lower loads than the versions with sintered bronze bushings. U-shaped versions, on the other hand, can support lower loads than the H-shaped. Supplied as standard in compliance with Reach and RoHS directives. On request they also can be supplied according to 2014/34/EU ATEX Directive.

### Slide Units for Cylinders ISO 6432 type UGLB

from page 1.70.10

U-shaped linear slide units with sintered bronze bushings, for cylinders ISO 6432, possible to be fixed on four sides. These component are used with heavy loads to guarantee a better linearity of movement and an higher precision. Sometimes can be used as anti-rotating devices too. On request they also can be supplied according to ATEX Directive.

### Slide Units for Cylinders ISO 6432 type UGPB

from page 1.70.10

H-shaped linear slide units with sintered bronze bushings, for cylinders ISO 6432, possible to be fixed on four sides. These component are used with heavy loads to guarantee a better linearity of movement and an higher precision. Sometimes can be used as anti-rotating devices too. On request they also can be supplied according to ATEX Directive.

### Slide Units for Cylinders ISO 6432 type UGPS

from page 1.70.10

H-shaped linear slide units with spherical bearings, for cylinders ISO 6432, possible to be fixed on four sides. These component are used with heavy loads to guarantee a better linearity of movement and an higher precision. Sometimes can be used as anti-rotating devices too.

### Slide Units for Cylinders ISO 15552 type UGLB

from page 1.70.20

U-shaped linear slide units with sintered bronze bushings, for cylinders ISO 15552, possible to be fixed on four sides. These component are used with heavy loads to guarantee a better linearity of movement and an higher precision. Sometimes can be used as anti-rotating devices too. On request they also can be supplied according to ATEX Directive.

### Slide Units for Cylinders ISO 15552 type UGPB

from page 1.70.20

H-shaped linear slide units with sintered bronze bushings, for cylinders ISO 15552, possible to be fixed on four sides. These component are used with heavy loads to guarantee a better linearity of movement and an higher precision. Sometimes can be used as anti-rotating devices too. On request they also can be supplied according to ATEX Directive.

### Slide Units for Cylinders ISO 15552 type UGPS

from page 1.70.20

H-shaped linear slide units with spherical bearings, for cylinders ISO 15552, possible to be fixed on four sides. These component are used with heavy loads to guarantee a better linearity of movement and an higher precision. Sometimes can be used as anti-rotating devices too.

Options	
Description	Suffix

# PISTON ROD-BRAKE

for Cylinders

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Series of piston rod-brake for cylinders conforming to standard ISO 6432 and ISO 15552, suitable for blocking the rod of the cylinder in the event of a pressure lack or pressure drop to the cylinder, or in those cases where a stop is necessary for a processing or handling. Supplied as standard in compliance with Reach and RoHS directives.

### Static piston rod-brake for cylinders ISO 6432

from page 1.75.10

Static piston rod-brake for cylinders conforming to standard ISO 6432. Can be supplied normally closed or normally open. The clamping forces are suitable for cylinder working pressure up to 8 bar and act in both directions. For the application of the piston rod-brake type ABS to a cylinder ISO 6432, the actuator must be ordered with the rod predisposed for this (extended rod in hardened and chrome plated steel, option B).

### Static piston rod-brake for cylinders ISO 15552

from page 1.75.20

Static piston rod-brake for cylinders conforming to standard ISO 15552. Can be supplied normally closed or normally open. The clamping forces are suitable for cylinder working pressure up to 8 bar and act in both directions. For the application of the piston rod-brake type ABS to a cylinder ISO 15552, the actuator must be ordered with the rod predisposed for this (extended rod in hardened and chrome plated steel, option B).

### Dynamic piston rod-brake for cylinders ISO 15552

from page 1.75.40

Dynamic piston rod-brake for cylinders conforming to standard ISO 15552. Can be supplied normally closed only. The peculiarity of this type ABK is to lock the piston rod while moving and to hold it still even in presence of pressure in the chamber. The special feature of the piston-rod brake type ABK is the absolute absence of axial movement and rotation of the cylinders' piston-rod. For the application of the piston rod-brake type ABK to a cylinder ISO 15552, the actuator must be ordered with the rod predisposed for this (extended rod in hardened and chrome plated steel, option B1).

## Technical data

Bore Ø (mm)	20	25
Fluid	Compressed filtered air with or without lubrication	
Pressure range	4 ÷ 8 bar	
Locking force (N)	300	400
Temperature range	-10°C ÷ +80°C	

**Warning:** working of piston rod-brake type ABS is static: before clamping is necessary to arrest the rod, is not usable for reducing the speed of the rod while moving. The locking-rod unit must only be unlocked when the pressures of both chambers of the cylinder are balanced, or the rod of the cylinder could move with non-uniform motion, causing problems to the application.

Wide availability

Fast delivery

## Features and certifications

Rod accessories for cylinders. Wide range of accessories for the cylinder piston rod to allow the choice of the most appropriate mounting. All rod accessories are supplied in compliance with Reach and RoHS directives.

### Clevis ISO

from page 1.85.10

Series of female clevis conforming to ISO 8140 standard for mounting onto the male piston rod of the cylinder.

### Clevis UNI e DIN

from page 1.86.1

Series of female clevis conforming to UNI 1676 and DIN 71752 standard for mounting onto the male piston rod of the cylinder.

### Clevis CNOMO

from page 1.87.1

Series of female and male clevis conforming to CNOMO standard for mounting onto the male piston rod of the cylinder.

### Clevis with male thread

from page 1.88.1

Series of female clevis with male thread conforming to UNI 1676 and DIN 71752 standard.

### Bearing heads

from page 1.90.1

Bearings. Self-lubricating bearing heads (DIN 648K) servicing-free and conforming to ISO 8139 standard. Available with female thread or with male thread.

### Self-aligning articulated coupling

from page 1.90.10

Bearings. Self-aligning articulated coupling. Supplied with hexagonal nut. For mounting onto the male piston rod of the cylinder. Allow to compensate the angular and parallel misalignments. Suitable for applications with high tractions.

## Axial articulated couplings

from page 1.90.20

Bearings. Axial articulated couplings for mounting onto the male piston rod of the cylinder. Allow to compensate the angular and parallel misalignments.

## Angle articulated couplings

from page 1.90.30

Bearings. Angle articulated couplings for mounting onto the male piston rod of the cylinder. Allow to compensate the angular misalignments.

## Self-aligning coupling

from page 1.90.40

Couplings. Self-aligning articulated coupling for mounting onto the male piston rod of the cylinder. Allow to compensate the angular and parallel misalignments.

## Rod nipples

from page 1.90.60

Rod nipple. for mounting onto the female piston rod of the cylinder.

## Rod nuts

from page 1.90.70

Rod nut conforming to UNI 5589 and DIN 936 standard. For mounting onto the male piston rod of the cylinder.

## Features and certifications

Series of mounting accessories for cylinders. For front, rear or center mounting, or with others accessories (e.g.: hinges), to allow the choice of the most appropriate mounting. All mounting accessories are supplied in compliance with Reach and RoHS directives.

### Steel mountings for cylinders ISO 6432 from page 1.95.1

Mountings for cylinders ISO 6432. Rear clevises ISO MP3, flanges ISO MS3 and high feet ISO MF8 in steel, white zinc plating treatment.

### Steel mountings for round cylinders from page 1.96.1

Mountings for round cylinders from bore 32 to bore 63. Rear clevis, foot-hinges, foot-flanges, pins and head nuts in steel, white zinc plating treatment.

### Aluminium mountings for cylinders ISO 15552 from page 1.97.1

Mountings for cylinders ISO 15552. Rear female clevises ISO MP2, rear eyes ISO MP4, Narrow rear clevises ISO AB6 and narrow rear eyes ISO MP6 with DIN 648K bearing, front clevises ISO MP7, flanges ISO-VDMA MF1/MF2, rear 90° hinges ISO AB7 CETOP RP107P and ISO 6431, in die-cast aluminium, sifting treatment.

### Steel mountings for cylinders ISO 15552 from page 1.98.1

Mountings for cylinders ISO 15552. Rear female clevises ISO MP2, rear eyes ISO MP4, narrow rear female clevises ISO AB6 and narrow rear eye ISO MP6 with DIN 648K bearings, flanges ISO-VDMA MF1/MF2, rear 90° hinges ISO AB7 CETOP RP107P and ISO CS7 with DIN 648K bearings, low feet ISO MS1, pins ISO AA4 and ISO AA6, center trunnions ISO MT4 and ISO MT5/MT6, in AVP steel, in Fe 37 or in A105 steel, black cataphoresis or white zinc plating treatment.

### Aluminium mountings for cylinders CNOMO from page 1.99.1

Mountings for cylinders CNOMO. Rear female clevises, rear standard hinges, rear 90° hinges and high feet in die cast aluminium, sifting treatment.

### Steel mountings for cylinders CNOMO from page 1.99.50

Mountings for cylinders CNOMO. Flanges, low feet, pins and center trunnion in AVP steel, in Fe 37 or in A105 steel, white zinc plating treatment.

### Aluminium mountings for compact cylinders ISO 21287 from page 1.100.1

Mountings for compact cylinders ISO 21287. Rear female clevis ISO MP2, rear male eye ISO MP4, narrow rear female clevises ISO AB6 and narrow rear male eye ISO MP6 with DIN 648K bearings, front clevises ISO MP7, flanges ISO-VDMA MF1/MF2, rear 90° hinges ISO AB7 CETOP RP107P and ISO 6431 in die cast aluminium, sifting treatment.

### Steel mountings for compact cylinders ISO 21287 from page 1.100.50

Mountings for compact cylinders ISO 21287. Rear female clevis ISO MP2, rear male eye ISO MP4, narrow rear female clevises ISO AB6 and narrow rear male eye ISO MP6 with DIN 648K bearings, flanges ISO-VDMA MF1/MF2, rear 90° hinges ISO AB7 CETOP RP107P and ISO CS7 with DIN 648K bearings, low feet ISO MS1, pins ISO AA4 and ISO AA6, center trunnion ISO MT5/MT6, in AVP steel, in Fe 37 or in A105 steel, black cataphoresis or white zinc plating treatment.

## Aluminium mountings for compact cylinders UNITOP

from page 1.100.100

Mountings for compact cylinders UNITOP. Rear female clevises ISO MP2, rear eyes ISO MP4, flanges and rear 90° hinges ISO AB7 CETOP RP107P in die cast aluminium, sifting treatment.

## Steel mountings for compact cylinders UNITOP

from page 1.100.150

Mountings for compact cylinders UNITOP. Rear female clevises ISO MP2, rear eyes ISO MP4, low feet, flanges and rear 90° hinges ISO AB7 CETOP RP107P in A105 steel A105, Fe 37, black cathoresis treatment or white zinc plating treatment.

## Aluminium mountings for short stroke cylinders

from page 1.100.200

Mountings for short stroke cylinders. Integrated rear male eye and feet in aluminium.

## Aluminium mountings for rodless cylinders

from page 1.100.250

Mountings for rodless cylinders. Feet, mid support, end supports and flexible coupling in aluminium.

## Mountings for hand grips

from page 1.100.350

Mountings for hand grips. Male and female in aluminium, plates in Stainless Steel.

## Connecting bracket for slide units

from page 1.100.400

Connecting bracket for rods of slide units for cylinders ISO 15552.

## Mounting screws, nuts e growers in steel for cylinders

from page 1.101.1

Mounting elements for cylinders. Scews conforming to UNI5931 standards, nuts conforming to UNI5589 and DIN 936 standards, growers conforming to DIN 127B standards, in steel.

Type	Description	Material	Treatment
CTN..AQC	Mounting for cylinders in steel. Non adjustable center trunnion (threaded). With mounting this accessory, quote T of tie-rods (see page 1.14.21 o 1.14.41) is equal 0 in every bore. For trunnion mounted on the cylinder, please order together with the cylinder, indicating the XV dimension (cannot be modified). Support type ST..AQIS to be ordered separately, see page 1.99.53	A105 steel	White zinc plating

# ADJUSTABLE

shock absorbers

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Characteristics

Series of adjustable hydraulic shock absorbers de-energising the impact on the rod by the displacement of oil from one chamber to another. This displacement is controlled by a valve and a throttling mechanism according to the adjustment brought in. The adjustment is carried out by a nut set in the rear end. The adjusting field is from 0 to 9 and the nut is provided with a stopper grub screw. The optimal cushion is obtained moving the nut towards 9 if the cushion is too high at the beginning of the stroke; while moving the nut towards 0 if the cushion is too high near the end of the stroke.

The best choice of the shock absorber could be done easily following the instructions on the side page.  
Supplied as standard in compliance with Reach and RoHS directives.

## Type DR

from page 1.105.10

Adjustable hydraulic shock absorbers without mechanical stop. Is recommended an external mechanical stopper at 0,5 - 1 mm, before the end of the stroke.

## Type DRF

from page 1.105.10

Adjustable hydraulic shock absorbers with mechanical stopper included.

## How to choose

- Precisely determine the data of the problem, that is the calculation factors  $m$ ,  $v$ ,  $F$ ,  $x$ ,  $s$ , in the table below.
- Calculate the kinetic energy of the mass:  

$$W_1 = 0,5 \cdot m \cdot v_2 \text{ (Nm)}$$
 Choose a cushioning with a capacity per cycle higher than the calculated value. The cushion length chosen must be used at point 3).
- If there is an external motion force (hydraulic or pneumatic cylinder, motor, gravity, etc.) calculate the work done:  

$$W_2 = F \cdot s \text{ (Nm)}$$
- Calculate the total energy that must be dissipated per cycle:  

$$W_3 = W_1 + W_2 \text{ (Nm)}$$
 Check that the value obtained is within the capacity limits of the chosen cushioning. Otherwise you must consider a cushioning with higher cushion length or diameter and in case calculate  $W_2$  and  $W_3$  again.  
 It can be necessary to compare cushionings with different cushion lengths and calculate again each time.
- It is better to choose a cushioning with a capacity 25 per cent higher than the required one in order to:
  - let following possible increases of the impact energy;
  - Work with safe margins when velocities are not easily valuable;
  - make sure that the cushioning lasts long, especially when working in dusty or contaminated environments.

- Calculate the efficiency measurement:

$$ME = \frac{W_3 \cdot 2}{V_2} \text{ (Kg)}$$

Check that the value obtained is within the limits indicated for the chosen cushioning and this to get a linear and progressive cushion.

- Were the "ME" out of the limits, you should choose a cushioning with a different capacity of efficiency measurement.
- Varying the cushion length you can change the "ME"; however, at each variation of the cushion length you must remember to calculate the propelling energy of the point 3 again.  
 Check whether the cushioning is condition to dissipate the energy generated by work frequency per hour into heat:  

$$W_4 = W_3 \cdot X \text{ (Nm/h)}$$
- Were the cushioning not in condition to dissipate it, you should choose among:
  - use of a cushioning with a higher capacity per hour taking care of calculating the point 3 again (were the cushion length different);
  - Use of a system with recirculation or external air/oil tank, both characterised by a higher capacity per hour;
  - cooling of the cushioning by air blow or another refrigerating fluid.

## Factors

## Symbol

<b>W1</b>	= Kinetic energy per cycle	(Nm)
<b>W2</b>	= Motion energy per cycle	(Nm)
<b>W3</b>	= Total energy per cycle	(Nm)
<b>W4</b>	= Total energy per hour	(Nm/h)
<b>F</b>	= Motion force	(N)
<b>x</b>	= Number of cycles per hour	(1/h)
<b>s</b>	= Cushioning length	(m)
<b>v</b>	= Mass speed	(m/s)
<b>m</b>	= Cushioned mass	(Kg)
<b>ME</b>	= Efficiency measurement	(Kg)

The shock absorbers are selected according to their energy absorbing capacity. The capacity values identify both the mass that can be cushioned and the energy that can be absorbed per cycle and hour.  
 So the required performances must be compared with the table of the cushionings capacities to make sure that the energy can be absorbed, converted into heat and dissipated in the atmosphere.

## Energy

The factors that must be considered at the moment of selection are:

- Kinetic energy (**W<sub>1</sub>**): it is the energy generated by the weight and the velocity of the mass that must be cushioned.
- Motion energy (**W<sub>2</sub>**): it is the work, produced by the motion force acting on the mass that must be cushioned, multiplied by the cushion length.
- Total energy per cycle (**W<sub>3</sub>**): it is the sum of the 2 preceding values and is the energy that must be dissipated every cycle.
- Total energy per hour (**W<sub>4</sub>**): it is the product of the total energy per cycle by the number of cycles per hour; so it is the energy the cushioning must dissipate every hour.
- Efficiency measurement (**ME**): it is the mass (theoretical), which, without motion force and at the same velocity of the real mass, would have a kinetic energy equal to the total energy per cycle (**W<sub>3</sub>**) of the real application. It is not the mass that must be cushioned; it doesn't indicate the power supported by the cushioning.

# MAGNETIC

## Reed Switches and Brackets

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

The magnetic reed switches are magnetic sensors responding to the presence of a magnetic field. When mounted on a cylinder tube they detect the presence of the magnetic field generated by the magnet set on the piston. This information is used to signal electrical circuits as required. In this chapter is also possible to find cables with M8 connector and brackets for mountings of the magnetic reed switches on the cylinders.

### Series ASV

from page 1.110.10

Series of magnetic reed switches for cylinders, for direct mounting in the suitable housings ("T" grooves) or through brackets.

### Series ASC

from page 1.110.30

Series of magnetic reed switches for cylinders, for direct mounting in the suitable housings ("C" grooves).

### Series ASH

from page 1.111.1

Series of high-temperatures magnetic reed switches for cylinders, for mounting through brackets.

### Series MK

from page 1.113.1

Series of magnetic reed switches for cylinders, according to 2014/34/EU ATEX Directive, for direct mounting in the suitable housings ("T" grooves) or through brackets.

### Series CAV

from page 1.115.1

Series of cables with M8 connector, for magnetic reed switch with matching outlet.

### Series AFM - AFR - AS..

from page 1.120.1

Series of brackets which allow the mounting on cylinders of the magnetic reed switches type "T".

# Magnetic Reed Switches and Brackets

Magnetic reed switches series ASV

## Symbol

## Main features

Code	Item	Description
070946	ASV1C525	Magnetic reed switches for direct mounting in T groove (or through bracket).
071863	ASV1C550	Reed 2 poles normally open circuit, with flying lead.
071864	ASV1C51K	

## Technical data

Type	ASV1C525	ASV1C550	ASV1C51K
Circuit	Reed		
Poles	2 poles		
Switching	Normally Open		
Voltage	5÷240 V DC/AC		
Switching current	100 mA max		
Contact rating	10 W		
Voltage drop	3 V max		
LED	Red		
Electrical connection	Flying lead		
Cable	Gray polyurethane, Ø 3,3		
Cable length	2,5 mt.	5 mt.	10 mt.
Temperature range	-10°C ÷ +70°C		
Protection class	IEC 529 IP67		

## Symbol

## Main features

Code	Item	Description
071189	ASV1C5M8	Magnetic reed switches for direct mounting in T groove (or through bracket). Reed 2 poles normally open circuit, with M8 connector.

## Technical data

Type	ASV1C5M8
Circuit	Reed
Poles	2 poles
Switching	Normally Open
Voltage	5÷240 V DC/AC
Switching current	100 mA max
Contact rating	10 W
Voltage drop	3 V max
LED	Red
Electrical connection	M8 connector
Cable	Gray polyurethane, Ø 3,3
Cable length	-
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67

# Magnetic Reed Switches and Brackets

Magnetic reed switches series ASV

1 - CYLINDERS

## Symbol

## Main features

Code	Item	Description
073639	ASV4D225	Magnetic reed switches for direct mounting in T groove (or through bracket). Reed PNP 3 poles normally open circuit, with flying lead.

## Technical data

Type	ASV4D225
Circuit	Reed, PNP
Poles	3 poles
Switching	Normally Open
Voltage	10÷30 V DC
Switching current	100 mA max
Contact rating	3 W max
Voltage drop	0,1 V max
LED	Yellow
Electrical connection	Flying lead
Cable	Gray polyurethane, Ø 3,3
Cable length	2,5 mt.
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67

## Symbol

## Main features

Code	Item	Description
070246	ASV4D2M8	Magnetic reed switches for direct mounting in T groove (or through bracket). Reed PNP 3 poles normally open circuit, with M8 connector.

## Technical data

Type	ASV4D2M8
Circuit	Reed, PNP
Poles	3 poles
Switching	Normally Open
Voltage	10÷30 V DC
Switching current	100 mA max
Contact rating	3 W max
Voltage drop	0,1 V max
LED	Yellow
Electrical connection	M8 connector
Cable	Gray polyurethane, Ø 3,3
Cable length	-
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67

# Magnetic Reed Switches and Brackets

Magnetic reed switches series ASV

## Symbol

## Main features

Code	Item	Description
070247	ASV7N2M8	Magnetic reed switches for direct mounting in T groove (or through bracket). Reed-Hall PNP 3 poles normally open circuit (solid state output), with M8 connector.

## Technical data

Type	ASV7N2M8
Circuit	Reed-Hall, PNP
Poles	3 poles
Switching	Normally Open solid state output
Voltage	10÷30 V DC
Switching current	100 mA max
Contact rating	3 W max
Voltage drop	2 V max
LED	Giallo
Electrical connection	M8 connector
Cable	Gray polyurethane, Ø 3,3
Cable length	-
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67

## Symbol

## Main features

Code	Item	Description
070372	ASV7M2M8	Magnetic reed switches for direct mounting in T groove (or through bracket). Reed-Hall NPN 3 poles normally open circuit (solid state output), with M8 connector.

## Technical data

Type	ASV7N2M8
Circuit	Reed-Hall, NPN
Poles	3 poles
Switching	Normally Open solid state output
Voltage	10÷30 V DC
Switching current	100 mA max
Contact rating	3 W max
Voltage drop	2 V max
LED	Red
Electrical connection	M8 connector
Cable	Gray polyurethane, Ø 3,3
Cable length	-
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67

# Magnetic Reed Switches and Brackets

Magnetic reed switches series ASV

## Symbol

## Main features

Code	Item	Description
072918	ASV1H525	Magnetic reed switches for direct mounting in T groove (or through bracket). Reed 2 poles normally closed circuit, with flying lead.

## Technical data

Type	ASV1H525
Circuit	Reed
Poles	2 poles
Switching	Normally Closed
Voltage	5÷120 V DC/AC
Switching current	100 mA max
Contact rating	10 W
Voltage drop	3,5 V max
LED	Yellow
Electrical connection	Flying lead
Cable	Gray polyurethane, Ø 3,3
Cable length	2,5 mt.
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67

# Magnetic Reed Switches and Brackets

Magnetic reed switches series ASC

## Symbol

## Main features

Code	Item	Description
070248	ASC1C525	Magnetic reed switches for direct mounting in C groove. Reed 2 poles normally open circuit (SPST), with flying lead.

## Technical data

Type	ASC1C525
Circuit	Reed
Poles	2 poles
Switching	Normally Open - SPST
Voltage	5÷120 V DC/AC
Switching current	100 mA max
Contact rating	6 W max
Voltage drop	3,5 V max
LED	Red
Electrical connection	Flying lead
Cable	Gray polyurethane, Ø 2,8
Cable length	2,5 mt.
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67
Electrical protection	-

## Symbol

## Main features

Code	Item	Description
070249	ASC7N2M8	Magnetic reed switches for direct mounting in C groove. Reed-Hall PNP 3 poles normally open circuit (solid state output), with M8 connector.

## Technical data

Type	ASC7N2M8
Circuit	Reed-Hall, PNP
Poles	3 poles
Switching	Normally Open solid state output
Voltage	5÷28 V DC
Switching current	100 mA max
Contact rating	3 W max
Voltage drop	0,5 V max (50 mA)
LED	Green
Electrical connection	M8 connector
Cable	Black PVC, Ø 2,8
Cable length	-
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67
Electrical protection	Reverse polarity - Source suppression

# Magnetic Reed Switches and Brackets

Magnetic reed switches series ASC

## Symbol

## Main features

Code	Item	Description
070382	ASC7M2M8	Magnetic reed switches for direct mounting in C groove. Reed-Hall NPN 3 poles normally open circuit (solid state output), with M8 connector.

## Technical data

Type	ASC7M2M8
Circuit	Reed-Hall, NPN
Poles	3 poles
Switching	Normally Open solid state output
Voltage	5÷28 V DC
Switching current	100 mA max
Contact rating	3 W max
Voltage drop	0,5 V max (50 mA)
LED	Red
Electrical connection	M8 connector
Cable	Black PVC, Ø 2,8
Cable length	-
Temperature range	-10°C ÷ +70°C
Protection class	IEC 529 IP67
Electical protection	Reverse polarity - Source suppression

# Magnetic Reed Switches and Brackets

## High-temperatures magnetic reed switches series ASH

### Symbol

### Main features

Code	Item	Description
074047	ASH6C550	High-temperatures magnetic reed switches for mounting through bracket. Reed 2 poles normally open circuit, with flying lead.

### Technical data

Type	ASH6C550
Circuit	Reed
Poles	2 poles
Switching	Normally Open
Voltage	5 ÷ 240 V DC/AC
Switching current	500 mA max
Contact rating	10 W
Voltage drop	0,5 V max
Electrical connection	Flying lead
Cable	Black PTFE, Ø 3, 2C
Cable length	5 mt.
Temperature range	-10 °C ÷ +140°C
Protection class	IEC 529 IP67

# Magnetic Reed Switches and Brackets

ATEX magnetic reed switches series MK

1 - CYLINDERS

## Symbol

## Main features

Code	Item	Description
071120	MK500A	Magnetic reed switches conforming to 2014/34/UE ATEX Directive, for direct mounting in T groove (or through bracket). PNP 3 poles circuit, with reverse polarity protection, short-circuit protection and overload-resistant, with flying lead.

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

## Technical data

Type	MK500A
Electrical design	PNP
Operating voltage	10 ± 30 V DC
Current consumption	≤10 mA
Protection class	III
Power-on delay time	< 30 ms
Voltage drop	< 2,5 V
Current rating	100 mA
Switching frequency	10000 Hz
Magnetic sensitivity	2,8 mT
Travel speed	> 10 m/s
Hysteresis	< 1,5 mm
Repeatability	< 0,2 mm
Temperature range	-25°C ÷ +60°C
Protection	IP65 / IP67
LED	Yellow
Cable	Black PVC, Ø 3x0.14mm <sup>2</sup>
Cable length	2 mt.
Weight	59,4 g

## Symbol

## Main features

Code	Item	Description
071108	MK502A	Magnetic reed switches conforming to 2014/34/UE ATEX Directive, for direct mounting in T groove (or through bracket). 2 poles circuit, certified connection to intrinsically safe electrical circuits, with flying lead.

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

## Technical data

Type	MK502A
Electrical design	NAMUR
Operating voltage	8,2 V DC
Current consumption	≥ 2,2 mA
Protection class	III
Switching frequency	2000 Hz
Magnetic sensitivity	2 mT
Travel speed	> 10 m/s
Hysteresis	< 1 mm
Repeatability	< 0,2 mm
Temperature range	-25°C ÷ +70°C
Protection	IP65 / IP67
LED	Yellow
Cable	Blue PVC, Ø 3x0.14mm <sup>2</sup>
Cable length	2 mt.
Weight	93,9 g

# Magnetic Reed Switches and Brackets

Cables with M8 connector series CAV

## Compliance

CAV

Type

## Main features

Code	Item	Description
070269	CAV20M8	Cable, 2 mt. with M8 connector
070250	CAV50M8	Cable, 5 mt. with M8 connector
070298	CAV1KM8	Cable, 10 mt. with M8 connector

## Technical data

Type	CAV20M8	CAV50M8	CAV1KM8
Cable	3 x 24 AWG / 0,22 mm <sup>2</sup> flexible, spatter resistant, oil resistant		
Cable insulation	300 V		
Cable length	2 mt.	5 mt.	10 mt.
Electrical connection	M8 connector		
Temperature range	-20°C ÷ +80°C		
Protection class	IP 67		

## Materials

Description	Material
Cable	Black PVC
Connector body	Polypropylene
Connector contacts	Gilded brass
Connector nut	Nickel-plated brass

# VALVES

## CHAPTER 2

General informations

Valves technical features

page 2.1.1

Control valves conforming to standards

Series		Type	Page
Valves ISO 5599/1 solenoid operated		ISO1E, ISO1K, ISO1EL, ISO1KL, IOS2E, ISO2K	2.90.1
Valves ISO 5599/1 air operated		ISO1P, ISO2P	2.100.1
Sub-bases for valves ISO 5599/1		SBA1S, SBA1M, SBA2S, SBA2M	2.107.1
NAMUR valves solenoid operated		A1NE	2.44.1
NAMUR valves air operated		A1NP	2.50.1
Mounting plates for NAMUR valves		PSN	2.56.1
Solenoid operated valves, ATEX coils and connectors		Conforming to 2014/34/EU ATEX Directive in different classifications	2.320.1

Control valves not conforming to standards

Series		Type	Page
15 mm directly operated solenoid valves		AE05A, AE05C	2.5.1
Bases for 15 mm directly operated solenoid valves		ABAS05	2.6.1
22 mm directly operated solenoid valves		A1EM, A1E1..MD, A1E2..MD	2.10.1
Solenoid operated valves series A1		A1E1, A1K1, A1E2, A1K2, A1E4, A1K4	2.20.1
Air operated valves series A1		A1P1, A1P2, A1P4	2.30.1
Sub-bases for valves series A1		A1B1, A1B2	2.38.1
Plates for valves series A1		PSV	2.39.1
Solenoid valves with multipole connector series A2		A2	2.60.1
Bases and accessories for valves series A2		A2B, A2I, A2E, A2PC, A2T, A2S, SD	2.61.1
Indirectly operated solenoid valves for water and steam		AEN22, AEV22, AEP22	2.120.1
Integrated circuits		AEF, APF, AEC, AEC	2.130.1

Coils and connectors

Series		Type	Page
Coils		ASA12, ASA2, ASA33, ASA32, ASA34	2.315.1
Connectors		A192, A122, A182	2.318.1

Manual and mechanical valves

Series		Type	Page
Manual lever operated valves series A1		A1MA1..LL, A1MA1..LT, A1MA1..TT, A1MA2..LL, A1MA2..LT, A1MA2..TT	2.150.1
Manual button operated valves series A1		A1MA1..F, A1MA1.B, A1MA1..S	2.160.1
Foot operated valves		AVP	2.170.1
Microvalves Ø4		AM04	2.180.1
Manual operating devices		AP11, AP21, AP22, AP32, AP33, AP42, AP53	2.180.1
Mechanical operated valves		AC..04, AC..18, A1ME1..ANT, A1ME1..RLB, A1ME1..RLBR	2.200.1

Ancillary valves page 2.250.1

Series		Type	Page
Slide valves		V26	2.251.1
Miniature valves from brass hexagonal bar		MVS	2.253.1
Miniature valves with cast body		MS	2.254.1
Ball valves full bore		VLSO	2.256.1
Quick exhaust valves		VSR, VSRM	2.260.1
Unidirectional valves		FF	2.263.1
Safety valves		VC	2.265.1

Actuators

Series		Type	Page
Rotary actuators		AR..SE, AR..DE	2.400.1
Ball valves with rotary actuator		VSO..SE, VSO..DE, VSI..SE, VSI..DE	2.410.1
Limit switch box for actuators		SB200, SB200/Exia, SB500, SB700	2.425.1
Handweel gearbox for actuators		GDB	2.425.1
Speed regulators for actuators and NAMUR valves		APNRSR, APNRDA, PNF	2.430.1

Flow of the valves

The quantity of compressed air that can flow through the valve depends on the size of the orifices and the type of course that must be followed within the valve itself by the fluid under pressure.

The flow of a valve is measured using suitable measuring circuits with the hypothesis that the upstream pressure is constant and that quantity of air required downstream is variable.

Flow characteristics

Curves known as “flow characteristic” are drawn, which indicate how the flow of the valve varies with the variation in downstream pressure, with a constant pressure supply. Once these characteristics are known, the flow of the valve is also known in all working conditions.

These curves show how the study model adopted for a valve - which consists of comparing it with a converging nozzle that releases a compressible gas with constant upstream pressure - is reasonably valid. Indeed, according to this model, the flow that passes through the nozzle depends on the following factors: the upstream pressure, the difference in pressure  $\Delta p$  and the valvular coefficient  $K_v$ .

The coefficient  $K_v$  summarizes the characteristics of the internal passages of the valve and is represented by the “number of litres of water that flow through the valve in one minute, in normal conditions (atmospheric pressure, 20 °C) in the presence of a fall in pressure  $\Delta p = 1$  bar.

2 - VALVES

Formula for calculating the flow rate

The following formula constitutes the relationship between all the aforementioned elements:

$$Q = 28,3 K_v \sqrt{\Delta p (p_1 - \Delta p)} \quad \text{where:}$$

$Q$  = flow [nl/min]  
 $K_v$  = valvular coefficient of the H2O valve [nl/min]  
 $\Delta p$  =  $p - p_2$  = fall in pressure between upstream and downstream [bar]  
 $p_1$  = absolute pressure upstream [bar]  
 28,3 = conversion coefficient from water to air

So: the capacities calculated with the given formula differ little from those that can be obtained from the flow characteristic of the corresponding valve. Furthermore, it also provides confirmation, from the characteristic itself, of the limits of validity of the formula. It is only valid for  $\Delta p < \Omega p_1$ ; i.e. only up until the fall of pressure across the valve reaches a value equivalent to half the absolute supply pressure.

Nominal flow  $Q_n$

In this condition the air reaches maximum velocity (critical velocity  $V_c$ ) and consequently maximum capacity  $Q_{max}$ . For  $\Delta p < \Omega p_1$ , the pressure energy is converted into kinetic energy with an increase in velocity and consequently capacity. For  $\Delta p > \Omega p_1$  the extra pressure energy is no longer converted into velocity energy, but dissipated in local turbulences in the form of heat. All of this is confirmed by the flow characteristics.

From the same characteristics it is possible to discover that that the value of the flow with  $\Delta p = 1$  bar is  $\cong 2/3 Q_{max}$ . The capacity corresponding to  $\Delta p = 1$  bar is defined nominal flow ( $Q_n$ ).

In the case of a valve, a different flow characteristic exists for each absolute supply pressure, and thus corresponding values for  $Q_{max}$  and  $Q_n$ . Falls in pressure of  $\Delta p > 1$  bar are too economically onerous; for this reason it is advisable to limit the falls in pressure to  $\Delta p = 0,5$  bar, by choosing a larger size valve.

In the catalogue reference is normally made to the nominal flow, but the flow characteristics and the valvular coefficient are also provided. Let's calculate, for example, the flow of a valve with  $K_v = 12$  NL/min,  $P_1 = 6$  bar,

$$\Delta P = 0,5 \text{ bar} \quad \begin{aligned} Q &= 28,3 * 12 \sqrt{0,5 (7 - 0,5)} = 612 \text{ [NI/min]} \\ Q_n &= 831 \text{ [NI/min]} \\ Q_{max} &= 1118 \text{ [NI/min]} \end{aligned}$$

## Features and certifications

Series of 15 mm directly operated poppet valves for single or manifold bases, standard with coil and without connector (to be ordered separately).  
Supplied as standard in compliance with Reach and RoHS directives

## Type AE05C..

from page 2.5.20

15 mm directly operated solenoid valves, 3/2 normally closed.  
Connectors to be ordered separately.

## Type AE05A..

from page 2.5.20

15 mm directly operated solenoid valves, 3/2 normally open.  
Connectors to be ordered separately.

## Features and certifications

Series of bases for 15 mm directly operated solenoid valves available in version single and manifold. Supplied as standard in compliance with Reach and RoHS directives.

### Type ABAS05S

from page 2.6.20

Single bases for 15 mm directly operated solenoid valves.

### Type ABAS05..

from page 2.6.40

Manifold bases for 15 mm directly operated solenoid valves.

### Type ABAS05T

from page 2.6.60

Closing plate for manifold bases.

## Features and certifications

22 mm directly operated solenoid valves, available in size 1/8" and 1/4" (only for series A1..MD), 3/2 normally closed.

Coils and connectors to be ordered separately.

Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h, and also complete with ATEX coil and connector, in different classifications (see from page 2.320.1).

### Series A1EM.. 1/8" 3/2 N.C.

from page 2.12.10

22 mm directly operated solenoid valves for single or modular mounting. Size 1/8", 3/2 normally closed, with spring return or bistable manual override. Orifice 1,0 or 1,2 mm wide. Coils and connectors to be ordered separately.

### Series A1E1..MD 1/8" 3/2 N.C.

from page 2.14.10

22 mm directly operated solenoid valves for direct mounting on application (cylinder or actuator). Size 1/8", 3/2 normally closed, with bistable manual override. Coils and connectors to be ordered separately.

### Series A1E2..MD 1/4" 3/2 N.C.

from page 2.14.10

22 mm directly operated solenoid valves for direct mounting on application (cylinder or actuator). Size 1/4", 3/2 normally closed, with bistable manual override. Coils and connectors to be ordered separately.

### Series A1EM.. 1/8" 3/2 N.C. ATEX

from page 2.320.1

22 mm directly operated solenoid valves for single or modular mounting. Size 1/8", 3/2 normally closed, with spring return or bistable manual override. Orifice 1,0 or 1,2 mm wide. Available according to 2014/34/EU ATEX Directive in different classifications.

### Series A1E1..MD 1/8" 3/2 N.C. ATEX

from page 2.320.1

22 mm directly operated solenoid valves for direct mounting on application (cylinder or actuator). Size 1/8", 3/2 normally closed, with bistable manual override. Available according to 2014/34/EU ATEX Directive in different classifications.

### Series A1E2..MD 1/4" 3/2 N.C. ATEX

from page 2.320.1

22 mm directly operated solenoid valves for direct mounting on application (cylinder or actuator). Size 1/4", 3/2 normally closed, with bistable manual override. Available according to 2014/34/EU ATEX Directive in different classifications.

Options			
Description		Symbol	Suffix

Direct mounting on microcylinder

Example of 22 mm. directly operated solenoid valves series A1EMD application on a single acting microcylinder series MSM (for these cylinders see page 1.2.1).

These valves can be directly mounted on the air connection of the cylinder without tubes.

Direct mounting on actuator

Example of 22 mm. directly operated solenoid valves series A1EMD application on a single acting rotary actuator series AR..SE (for these actuators see page 2.400.1).

These valves can be directly mounted on the air connection of the actuator without tubes or plates.

# SOLENOID OPERATED

## valves Series A1

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Spool valves, with static seals, high flow, for panel or sub-base mounting. Available in sizes 1/8", 1/4" and 1/2", solenoid operated also with external air pilot, with functions: 3/2 solenoid/spring normally closed, 3/2 solenoid/spring normally open, 3/2 solenoid/solenoid, 5/2 solenoid/spring, 5/2 solenoid/solenoid and solenoid/solenoid differential, 5/3 with open centres, closed centres and pressurized centres.

Coils and connectors to be ordered separately.

Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h, and also complete with ATEX coil and connector, in different classifications (see from page 2.320.1).

### Series A1 1/8" 3/2 Solenoid/Spring

from page 2.21.10

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/8", 3/2 solenoid/spring normally closed also with external air pilot, or 3/2 solenoid/spring normally open.  
Coils and connectors to be ordered separately.

### Series A1 1/8" 3/2 Solenoid/Solenoid

from page 2.21.30

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/8", 3/2 solenoid/solenoid, also with external air pilot.  
Coils and connectors to be ordered separately.

### Series A1 1/8" 5/2 Solenoid/Spring

from page 2.21.50

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/8", 5/2 solenoid/spring also with external air pilot.  
Coils and connectors to be ordered separately.

### Series A1 1/8" 5/2 Solenoid/Solenoid

from page 2.21.70

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/8", 5/2 solenoid/solenoid also with external air pilot, and 5/2 solenoid/solenoid differential.  
Coils and connectors to be ordered separately.

### Series A1 1/8" 5/3

from page 2.21.90

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/8", 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, solenoid operated also with external air pilot.  
Coils and connectors to be ordered separately.

### Series A1 1/8" 3/2 - 5/2 - 5/3 ATEX

from page 2.320.1

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/8", 3/2 solenoid/spring normally closed, normally open and solenoid/solenoid, 5/2 solenoid/spring and solenoid/solenoid, an 5/3 open centres, closed centres and pressurized centres, solenoid operated, supplied according to 2014/34/EU ATEX Directive in different classifications.

Series A1 1/4" 3/2 Solenoid/Spring

from page 2.23.10

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/4", 3/2 solenoid/spring normally closed also with external air pilot, or 3/2 solenoid/spring normally open.  
Coils and connectors to be ordered separately.

Series A1 1/4" 3/2 Solenoid/Solenoid

from page 2.23.30

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/4", 3/2 solenoid/solenoid also with external air pilot.  
Coils and connectors to be ordered separately.

Series A1 1/4" 5/2 Solenoid/Spring

from page 2.23.50

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/4", 5/2 solenoid/spring also with external air pilot.  
Coils and connectors to be ordered separately.

Series A1 1/4" 5/2 Solenoid/Solenoid

from page 2.23.70

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/4", 5/2 solenoid/solenoid also with external air pilot, and 5/2 solenoid/solenoid differential.  
Coils and connectors to be ordered separately.

Series A1 1/4" 5/3

from page 2.23.90

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/4", 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, solenoid operated also with external air pilot.  
Coils and connectors to be ordered separately.

Series A1 1/4" 3/2 - 5/2 - 5/3 ATEX

from page 2.320.1

Series of spool valves, with static seals, high flow, for panel or sub-base mounting.  
Available in size 1/4", 3/2 solenoid/spring normally closed, normally open and solenoid/solenoid, 5/2 solenoid/spring and solenoid/solenoid, an 5/3 open centres, closed centres and pressurized centres, solenoid operated, supplied according to 2014/34/EU ATEX Directive in different classifications.

## Series A1 1/2" 3/2 Solenoid/Spring

from page 2.25.10

Series of spool valves, with static seals, high flow, for panel mounting with screws.  
Available in size 1/2", 3/2 solenoid/spring normally closed also with external air pilot, or 3/2 solenoid/spring normally open.  
Coils and connectors to be ordered separately.

## Series A1 1/2" 3/2 Solenoid/Solenoid

from page 2.25.30

Series of spool valves, with static seals, high flow, for panel mounting with screws.  
Available in size 1/2", 3/2 solenoid/solenoid also with external air pilot.  
Coils and connectors to be ordered separately.

## Series A1 1/2" 5/2 Solenoid/Spring

from page 2.25.50

Series of spool valves, with static seals, high flow, for panel mounting with screws.  
Available in size 1/2", 5/2 solenoid/spring also with external air pilot.  
Coils and connectors to be ordered separately.

## Series A1 1/2" 5/2 Solenoid/Solenoid

from page 2.25.70

Series of spool valves, with static seals, high flow, for panel mounting with screws.  
Available in size 1/2", 5/2 solenoid/solenoid also with external air pilot, and 5/2 solenoid/solenoid differential.  
Coils and connectors to be ordered separately.

## Series A1 1/2" 5/3

from page 2.25.90

Series of spool valves, with static seals, high flow, for panel mounting with screws.  
Available in size 1/2", 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, solenoid operated, also with external air pilot.  
Coils and connectors to be ordered separately.

## Series A1 1/2" 3/2 - 5/2 - 5/3 ATEX

from page 2.320.1

Series of spool valves, with static seals, high flow, for panel mounting with screws.  
Available in size 1/2", 3/2 solenoid/spring normally closed, normally open and solenoid/solenoid, 5/2 solenoid/spring and solenoid/solenoid, an 5/3 open centres, closed centres and pressurized centres, solenoid operated, supplied according to 2014/34/EU ATEX Directive in different classifications.

Options			
Description		Symbol	Suffix
Low temperatures seals	-25°C ÷ +60°C		<b>BT</b>
ATEX valve body*			<b>/ATEX</b>
Special versions on request			<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see the table below; For code key see from page 2.20.6  
 \*For valves complete with ATEX coil and connector, in different classifications, see page 2.320.1.

Options matching

# Solenoid operated valves series A1

## 1/8", 3/2 Solenoid/Spring

### Main features

Version	Code	Item	Symbol
3/2 Normally closed	034003	A1E130	
3/2 Normally closed with external air pilot	034006	A1K130	
3/2 Normally open	034004	A1E131	

### Technical data

Version	3/2 Normally closed	3/2 Normally closed with external air pilot	3/2 Normally open
Code	034003	034006	034004
Item	A1E130	A1K130	A1E131
Size	1/8"		
Fluid	Compressed air with or without lubrication. Lubrication, if started, must be continued.		
Pressure range	1,5 ÷ 10 bar		
Minimum external air pressure	-	1,5 bar	-
Temperature range	-10°C ÷ +60°C (standard)	-25°C ÷ +60°C (BT)	
Plunger Ø	9 mm		
Orifice Ø	6.5 mm		
Flow at 6 bar with ΔP 1 bar	650 NI/min.		
Mounting	In every position		
Manual override	Bistable		
Response time at 6 bar	Energizing	35 ms.	
	De-energizing	15 ms.	

### Notes

Coils and connectors for standard versions to be ordered separately.  
 For coils type ASA12 and ASA2 see from page 2.315.1. For connectors type A122 e A182 see from page 2.318.1  
 For valves complete with ATEX coil and connector, in different classifications, see page 2.320.1

Fluid	Compressed air with or without lubrication. Lubrication, if started, must be continued.		
Pressure range	1,5 ÷ 10 bar		
Minimum external air pressure	-	1,5 bar	-
Temperature range	-10°C ÷ +60°C (standard)		-25°C ÷ +60°C (BT)
Plunger Ø	9 mm		
Orifice Ø	8 mm		
Flow at 6 bar with ΔP 1 bar	1.100 Nl/min.		
Mounting	In every position		
Manual override	Bistable		
Response time at 6 bar	Energizing	45 ms.	
	De-energizing	19 ms.	

## Notes

Coils and connectors for standard versions to be ordered separately.  
 For coils type ASA12 and ASA2 see from page 2.315.1. For connectors type A122 e A182 see from page 2.318.1  
 For valves complete with ATEX coil and connector, in different classifications, see page 2.320.1

# AIR OPERATED

## valves Series A1

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Spool valves, with static seals, high flow, for panel or sub-base mounting. Available in sizes 1/8", 1/4" and 1/2", air operated, with functions: 3/2 pilot/spring normally closed, 3/2 pilot/spring normally open, 3/2 pilot/pilot and pilot/pilot differential (only for size 1/8" and 1/4"), 5/2 pilot/spring, 5/2 pilot/pilot and pilot/pilot differential, 5/3 with open centres, closed centres, pressurized centres and closed centres differential (only for size 1/8").

Supplied as standard in compliance to Reach and RoHS directives, and SIL certified.

On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h.

### Series A1 1/8" 3/2 Pilot/Spring

from page 2.31.10

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/8", 3/2 pilot/spring normally closed and 3/2 pilot/spring normally open, air operated.

### Series A1 1/8" 3/2 Pilot/Pilot

from page 2.31.30

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/8", 3/2 pilot/pilot and 3/2 pilot/pilot differential, air operated.

### Series A1 1/8" 5/2 Pilot/Spring

from page 2.31.50

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/8", 5/2 pilot/spring, air operated.

### Series A1 1/8" 5/2 Pilot/Pilot

from page 2.31.70

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/8", 5/2 pilot/pilot and 5/2 pilot/pilot differential, air operated.

### Series A1 1/8" 5/3

from page 2.31.90

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/8", 5/3 closed centres, 5/3 open centres, 5/3 pressurized centres and 5/3 closed centres differential, air operated.

Series A1 1/4" 3/2 Pilot/Spring

from page 2.33.10

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/4", 3/2 pilot/spring normally closed and 3/2 pilot/spring normally open, air operated.

Series A1 1/4" 3/2 Pilot/Pilot

from page 2.33.30

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/4", 3/2 pilot/pilot and 3/2 pilot/pilot differential, air operated.

Series A1 1/4" 5/2 Pilot/Spring

from page 2.33.50

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/4", 5/2 pilot/spring, air operated.

Series A1 1/4" 5/2 Pilot/Pilot

from page 2.33.70

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/4", 5/2 pilot/pilot and 5/2 pilot/pilot differential, air operated.

Series A1 1/4" 5/3

from page 2.33.90

Series of spool valves, with static seals, high flow, for panel or sub-base mounting. Available in size 1/4", 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, air operated.

**Series A1 1/2" 3/2 Pilot/Spring**

from page 2.35.10

Series of spool valves, with static seals, high flow, for panel mounting with screws. Available in size 1/2", 3/2 pilot/spring normally closed and 3/2 pilot/spring normally open, air operated.

**Series A1 1/2" 3/2 Pilot/Pilot**

from page 2.35.30

Series of spool valves, with static seals, high flow, for panel mounting with screws. Available in size 1/2", 3/2 pilot/pilot, air operated

**Series A1 1/2" 5/2 Pilot/Spring**

from page 2.35.50

Series of spool valves, with static seals, high flow, for panel mounting with screws. Available in size 1/2", 5/2 pilot/spring, air operated.

**Series A1 1/2" 5/2 Pilot/Pilot**

from page 2.35.70

Series of spool valves, with static seals, high flow, for panel mounting with screws. Available in size 1/2", 5/2 pilot/pilot and 5/2 pilot/pilot differential, air operated.

**Series A1 1/2" 5/3**

from page 2.35.70

Series of spool valves, with static seals, high flow, for panel mounting with screws. Available in size 1/2", 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, air operated.

Options

Description		Symbol	Suffix
Low temperatures seals	-25°C ÷ +60°C		<b>BT</b>
ATEX valve body			<b>/ATEX</b>
Special versions on request			<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see the table below; For code key see from page 2.30.6

Options matching

Series	Size	Function	Standard options matching		
			BT	/ATEX

# SUB-BASES

for valves Series A1

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Multi-position sub-bases with fixed positions for valves, solenoid and air operated, series A1. Available for size 1/8" and 1/4", function 3/2 and 5/2 (solenoid/spring, solenoid/solenoid, pilot/spring, pilot/pilot) and 5/3. Mounting screws and relevant seals for each position included. Spare positions can be blanked with the closing plate, supplied with screws. With 3/2 valves, the plug close the not used way. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified.

## Series A1B1..

## Features and certifications

Plates for valves series A1. These components allow the mounting of valves and solenoid valves series A1 directly on the barrel or on the tie-rod of cylinders ISO 15552 type AMA, BMA and AMT.  
Supplied as standard in compliance to Reach and RoHS directives.

## Series PSV..

from page 2.39.10

Series of plates for mounting valves and solenoid valves series A1 5/2 and 5/3 on cylinders ISO 15552 type AMA, BMA and AMT.  
These plates are equipped with multiple holes for mounting at least two sizes of valves series A1, according to cylinder bore.

## Code key

Series	/	Matching valves	/	Matching cylinder	-	Matching cylinder bore
<b>PSV</b>	/	<b>A1</b>	/	<b>AMA</b>	-	<b>32-40</b>

PSV

A1 = valves series A1

AMA = cylinder type AMA and BMA  
 AMT = cylinder type AMT

32-40 = from Ø 32 to Ø 40  
 50-63 = from Ø 50 to Ø 63  
 80-100-125 = from Ø 80 to Ø 125  
 160-200\* = from Ø 160 to Ø 200

## How to order

## Notes

Options in the same grid are alternative to each others.

For standard materials see data sheet.

\* Available only for type AMT.

## Features and certifications

Spool valves, with static seals, high flow, NAMUR interface. Available in size 1/4", solenoid operated, with functions: 3/2 solenoid/spring normally closed and solenoid/solenoid, 5/2 solenoid/spring and solenoid/solenoid, 5/3 open centres, closed centres and pressurized centres.  
 Coils and connectors to be ordered separately. These components are suitable for working with pneumatic rotary actuators series AR, see page 2.400.1  
 Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h, and also complete with ATEX coil and connector, in different classifications (see from page 2.320.1).

### Series A1N 1/4" 3/2 Solenoid/Spring

from page 2.46.10

Series of spool valves, with static seals, high flow, NAMUR interface.  
 Available in size 1/4", 3/2 solenoid/spring normally closed.  
 Coils and connectors to be ordered separately.

### Series A1N 1/4" 3/2 Solenoid/Solenoid

from page 2.46.30

Series of spool valves, with static seals, high flow, NAMUR interface.  
 Available in size 1/4", 3/2 solenoid/solenoid.  
 Coils and connectors to be ordered separately.

### Series A1N 1/4" 5/2 Solenoid/Spring

from page 2.46.50

Series of spool valves, with static seals, high flow, NAMUR interface.  
 Available in size 1/4", 5/2 solenoid/spring.  
 Coils and connectors to be ordered separately.

### Series A1N 1/4" 5/2 Solenoid/Solenoid

from page 2.46.70

Series of spool valves, with static seals, high flow, NAMUR interface.  
 Available in size 1/4", 5/2 solenoid/solenoid.  
 Coils and connectors to be ordered separately.

### Series A1N 1/4" 5/3

from page 2.46.90

Series of spool valves, with static seals, high flow, NAMUR interface.  
 Available in size 1/4", 5/3 closed centres, 5/3 open centres e 5/3 pressurized centres, solenoid operated.  
 Coils and connectors to be ordered separately.

### Series A1N 1/4" 3/2 - 5/2 - 5/3 ATEX

from page 2.320.1

Series of spool valves, with static seals, high flow, NAMUR interface.  
 Available in size 1/4", 3/2 solenoid/spring normally closed and solenoid/solenoid, 5/2 solenoid/spring and solenoid/solenoid, 5/3 open centres, closed centres and pressurized centres, solenoid operated, supplied according to 2014/34/EU ATEX Directive in different classifications

Options		
Description	Symbol	Suffix
Low temperatures seals	-25°C ÷ +60°C 	<b>BT</b>
ATEX valve body*		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see the table below; For code key see from page 2.44.5

\*For valves complete with ATEX coil and connector, in different classifications, see page 2.320.1.

Fast delivery

## Features and certifications

Spool valves, with static seals, high flow, NAMUR interface. Available in size 1/4", air operated, with functions: 3/2 pilot/spring normally closed and pilot/pilot, 5/2 pilot/spring and pilot/pilot, 5/3 open centres, closed centres and pressurized centres.

These components are suitable for working with pneumatic rotary actuators series AR, see page 2.400.1

Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h.

### Series A1N 1/4" 3/2 Pilot/Spring

from page 2.52.10

Series of spool valves, with static seals, high flow, NAMUR interface. Available in size 1/4", 3/2 pilot/spring normally closed, air operated.

### Series A1N 1/4" 3/2 Pilot/Pilot

from page 2.52.30

Series of spool valves, with static seals, high flow, NAMUR interface. Available in size 1/4", 3/2 pilot/pilot, air operated.

### Series A1N 1/4" 5/2 Pilot/Spring

from page 2.52.50

Series of spool valves, with static seals, high flow, NAMUR interface. Available in size 1/4", 5/2 pilot/spring, air operated.

### Series A1N 1/4" 5/2 Pilot/Pilot

from page 2.52.70

Series of spool valves, with static seals, high flow, NAMUR interface. Available in size 1/4", 5/2 pilot/pilot, air operated.

### Series A1N 1/4" 5/3

from page 2.52.90

Series of spool valves, with static seals, high flow, NAMUR interface. Available in size 1/4", 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, air operated.

# SOLENOID VALVES

with multipole connector Series A2

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Spool valves, for multi-pole connection on island sub-base. These series of modern valves are innovative and highly performing, with high flow rate and reduced overall dimensions. The electric pilot of solenoid/solenoid versions are both on same side. Coils are with low power consumptions. There is the possibility of feeding with different pressures different valves just integrating a membrane module within the base. Designed for separate feeding to the pilot. The manual override is "push", spring return and two-position. The assembly is fast and practical: each valve, even if in an intermediate position, can be easily replaced by operating on such valve only. They are equipped with LED.

Supplied as standard in compliance to Reach and RoHS directives.

### Series A2 1/4" 3/2 Solenoid/Spring

from page 2.60.20

Series of spool valves for multi-pole connection on island sub-base with high flow rate and reduced overall dimensions. Available in size 1/4", 3/2 normally closed and 3/2 normally open, servo-assisted solenoid operated, voltage 12 and 24 V DC.

### Series A2 1/4" 3/2 Solenoid/Solenoid

from page 2.60.20

Series of spool valves for multi-pole connection on island sub-base with high flow rate and reduced overall dimensions. Available in size 1/4", 3/2 solenoid/solenoid, servo-assisted solenoid operated, voltage 12 and 24 V DC.

### Series A2 1/4" 2-3/2

from page 2.60.40

Series of spool valves for multi-pole connection on island sub-base with high flow rate and reduced overall dimensions. Available in size 1/4", 2-3/2 normally closed/normally open, 2-3/2 normally closed/normally closed, 2-3/2 normally open/normally open, servo-assisted solenoid operated, voltage 24 V DC.

### Series A2 1/4" 5/2 Solenoid/Spring

from page 2.60.60

Series of spool valves for multi-pole connection on island sub-base with high flow rate and reduced overall dimensions. Available in size 1/4", 5/2 solenoid/spring, servo-assisted solenoid operated, voltage 12 and 24 V DC.

### Series A2 1/4" 5/2 Solenoid/Solenoid

from page 2.60.60

Series of spool valves for multi-pole connection on island sub-base with high flow rate and reduced overall dimensions. Available in size 1/4", 5/2 solenoid/solenoid, servo-assisted solenoid operated, voltage 12 and 24 V DC.

### Series A2 1/4" 5/3

from page 2.60.80

Series of spool valves for multi-pole connection on island sub-base with high flow rate and reduced overall dimensions. Available in size 1/4", 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, servo-assisted solenoid operated, voltage 24 V DC.

# SUB-BASES

and accessories for valves Series A2

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Modular sub-bases, feeding modules, blanking modules, blanking diaphragm and sub-d connectors for valves for multi-pole connection series A2. Sub bases and other accessories are required for the valves island, providing many possibilities for different combinations and functions. Supplied as standard in compliance to Reach and RoHS directives.

## Modular sub-bases

from page 2.61.10

Modular sub-bases for valves series A2. Available in size 1/4", from 4 up to 12 positions.

## Feeding modules

from page 2.61.30

Feeding modules for valves series A2. Available in version for internal or external piloting.

## Blanking modules

from page 2.61.30

Blanking modules for valves series A2. To close the unused position.

## Blanking diaphragms

from page 2.61.50

Blanking diaphragm for valves series A2. For feedings and exhausts.

## SUB-D connectors

from page 2.61.70

SUB-D 25 poles connectors for valves series A2. With 5 m, 7 m or 10 m cable.

Electric scheme

The transferring of the signals from the PLC to the valves is through a SUB-D multi-pole connector (for technical features see from page 2.61.70) capable of manage 2 signals. Such signals are distributed to the valves following the scheme in the figure above.

Peculiarities of these valves are: simplicity of electrical connection with each valve configuration; type of valve (for valve versions see from page 2.60.1) will not limit the maximum number of valve applicable; every type of valve can replace another maintaining the same electrical connection;

## Sub-bases and accessories for valves series A2

### Blanking diaphragm

#### Main features

Version	Code	Item
Blanking diaphragm for separating the feedings	036020	A2T
Blanking diaphragm for separating the exhausts	036027	A2S

#### Technical data

Version	Blanking diaphragm for sub-bases	
Code	036020	036027
Item	A2T	A2S
Size	1/4"	
Function	Blanking diaphragm for separating the feedings. For two different pressure zones in the sub-base and feeding separately two valves groups, feed the base from both sides.	Blanking diaphragm for separating the exhausts. To separate the exhausts 3 or 5. This way, the exhausts of two groups of valves can be conveyed separately.
Mounting	Without occupying any valve position	
Sub-base matching	Series A2B..., see page 2.61.10	

#### Standard materials

Description	Material
Body	Aluminium
Seal	NBR

## Features and certifications

Spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 and ISO2, with CNOMO or In Line pilot (only for size ISO1), solenoid operated, also with external air pilot, 5/2 solenoid/spring, 5/2 solenoid/solenoid, 5/2 solenoid/solenoid differential, 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres. Coils and connectors to be ordered separately. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h, and also complete with ATEX coil and connector, in different classifications (see from page 2.320.1).

### Series ISO1 5/2 Solenoid/Spring

from page 2.91.30

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with CNOMO pilot, 5/2 solenoid/spring, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

### Series ISO1 5/2 Solenoid/Solenoid

from page 2.91.50

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with CNOMO pilot, 5/2 solenoid/solenoid and 5/2 solenoid/solenoid differential, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

### Series ISO1 5/3

from page 2.91.70

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with CNOMO pilot, 5/3 closed centres, 5/3 open centres e 5/3 pressurized centres, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

### Series ISO1 5/2 - 5/3 ATEX

from page 2.320.1

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with CNOMO pilot, 5/2 solenoid/spring, 5/2 solenoid/solenoid and solenoid/solenoid differential, 5/3 open centres, closed centres and pressurized centres, solenoid operated, available according to 2014/34/EU ATEX Directive in different classifications.

CNOMO

Series ISO1..L 5/2 Solenoid/Spring

from page 2.92.30

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with In Line pilot, 5/2 solenoid/spring, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

Series ISO1..L 5/2 Solenoid/Solenoid

from page 2.92.50

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with In Line pilot, 5/2 solenoid/solenoid and 5/2 solenoid/solenoid differential, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

Series ISO1..L 5/3

from page 2.92.70

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with In Line pilot, 5/3 closed centres, 5/3 open centres e 5/3 pressurized centres, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

Series ISO1..L 5/2 - 5/3 ATEX

from page 2.320.1

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO1 with In Line pilot, 5/2 solenoid/spring, 5/2 solenoid/solenoid and solenoid/solenoid differential, 5/3 open centres, closed centres and pressurized centres, solenoid operated, available according to 2014/34/EU ATEX Directive in different classifications.

## Series ISO2 5/2 Solenoid/Spring

from page 2.94.30

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO2 with CNOMO pilot, 5/2 solenoid/spring, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

## Series ISO2 5/2 Solenoid/Solenoid

from page 2.94.50

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO2 with CNOMO pilot, 5/2 solenoid/solenoid and 5/2 solenoid/solenoid differential, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

## Series ISO2 5/3

from page 2.94.70

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO2 with CNOMO pilot, 5/3 closed centres, 5/3 open centres e 5/3 pressurized centres, solenoid operated also with external air pilot. Coils and connectors to be ordered separately.

## Series ISO2 5/2 - 5/3 ATEX

from page 2.320.1

Series of spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only. Available in size ISO2 with CNOMO pilot, 5/2 solenoid/spring, 5/2 solenoid/solenoid and solenoid/solenoid differential, 5/3 open centres, closed centres and pressurized centres, solenoid operated, available according to 2014/34/EU ATEX Directive in different classifications.

# Valves ISO 5599/1 solenoid operated

ISO1, CNOMO pilot, 5/2 solenoid/spring

## Main features

Version	Code	Item	Symbol
5/2 solenoid/spring	032020 	ISO1E50	
5/2 solenoid/spring with external air pilot	032021	ISO1K50	

## Technical data

Version	5/2 solenoid/spring	5/2 solenoid/spring with external air pilot
Code	032020	032021
Item	ISO1E50	ISO1K50
Size	ISO1	
Fluid	Compressed air with or without lubrication. Lubrication, if started, must be continued.	
Pilot	CNOMO	
Piloting	Internal	With external air pilot
Pressure range	2,5 ÷ 10 bar	0 ÷ 10 bar
Minimum external air pressure	-	2,5 bar
Temperature range	-10°C ÷ +60°C	
Plunger Ø	9 mm	
Orifice Ø	8,5 mm	
Flow at 6 bar with ΔP 1 bar	1.100 NI/min.	
Mounting	In every position	
Manual override	Bistable	

## Notes

Coils and connectors for standard versions to be ordered separately.  
 For coils type ASA12 and ASA2 see from page 2.315.1. For connectors type A122 e A182 see from page 2.318.1  
 For valves complete with ATEX coil and connector, in different classifications, see page 2.320.1

## Features and certifications

Spool valves conforming to ISO 5599/1 standards, with static seals, high flow, for sub-base mounting only.  
 Available in size ISO1 and ISO2, air operated, 5/2 pilot/spring, 5/2 pilot/pilot and 5/2 pilot/pilot differential, 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres.  
 Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h.

### Series ISO1 5/2 Pilot/Spring

from page 2.101.30

Series of spool valves conforming to ISO 5599/1 standard, with static seals, high flow, for sub-base mounting only.  
 Available in size ISO1, air operated, 5/2 pilot/spring.

### Series ISO1 5/2 Pilot/Pilot

from page 2.101.50

Series of spool valves conforming to ISO 5599/1 standard, with static seals, high flow, for sub-base mounting only.  
 Available in size ISO1, air operated, 5/2 pilot/pilot and 5/2 pilot/pilot differential.

### Series ISO1 5/3

from page 2.101.70

Series of spool valves conforming to ISO 5599/1 standard, with static seals, high flow, for sub-base mounting only.  
 Available in size ISO1, air operated, 5/3 closed centres, 5/3 open centres e 5/3 pressurized centres.

CNOMO

Series ISO2 5/2 Pilot/Spring

from page 2.103.30

Series of spool valves conforming to ISO 5599/1 standard, with static seals, high flow, for sub-base mounting only.  
Available in size ISO2, air operated, 5/2 pilot/spring.

Series ISO2 5/2 Pilot/Pilot

from page 2.103.50

Series of spool valves conforming to ISO 5599/1 standard, with static seals, high flow, for sub-base mounting only.  
Available in size ISO2, air operated, 5/2 pilot/pilot and 5/2 pilot/pilot differential.

Series ISO2 5/3

from page 2.103.70

Series of spool valves conforming to ISO 5599/1 standard, with static seals, high flow, for sub-base mounting only.  
Available in size ISO2, air operated, 5/3 closed centres, 5/3 open centres e 5/3 pressurized centres.

## Features and certifications

Single sub-bases and manifold for valves conforming to ISO 5599/1 standards. Available for sizes ISO1 and ISO2, solenoid operate or air operated, functions 5/2 (pilot/spring or pilot/pilot) and 5/3. The manifold kit include mounting screws and seals. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified.

### Series SBA1S

from page 2.107.10

Single sub-bases for valves series ISO 5599/1 size 1, solenoid or air operated.

### Series SBA1M..

from page 2.107.20

Manifold sub-bases for valves series ISO 5599/1 size 1, solenoid or air operated.

### Series SBA2S

from page 2.107.30

Single sub-bases for valves series ISO 5599/1 size 2, solenoid or air operated.

### Series SBA2M..

from page 2.107.40

Manifold sub-bases for valves series ISO 5599/1 size 2, solenoid or air operated.

# INDIRECTLY OPERATED

solenoid valves for water and steam

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Indirectly operated solenoid valves for fluids and compressed air, servo-assisted with diaphragm. Available in sizes from 1/4" to 2", 2/2 normally closed, in three seals versions.

Coils and connectors to be ordered separately.

Supplied as standard in compliance to Reach and RoHS directives.

### Series AEN 2/2 Normally closed

from page 2.120.10

Series of indirectly operated solenoid valves for fluids and compressed air, servo-assisted with diaphragm, NBR seals, for operating temperatures from -10°C up to +90°C. Available in sizes from 1/4" to 2", 2/2 normally closed. Coils and connectors to be ordered separately.

### Series AEV 2/2 Normally closed

from page 2.120.10

Series of indirectly operated solenoid valves for fluids and compressed air, servo-assisted with diaphragm, FKM seals, for operating temperatures from -10°C up to +130°C. Available in sizes from 1/4" to 2", 2/2 normally closed. Coils and connectors to be ordered separately..

### Series AEP 2/2 Normally closed

from page 2.120.10

Series of indirectly operated solenoid valves for fluids and compressed air, servo-assisted with diaphragm, EPDM seals, for operating temperatures up to +140°C. Available in sizes from 1/4" to 2", 2/2 normally closed. Coils and connectors to be ordered separately..

## Features and certifications

Integrated circuits "flip-flop", solenoid operated or air operated, and "continuous cycling", solenoid operated or air operated. For the solenoid operated, coils and connectors have to be ordered separately.

Supplied as standard in compliance to Reach and RoHS directives. On request the "flip-flop" body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h, and also complete with ATEX coil and connector, in different classifications (see from page 2.320.1)..

### Series AEF

from page 2.130.20

Series of integrated circuits "flip-flop", solenoid operated. Circuit composed by 1/4" 5/2 two stable position power valve. With the same signal applied twice at different times the cylinder carries out a complete cycle. Coils and connectors to be ordered separately.

### Series APF

from page 2.130.20

Series of integrated circuits "flip-flop", air operated. Circuit composed by 1/4" 5/2 two stable position power valve. With the same signal applied twice at different times the cylinder carries out a complete cycle.

### Series AEC

from page 2.130.40

Series of integrated circuits "continuous cycling", solenoid operated. Circuit composed by 1/8" 5/2 solenoid/spring power valve. Keeping the signal the cylinder carries out continuous cycling until the signal is not interrupted. Coils and connectors to be ordered separately.

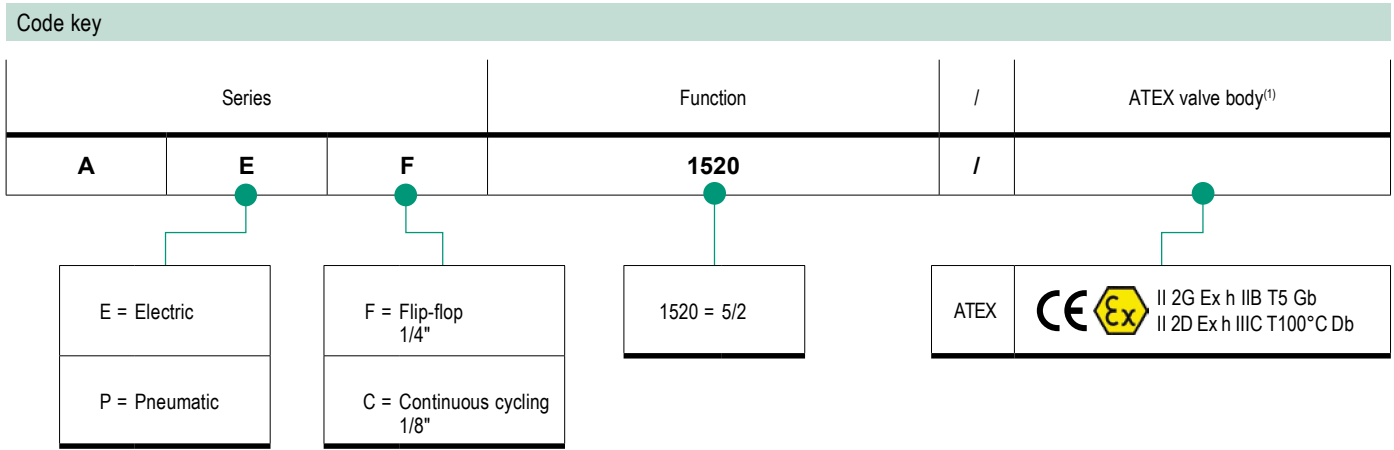

### Series APC

from page 2.130.40

Series of integrated circuits "continuous cycling", air operated. Circuit composed by 1/8" 5/2 pilot/spring power valve. Keeping the signal the cylinder carries out continuous cycling until the signal is not interrupted.

Fast delivery

## Features and certifications

Spool valves, with static seals, high flow. Available in 1/8" and 1/4", manual lever operated, in many versions, functions and configurations. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h.

### Series A1 1/8" 3/2 side lever

from page 2.151.20

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever operated (side lever configuration), 3/2 lever/spring normally closed and 3/2 lever/lever detent.

### Series A1 1/8" 3/2 top lever

from page 2.151.30

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever operated (top lever configuration), 3/2 lever/lever detent.

### Series A1 1/8" 3/2 push-pull

from page 2.151.40

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever operated (push-pull configuration), 3/2 spring return normally closed and 3/2 two positions detent.

### Series A1 1/8" 5/2 side lever

from page 2.151.60

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever operated (side lever configuration), 5/2 lever/spring and 5/2 lever/lever detent.

### Series A1 1/8" 5/2 top lever

from page 2.151.70

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever/spring (top lever configuration), 5/2 lever/lever detent.

### Series A1 1/8" 5/2 push-pull

from page 2.151.80

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever operated (push-pull configuration), 5/2 spring return and 5/2 two positions detent.

Series A1 1/8" 5/3 side lever

from page 2.151.100

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever operated (side lever configuration), 5/3 lever/spring closed centres, open centres and pressurized centres, or 5/3 3 positions detent closed centres, open centres and pressurized centres.

Series A1 1/8" 5/3 top lever

from page 2.151.110

Series of spool valves, with static seals, high flow. Available in size 1/8", manual lever operated (top lever configuration), 5/3 lever/spring open centres or 5/3 3 positions detent open centres.

Series A1 1/4" 3/2 side lever

from page 2.152.20

Series of spool valves, with static seals, high flow. Available in size 1/4", manual lever operated (side lever configuration), 3/2 lever/spring normally closed and 3/2 lever/lever detent.

Series A1 1/4" 3/2 top lever

from page 2.152.30

Series of spool valves, with static seals, high flow. Available in size 1/4", manual lever operated (top lever configuration), 3/2 lever/lever detent.

Series A1 1/4" 3/2 push-pull

from page 2.152.40

Series of spool valves, with static seals, high flow. Available in size 1/4", manual lever operated (push-pull configuration), 3/2 spring return normally closed and 3/2 two positions detent.

Series A1 1/4" 5/2 side lever

from page 2.152.60

Series of spool valves, with static seals, high flow. Available in size 1/4", manual lever operated (side lever configuration), 5/2 lever/spring and 5/2 lever/lever detent.

## Series A1 1/4" 5/2 top lever

from page 2.152.70

Series of spool valves, with static seals, high flow. Available in size 1/4", manual lever operated (top lever configuration), 5/2 lever/lever detent.

## Series A1 1/4" 5/2 push-pull

from page 2.152.80

Series of spool valves, with static seals, high flow. Available in size 1/4", manual lever operated (push-pull configuration), 5/2 spring return and 5/2 two positions detent.

## Series A1 1/4" 5/3 side lever

from page 2.152.100

Series of spool valves, with static seals, high flow. Available in size 1/4", manual lever operated (side lever configuration), 5/3 lever/spring closed centres, open centres and pressurized centres, or 5/3 3 positions detent closed centres, open centres and pressurized centres.

## button operated valves Series A1

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Spool valves, with static seals, high flow. Available in size 1/8", manual button operated, spring return with air assist, in many versions, functions and configurations (button, button 90° or selector).

Supplied as standard in compliance to Reach and RoHS directives, and SIL certified.

On request the valve body can be supplied according to 2014/34/EU ATEX Directive, classification Ex h.

### Series A1 1/8" 3/2 head push button

from page 2.161.20

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 3/2 spring return, head push button configuration (available colors: red, green or black), and 3/2 two positions detent, head push button configuration (available colors: red only).

### Series A1 1/8" 3/2 90° head push button

from page 2.161.30

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 3/2 spring return 90° head push button configuration (available colors: red, green or black), and 3/2 two positions detent 90° head push button configuration (available colors: red only).

### Series A1 1/8" 3/2 recessed button

from page 2.161.50

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 3/2 spring return recessed button (available colors: red, green or black).

### Series A1 1/8" 3/2 90° recessed button

from page 2.161.60

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 3/2 spring return 90° recessed button configuration (available colors: red, green or black).

### Series A1 1/8" 3/2 90° selector

from page 2.161.80

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 3/2 two positions detent, 90° selector configuration (available colors: black only).

## Series A1 1/8" 5/2 head push button

from page 2.161.120

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 5/2 spring return, head push button configuration (available colors: red, green or black), and 5/2 two positions detent head push button configuration (available colors: red only).

## Series A1 1/8" 5/2 90° head push button

from page 2.161.130

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 5/2 spring return 90° head push button configuration (available colors: red, green or black), and 5/2 two positions detent 90° head push button configuration (available colors: red only).

## Series A1 1/8" 5/2 recessed button

from page 2.161.150

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 5/2 spring return recessed button configuration (available colors: red, green or black).

## Series A1 1/8" 5/2 90° recessed button

from page 2.161.160

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 5/2 spring return 90° recessed button configuration (available colors: red, green or black).

## Series A1 1/8" 5/2 90° selector

from page 2.161.180

Series of spool valves, with static seals, high flow. Available in size 1/8", manual button operated, 5/2 two positions detent 90° selector configuration (available colors: black only).

## Options

Description	Symbol	Suffix
Low temperatures seals -25°C ÷ +60°C		<b>BT</b>
ATEX valve body*		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see the table below; For code key see from page 2.160.5

## Options matching

Series	Size	Function	Standard options matching	
			<b>BT</b>	<b>/ATEX</b>

## Features and certifications

Foot operated valves available in size 1/4", 3/2 or 5/2, spring return or two positions detent. Provided as standard with spool valve and yellow shock-resistant protection in acetal resin, and safety device to avoid improper actuation. Supplied as standard in compliance to Reach and RoHS directives.

### Series AVP 1/4" 3/2

from page 2.170.20

Series of spool valves foot operated available in size 1/4", 3/2 normally closed, spring return or two positions detent, with safety device.

### Series AVP 1/4" 5/2

from page 2.170.20

Series of spool valves foot operated available in size 1/4", 5/2, spring return or two positions detent, with safety device.

## Features and certifications

Microvalves and manual operating devices.

Poppet microvalves Ø 4 mm arranged for application of manual operators. Connections with push-in fittings integrated for tube with external diameter 4 mm. According to the application, you can choose between the bottom connections and the side connections version. Supplied as standard in compliance to Reach and RoHS directives. Manual operating devices available in many shapes, colors, configurations and functions. Supplied as standard in compliance to Reach and RoHS directives, as well.

### Series AM Ø 4 3/2

from page 2.181.20

Series of microvalves Ø 4 mm, 3/2 normally open and 3/2 normally closed, arranged for application of manual operators. Available with bottom or side connections.

### Series AM Ø 4 5/2

from page 2.181.50

Series of microvalves Ø 4 mm, 5/2 spring return, arranged for application of manual operators. Available with bottom or side connections.

### Series AP1..

from page 2.185.10

Series of manual operating devices with recessed button. Available spring return, in red, green or black.

### Series AP2..

from page 2.185.20

Series of manual operating devices with head push button. Available spring return, in red, green or black, and two positions detent "twist and release", only in red.

### Series AP3..

from page 2.185.50

Manual selector. Available only in black, with function two and three positions detent.

### Series AP4..

from page 2.185.60

Key selector. Available only in black, with function two positions detent.

### Series AP5..

from page 2.185.80

Lever. Available only in black, with function three positions detent.

Version	5/2 spring return	5/2 spring return with side connections
Code	030261	030262
Item	AM041520	AM041520L
Size	Ø 4	
Fluid	Compressed air with or without lubrication. Lubrication, if started, must be continued.	
Pressure range	0 ÷ 8 bar	
Temperature range	-20°C ÷ +80°C	
Flow at 6 bar with ΔP 1 bar	80 NI/min.	
Operating force	5 N	
Connections	Push-in fittings for tube ext. Ø 4 mm, bottom	Push-in fittings for tube ext. Ø 4 mm, side
Fastening	Through 2 holes Ø 4 mm on the body, or through 1 hole Ø 22 mm on panel* with manual operating device mounted	
Mounting	In every position	

\* For panel mounting hole dimensions see page 2.180.9

## Notes

Manual operating device to be ordered separately, for matching see page 2.180.5.

For dimensions and features see from page 2.185.10

## Features and certifications

Valves and microvalves mechanical operated.

Series AC valve are available in size  $\varnothing$  4 mm and 1/8", in different functions and configurations (with plunger, bidirectional or unidirectional lever and roller), with standard or side connections.

Series A1 valves are available in size 1/8" only, in different functions and configurations (with sensitive aerial or side lever and roller).

Supplied as standard in compliance to Reach and RoHS directives, while additionally, series A1 valve are SIL certified.

### Series AC $\varnothing$ 4 3/2 Normally Open

from page 2.201.10

Poppet microvalves series AC size  $\varnothing$  4 mm mechanical operated, 3/2 normally open, available with plunger, with bi-directional lever and roller or with uni-directional lever. Bottom or side connections available.

### Series AC $\varnothing$ 4 3/2 Normally Closed

from page 2.201.30

Poppet microvalves series AC size  $\varnothing$  4 mm mechanical operated, 3/2 normally closed, available with plunger, with bi-directional lever and roller or with uni-directional lever. Bottom or side connections available.

### Series AC 1/8" 3/2 Normally Closed

from page 2.203.10

Poppet valves series AC size 1/8" mm mechanical operated, 3/2 normally closed, available with plunger, with bi-directional lever and roller or with uni-directional lever and roller.

### Series AC 1/8" 5/2 Spring return

from page 2.203.30

Poppet valves series AC size 1/8" mm mechanical operated, 5/2 spring return, available with plunger, with bi-directional lever and roller or with uni-directional lever and roller.

## Series A1 1/8" 3/2 Normally Closed Spring return

from page 2.206.10

Spool valves, servo-assisted, mechanical operated, with static seals and high flow, series A1. Available in size 1/8", 3/2 normally closed spring return, with sensitive aerial.

## Series A1 1/8" 5/2 Spring return

from page 2.206.30

Spool valves, servo-assisted, mechanical operated, with static seals and high flow, series A1. Available in size 1/8", 5/2 spring return, with sensitive aerial.

## Series A1 1/8" 5/2 Spring return

from page 2.208.10

Spool valves, servo-assisted, mechanical operated, with static seals and high flow, series A1. Available in size 1/8", 5/2 spring return, with side lever and roller or adjustable side lever and roller.

# ANCILLARY

valves

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Ancillary valves.  
Series of ancillary valves in different functions, sizes and configurations.  
Supplied as standard in compliance to Reach and RoHS directives.

## Slide valves

from page 2.251.1

Series of slide valves, manual operated. In line mounting, to close the supply and at the same time exhaust the downstream circuit air. Available in size from M5 to 3/4". NBR seals and blue slide as standard.

## Miniature ball valves from brass hexagonal bar

from page 2.253.1

Series of miniature ball valves from brass hexagonal bar, manual operated. In line mounting, to close or open the flow in both directions. Available in size from 1/8" to 3/4", female-female or male-female. With black lever.

## Miniature ball valves with cast body

from page 2.254.1

Series of miniature ball valves with cast body, manual operated, reduced dimension. In line mounting, to close or open the flow in both directions. Available in size from 1/8" to 1/4" female-female and from 1/8" to 3/8" male-female. With black lever.

## Ball valve "full bore"

from page 2.256.1

Series of full bore ball valves, manual operated with long lever. In line mounting, to close or open the flow in both directions. Available in size from 1/4" to 2" in configuration female-female. With black lever.

## Quick exhaust valves

from page 2.260.1

Series of quick exhaust valves, to increase the speed of a cylinder. Available in size from M5 to 1" (for size 3/4" and 1" also available the "Maxi" version). PU seals as standard (NBR seals as standard for size M5).

## Unidirectional valves

from page 2.263.1

Series of unidirectional valves, from hexagonal bar, female threads. In line mounting, allow the compressed air to flow in one direction only; therefore they are suitable for those applications where no return of compressed air to the feeding is allowed. Available from size from M5 to 3/4" in configuration female-female. NBR seals as standard (FKM seals as standard for size 3/8" and size 1/2").

## Safety valves

from page 2.265.1

Series of adjustable safety valves, with pressure range from 3 to 7 bar. For mounting on air reservoirs or in all these applications requiring the pressure never exceed the fixed value. Available in sizes from 1/8" to 1". Fixed calibration for different pressures with certificate according 97/23/EC Directive (ISPESL on request) available as option.

030805	5VSR	3/4"	3/4"	55	90	32
030807	5VSRM	3/4"	3/4"	71	110	46
030808	6VSRM	1"	1"	71	110	46

Important note

The valve must be directly mounted on the port of the cylinder to achieve the maximum possible speed.  
When the supply is in **P** the diaphragm closes the exhaust **R** and so the air flows through **A** into the chamber of the cylinder. When the supply **P** fails the diaphragm get back in its original position (closing **P**) due to the exhaust air from **A** to **R**. The noise of the exhaust **R** can be reduced by a silencer (for silencers see from page 4.150.1)

## Features and certifications

Coils for solenoid operated valves. Available in size 22 mm and 30 mm, in different voltages. For plungers  $\varnothing$  9mm,  $\varnothing$  10mm and  $\varnothing$  13mm. Supplied as standard conforming to CE, UKCA, EAC, EN, VDE and DIN standards, and also supplied as standard in compliance to Reach and RoHS directives. Connectors to be ordered separately.

## Series ASA12

from page 2.315.10

Series of 22 mm coils with low electrical consumption, conforming to EN 60204 and VDE 0580 standards (in compliance with UKCA and EAC standard as well), insulation class F, class protection IP65.

Available in voltages 12 and 24 V DC, and in voltages 12, 24, 48, 110 and 230 V AC.

For  $\varnothing$  9 mm plunger.

Connector to be ordered separately.

## Series ASA2

from page 2.315.11

Series of 30 mm coils with low electrical consumption, conforming to EN 60204.1 and VDE 0580 standards (in compliance with UKCA and EAC standard as well), insulation class F, class protection IP65.

Available in voltages 12 and 24 V DC, and in voltages 12, 24, 48, 110 and 230 V AC.

For  $\varnothing$  9 mm plunger.

Connector to be ordered separately.

## Series ASA33

from page 2.315.11

Series of 22 mm coils conforming to DIN 43650 standards (in compliance with UKCA and EAC standard as well), insulation class F, class protection IP65.

Available in voltages 12 and 24 V DC, and in voltages 12, 24, 48, 110 and 230 V AC.

For  $\varnothing$  10 mm plunger.

Connector to be ordered separately.

## Series ASA32

from page 2.315.13

Series of 30 mm coils conforming to DIN 43650/A standard (in compliance with UKCA and EAC standard as well), insulation class F, class protection IP65.

Available in voltages 12 and 24 V DC, and in voltages 12, 24, 48, 110 and 230 V AC.

For  $\varnothing$  13 mm plunger.

Connector to be ordered separately.

## Series ASA34

from page 2.315.14

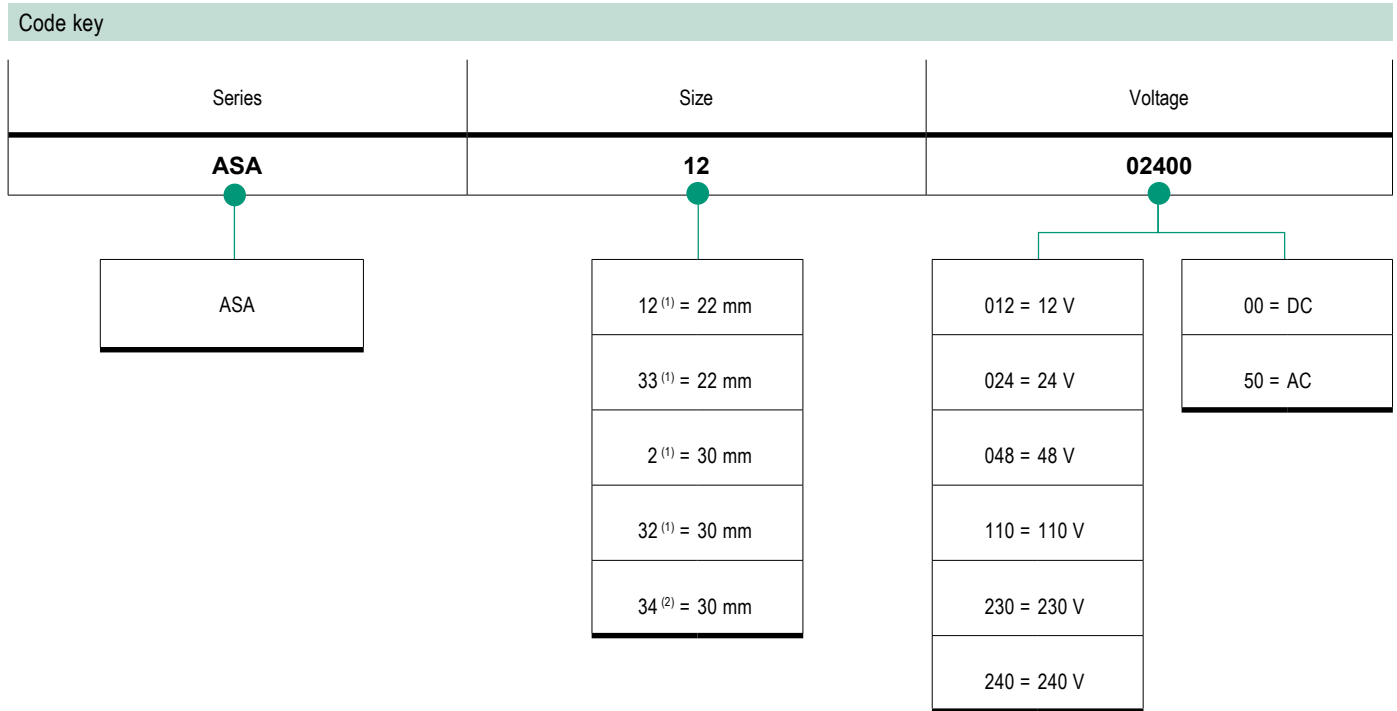

Series of 30 mm coils conforming to EN 175301-803-A, form A, insulation class F, class protection IP65.

Available in voltages 24 V DC, and in voltages 24, 110 and 240 V AC.

For  $\varnothing$  13 mm plunger.

Connector to be ordered separately.

**Notes**

Options in the same grid are alternative to each others.

For available matching between coils and valves, and between coils and connectors, please see the table below.

For ATEX coils and connectors, in different classifications, see page 2.320.1

(1) Available in voltage 12 and 24 V DC, and in voltage 12, 24, 48, 110 and 230 V AC.

(2) Available in voltage 24 V DC, and in voltage 24, 110 and 240 V AC.

## Features and certifications

Connectors for coils for solenoid operated valves. Available in size 15 mm, 22 mm and 30 mm, in different versions and voltages. Supplied as standard conforming to EN VDE and DIN standards, and also supplied as standard in compliance to Reach and RoHS directives. Coils to be ordered separately.

## Series A192

from page 2.318.10

Series of 15 mm connectors, insulation class VDE 0110 - 1/89, class protection IP65 EN 60529. Available in version black standard, cabled black standard and transparent in various voltages with VDR and LED, and cabled black in various voltage with VDR and LED. Supplied complete of mounting screw and profiled NBR seal. For valves series AE05..

## Series A122

from page 2.318.12

Series of 22 mm connectors conforming to DIN 43 650 standards, insulation class VDE 0110 - 1/89, class protection IP65 EN 60529. Available in version black standard, cabled black standard and transparent in various voltages with VDR and LED, and cabled black in various voltages with VDR and LED. Supplied complete of mounting screw and profiled NBR seal. Coils type ASA12 and ASA33, to be ordered separately.

## Series A182

from page 2.318.14

Series of 30 mm connectors conforming to DIN 43650 - A/ISO 4400 standards, insulation class VDE 0110 - 1/89, class protection IP65 EN 60529. Available in version black standard, cabled black standard and transparent in various voltages with VDR and LED, and cabled black in various voltages with VDR and LED. Supplied complete of mounting screw and profiled NBR seal. Coils type ASA2, ASA32 and ASA 34, to be ordered separately.

## Code key

Series	Size	Color	Circuit	Cabling
<b>A</b>	<b>122</b>	<b>N</b>	<b>1</b>	<b>K</b>
A	192 = 15 mm 122 = 22 mm 182 = 30 mm	N = Black T = Transparent	= Without circuit 1 = LED+VDR 24 V AC/DC 2 = LED+VDR 115 V AC/DC 3 = LED+VDR 230 V AC/DC	= Not cabled K <sup>(1)</sup> = Cabled

## How to order

Series	Size	Color	Circuit	Cabling
<b>A</b>	<b>122</b>	<b>N</b>	<b>1</b>	<b>K</b>

## Notes

Options in the same grid are alternative to each others  
 For standard materials see the data sheet of single components.  
 For possible matching with valves and coils, see the tables below.  
 For ATEX coils and connectors, in different classifications, see page 2.320.1  
 (1) Cabled connector available only in combinations with color black option (N) and circuits 1, 2 or 3.

Contact resistance	≤ 4 m Ohm							
Maximum conductor section	1.5 mm <sup>2</sup>				-			
Gland size	Pg 07				-			
Class protection	IP 65 EN 60529							
Insulation class	VDE 0110 - 1/89							
Temperature range	-40°C ÷ +90°C							
Earth contact (number)	1				2 connected (pos. 6/12)			
Poles number	2							
Cable length	-				2 mt.			
Cable material	-				Self-extinguishing polypropylene			
Cable color	-				Grey			
Wire color	-				Conforming to ENEL 0722 standards			
Cable external Ø	-				7.3 mm			
Cable insulation	-				300 V			
Cable temperature range	-				-5°C ÷ +70°C			
Cable standards	-				CEI 2022 II OR			
Wire section	-				3x1 mm <sup>2</sup>			
Matching	Coils series ASA2..., series ASA32.. and series ASA34..

# SOLENOID OPERATED

valves, ATEX coils and connectors

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Solenoid operated valves, supplied complete or configurable, for applications in potentially explosive atmospheres. The valve bodies are supplied conforming to Reach e RoHS directives, and SIL certificated, and thanks to the ATEX options, are also conforming to 2014/34/EU Directive in classification Ex h. Coils and connectors are conforming to ATEX 2014/34/EU Directive, in different classifications, and to Reach e RoHS directive as well.

### Complete solenoid operated valves conforming to ATEX series XA (valve body mounted with intrinsically safe coil)

Solenoid operated valves supplied complete with coil and connector mounted, composed by: desired valve body, 30 mm Ex ia intrinsically safe coil (voltage  $21.6 \div 28$  V DC) and compatible connector. Conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T6, protection grade IP65.

### Complete solenoid operated valves conforming to ATEX series XA1 (valve body mounted with intrinsically safe coil)

Solenoid operated valves supplied complete with coil and connector mounted, composed by: desired valve body, 30 mm Ex ia intrinsically safe coil (voltage  $21.6 \div 28$  V DC) and compatible connector. Conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T4, protection grade IP65.

### Complete solenoid operated valves conforming to ATEX series XC (valve body mounted with explosion-proof coil)

Solenoid operated valves supplied complete with coil mounted, composed by: desired valve body, Ex d explosion-proof coil with integrated pilot, available in different voltages. Conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas, temperature class T6.

### Solenoid operated valves conforming to ATEX Ex ec (to be configured by combining valve body to coil and connector)

Solenoid operated valves to be configured by combining the desired valve body, to 22 mm Ex ec coil type ASA12/ATEXII3 (available in different voltages) and 22 mm connector type A12209N/ATEX. This way, these solenoid valves are conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 3 Gas & Powders, temperature class T5, protection grade IP65.

### Solenoid operated valves conforming to ATEX Ex dm (to be configured by combining valve body to coil/connector)

Solenoid operated valves to be configured by combining the desired valve body, to 36 mm encapsulated coil Ex dm type ASA4/ATEXII2, complete with integrated connector available in different voltages. This way, these solenoid valves are conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T5, protection grade IP66.

### Solenoid operated valves conforming to ATEX Ex mb (to be configured by combining valve body to coil/connector)

Solenoid operated valves to be configured by combining the desired valve body, to 30 mm encapsulated coil Ex mb type ASA2/ATEXII2, complete with 2 mt cabled connector integrated available in different voltages. This way, these solenoid valves are conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T5, protection grade IP66.

Types and configurations

Solenoid valve	Classification	Coil/Connector	Configuration
Series XA	II 2G Ex ia IIC T6 Gb II 2D Ex tb IIIC T80°C Db X IP65		Solenoid operated valve supplied complete with Ex ia intrinsically safe coil and connector mounted. For combination with ATEX valve body see page 3.320.5; For code key see page 2.320.6; For dimensions see from page 2.320.8
Series XA1	II 2G Ex ia IIC T4 Gb II 2D Ex tb IIIC T130°C Db X IP65		Solenoid operated valve supplied complete with Ex ia intrinsically safe coil and connector mounted. For combination with ATEX valve body see page 3.320.5; For code key see page 2.320.6; For dimensions see from page 2.320.8
Series XC	II 2G Ex db IIC T6 Gb		Solenoid operated valve supplied complete with Ex d explosion-proof coil with integrated pilot. For combination with ATEX valve body see page 3.320.5; for code key see page 2.320.6; for dimensions see from page 2.320.17

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Pneumatic rotary actuators, single or double acting, with double rack, to automate industrial valves operation. The coupling between actuator and valve could be direct, thanks to the holes according to ISO 5211-DIN 3337 standard in the bottom of the actuator, or through adapters. The upper side of the actuator is according VDI/VDE 3845 NAMUR standards and allow mounting accessories such as CAM and position sensors. Side connections are threaded and for NAMUR valves (see from page 2.44.1 and from page 2.50.1).  
 Supplied as standard in compliance to Reach and RoHS directives, SIL certified and conforming to ATEX 2014/34/EU Directive.

### Series AR..SE

from page 2.401.1

Series of aluminium rotary actuators, single acting, with double rack. Available from bore  $\varnothing$  52 to  $\varnothing$  400, 12 springs as standard, on request can be equipped with a different number of springs (from 5 to 12 for bores  $\varnothing$  52 ÷  $\varnothing$  350, from 7 to 16 for bore  $\varnothing$  400, see the table at page 2.401.2).

### Series AR..DE

from page 2.403.1

Series of aluminium rotary actuators, double acting, with double rack. Available from bore  $\varnothing$  32 to  $\varnothing$  400.

## ATEX note

Actuators supplied according to 2014/34/EU ATEX Directive as standard

**CE** II 2G Ex h IIC T6 Gb  
II 2D Ex h IIIC T85°C Db

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

## How to order

Series	Bore	Function	Flange	Female key	Option
<b>AR</b>	<b>52</b>	<b>DE</b>	<b>F03/05</b>	<b>11</b>	<b>V</b>

## Notes

For standard materials see the table at page 2.400.4.

Options in the same grid are alternative to each others.

(1) Single acting actuators (SE) available from bore Ø 52.

(2) For matching between bore, flange and female key, see the single products data sheet.

AR400SEF16/2555	810160	Ø 400	52.6 l.	-

To calculate the actuator's cycle consumption use the formula on the right.  
For "A1" and "A2" values refer to the tables above, "P" is for the air pressure.

$$l./ciclo = A1 + A2 \times \frac{P + 1,013 \text{ bar}}{1,013 \text{ bar}}$$

To calculate the actuator's cycle consumption use the formula on the right.

For "A1" and "A2" values refer to the tables above, "P" is for the air pressure.

$$l./ciclo = A1 + A2 \times \frac{P + 1,013 \text{ bar}}{1,013 \text{ bar}}$$

# BALL VALVES

with rotary actuators

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Ball valves with rotary actuator single or double acting, with double rack.

The coupling between actuator and valve could be direct, thanks to the holes according to ISO 5211-DIN 3337 standard in the bottom of the actuator, or through adapters. The upper side of the actuator is according VDI/VDE 3845 NAMUR standards and allow mounting accessories such as CAM and position sensors. Side connections are threaded and for NAMUR valves (see from page 2.44.1 and from page 2.50.1).

Supplied as standard in compliance to Reach and RoHS directives, SIL certified and conforming to ATEX 2014/34/EU Directive.

### Series VSO..SE

from page 2.411.10

Series of brass full bore valves with aluminium single acting double rack rotary actuator. Ball valves available in size from 1/2" to 2".

### Series VSO..DE

from page 2.411.30

Series of brass full bore valves with aluminium double acting double rack rotary actuator. Ball valves available in size from 1/2" to 2".

### Series VSI..SE

from page 2.412.10

Series of Stainless Steel full bore valves with aluminium single acting double rack rotary actuator. Ball valves available in size from 3/8" to 2".

### Series VSI..DE

from page 2.412.30

Series of Stainless Steel full bore valves with aluminium double acting double rack rotary actuator. Ball valves available in size from 3/8" to 2".

## Code key

Series	Valve size	Actuator function <sup>(2)</sup>
<b>VSO</b>	<b>2034</b>	<b>DE</b>

VSO = Brass ball valve

---

VSI = Stainless Steel ball valve

2038 <sup>(1)</sup> = 3/8"

---

2012 = 1/2"

---

---

2114 = 1 1/4"

---

2112 = 1 1/2"

---

2200 = 2"

SE = Single acting

---

DE = Double acting

**ATEX note**

Actuators supplied according to 2014/34/EU ATEX Directive as standard

II 2G Ex h IIC T6 Gb  
 II 2D Ex h IIIC T85°C Db

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

## How to order

## Notes

Options in the same grid are alternative to each others.

For ball valves standard materials, see the tables in the products data sheet, while for actuators standard materials see page 2.400.4.

(1) Size available only for series VSI

(2) It is only possible to choose the function of the actuator, which will be supplied with the appropriate bore for the selected valve size. For combinations of valve size and actuator bore, see the table below.

## Features and certifications

Accessories for single and double acting rotary actuators: limit switch box and handwheel gearbox.

Limit switch box available in four series: three in aluminium (SB200 - SB200/Exia - SB500) and one in technopolymer (SB700). Every series is available with different limit switch types inside, and they are compatible with the actuators thanks to the universal adjustable brackets with holes according to ISO 5211-DIN 3337 standard. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified, series SB200/Exia and series SB500 are furthermore conforming to ATEX 2014/34/EU. Aluminium declutchable handwheel gearbox, compatible to pneumatic rotary actuators, are available in different size and supplied as standard in compliance to Reach and RoHS directives.

### Series SB200

from page 2.426.20

Series of aluminium limit switch box compatible with pneumatic rotary actuators. available with different limit switch types: mechanical, proximity and magnetic. On request they can be supplied conforming to 2014/34/EU ATEX Directive, in classification II 3G Ex ec / II 3D Ex tc.

### Series SB200/Exia

from page 2.426.25

Series of aluminium limit switch box compatible with pneumatic rotary actuators. available with different limit switch types: mechanical, proximity and magnetic. Supplied conforming to 2014/34/EU ATEX Directive, in classification Ex ia, as standard.

### Series SB500

from page 2.426.50

Series of aluminium limit switch box compatible with pneumatic rotary actuators. available with different limit switch types: mechanical, proximity and magnetic. Supplied conforming to 2014/34/EU ATEX Directive, in classification Ex db, as standard.

### Series SB700

from page 2.426.90

Series of technopolymer limit switch box compatible with pneumatic rotary actuators. available with different limit switch types: mechanical and proximity.

### Series GDB..

from page 2.428.1

Aluminium declutchable handwheel gearbox available in size from Ø 50 to Ø 254, compatible actuator side with pneumatic rotary actuators in bores from Ø 40 to Ø 400 (ISO flange from F05 to F25), and compatible valve side with ISO flange from F05 to F26, square from 17 mm to 60 mm.

### Code key

Series <sup>(1)</sup>	Limit switch type <sup>(1)</sup>	Limit switch suffix <sup>(1)</sup>
<b>SB500</b>	<b>P</b>	<b>122</b>

SB200
SB200/Exia
SB500
SB700

M = Mechanical
P = Proximity
Q <sup>(1)</sup> = Magnetic

012 = Silver contacts (Honeywell)
022 = Gold contacts (Honeywell)
052 = Silver contacts (E-Switch)
112 = PNP (Pepperl+Fuchs)

132/NJ2 = NAMUR NC (Pepperl+Fuchs)
142 = NAMUR NC (IFM)
512 = SPDT (ALMS)

### ATEX note

Limit switch box SB200, type M022, on request can be supplied conforming to 2014/34/EU ATEX Directive in classification:

Limit switch box SB200/Exia supplied as standard conforming to 2014/34/EU ATEX Directive in these classifications:

Limit switch box SB500 supplied as standard conforming to 2014/34/EU ATEX Directive in classification:

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

### How to order SB200 - SB500 - SB700

Series	Limit switch type	Limit switch suffix
<b>SB500</b>	<b>P</b>	<b>122</b>

### How to order SB200/Exia

Series	Limit switch type	Limit switch suffix	Atex
<b>SB200</b>	<b>P</b>	<b>132/NJ2</b>	<b>/Exia</b>

### Notes

Options in the same grid are alternative to each others.  
For standard materials see the table at page 2.425.4  
(1) For matching between limit switch box series limit switch type and limit switch suffix, see the table below.

### Matching series box/limit switch type

# SPEED REGULATORS

for rotary actuators and valves Series A1N

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Features and certifications

Speed regulators for rotary actuators double acting (series APNRDA) and single acting (series APNRSR) for direct mounting to combine with NAMUR valves series A1N and/or positioners.

Speed regulators are designed with particular care to the micrometric adjustment pin to control the actuators opening and closing speed. Can accurately control the rotation of the actuator at every speed constantly and safely, without the fluctuation which is usually seen in the common speed controllers.

Supplied as standard in compliance to Reach and RoHS directives.

For rotary actuators see from page 2.400.1

## Series APNRDA

from page 2.430.10

Series of speed regulator for double acting rotary actuators and 5/2, 5/3 valves.

## Series APNRSR

from page 2.430.20

Series of speed regulator for single acting rotary actuators and 3/2 valves.

## Series PNF

from page 2.430.50

Series of plates with threaded holes for the connection of fittings to speed regulators APNR. These plates are equipped with NAMUR interface and supplied complete with screws and O-ring.

## Code key

Series	Function
<b>APNR</b>	<b>DA</b>

APNR

# Speed regulators for rotary actuators and valves series A1N

## Series APNRDA

### Main features

Version	Code	Item	Symbol
For double acting actuators and 5/2 - 5/3 valves	810152	APNRDA	

### Technical data

Version	For double acting actuators and 5/2 - 5/3 valves
Code	810152
Item	APNRDA
Fluid	Compressed filtered and dried air
Pressure range	1,5 ÷ 10 bar
Temperature range	-20°C ÷ +60°C
Nominal orifice Ø	3.74 mm
Flow (at 5 bar)	750 NI/min.
Connections	NAMUR
Screws	M5x50 (2), M5x55 (2), M5x40 (2, for PNF plate, see page 2.56.20)

### Standard materials

Description	Material
Body	Anodized aluminium
Seals	NBR
Screws	Stainless Steel
Elements in contact with fluid	Aluminium, brass, NBR

### Standard dimensions

Type: APNRDA

Main features

Version	Code	Item	Symbol
For single acting actuators and 3/2 valves	810153	APNRSR	

Technical data

Version	For single acting actuators and 3/2 valves

### Compressed air treatment

The air destined for use in pneumatic devices must be suitably prepared.

It is taken from the surrounding environment for introduction into the compressor and is rich in impurities and water vapour.

The compressor itself inevitably releases lubricating oil into the air, which is very dangerous for the seals of the pneumatic components.

Following passage through the compressor, the compressed air is always stored in a large tank that has a dual function: to even out oscillations in pressure and to cool the compressed air.

Indeed, the high temperatures reached at the end of the compression process aid the evaporation of the water in the air against the condensing effect of the high pressures.

For these reasons, the tank located downstream of the compressor must be of a suitable size: in particular, in the case in which the compressor is volumetric and a high quantity of air is taken up.

It is very important that the compressed air has time to cool, allowing the water vapour contained in it to condense on the bottom of the tank, as it is considerably more convenient to eliminate as much of the water vapour as possible during this stage.

Even with these precautions, the percentage of humidity present in the compressed air remains important. Indeed, during distribution along the pipes, further condensation occurs, due to the further cooling of the air and despite the falls in pressure that aid the dissolution of the water. For this reason the distribution pipes must be slightly inclined (~2%) and feature umbrella-handle pipes at regular intervals that lead to small condensation collection tanks.

Particular attention must be paid to the lubricating oil, especially in the case of centrifugal compressors: it must be eliminated by means of appropriate oil extraction filters at the exit of the compressor.

The humidity of the air causes rust and corrosion in the metal pipes, deposits in the pneumatic devices and the formation of sleeves of ice at the discharge points in particular atmospheric conditions and for high-frequency use.

### Safety in pneumatic systems

The operating safety and lifespan of the pneumatic devices depend to a considerable degree upon the proper preparation of the compressed air that feeds them, which is obtained by means of a series of devices that are located upstream of the part of the apparatus described so far, but before the actual pneumatic system.

### Devices for compressed air treatment

Compressed air treatment equipment basically consists of: filters, pressure regulators, lubricators;  
Also part of them, by extension, are: pressure-gauges, soft-start valves, insertion and sectioning valves, air reservoirs.

### Filters

The impurities contained in the air: waste materials, powder, rust and humidity that condenses, can cause serious damage to the pneumatic components, compromising their functioning and duration, as they facilitate the wear of the flowing surfaces and the seals.

The filter have the important function of purifying the compressed air of solid particles and and, as a collateral effect associated with their operating characteristics, also of a percentage of the liquid ones.

The filters are constituted by: a body with threaded ports, a transparent cup screwed onto it and a filtering cartridge.

The compressed air to be filtered is conveyed in a tangential direction from the supply mouth to the cup, where it assumes a cyclonic movement which enables the separation of the larger solid particles and a good part of the liquid particles; both collect on the bottom of the cup, from where they are discharged on a regular basis.

The finer solid particles, on the other hand, are captured by the filtering cartridge, which is made from sintered material (bronze, ceramic material& ). Depending on its characteristics, the filtering cartridge captures solid particles of an average diameter of 40, 20 or 5 micron.

It is not possible in any case to restrain the liquid particles that do not collect on the bottom of the cup as they are drawn and pass the barrier. Consequently the effect of separation of the condensation, which is introduced by the filter, is a secondary one; it is necessary to take care to discharge the condensation that is produced otherwise a dynamic equilibrium is produced in which as much condensation is removed as is produced.

The filters are normally equipped with a separator, beneath the cartridge, whose task is to keep the slimy liquid deposited still; levels above the separator must be discharged.

It is always advisable to choose a larger size filter in order to have the benefits of a large cup, considerable cooling of the air and good separation of the impurities.

It is not in any case possible to hold back sufficient liquid particles to achieve the effective extraction of oil from the air: it is just a matter of time before the oil, which is not filtered upstream, reaches the pneumatic components. A considerable percentage of humidity will also always be present in the air downstream of the filter. In order to eliminate the oil of the air compressor, it is necessary to adopt special oil extraction filters.

The choice of the cartridge depends on the degree of cleanliness necessary for the air to be used in the system.

The more complex the system, with small and fast-moving components, the greater must be the degree of filtration of the cartridge.

The ideal filter is a component that does not introduce falls in pressure. Actually, a fall of pressure always exists around a filter and depends largely on the degree of filtration.

It is advisable to limit the fall of pressure to  $0.2 \div 0.3$  bar, as the production costs of compressed air are very high and, if it is wished to maintain the supply pressure of the components constant, each fall in pressure translates into greater pressure to be generated by the compressor.

The filtering cartridge gets dirty very easily: if cleaning is neglected the flow of air across the filter can be greatly reduced; furthermore, in order to minimize falls in pressure, it is wise to clean it frequently, removing the grease from it and drying it.

### Choosing size of filters

It is necessary to adapt the filters to the flow required by the system, or section of the system, which they feed.

The characteristic "fall in pressure - flow" curves of the filter are used for this purpose. They associate the variation in the falls in pressure around the filter with the variation of the flow and indicate the range of use (useful flow interval) of the component in an immediately comprehensible manner.

The range of use increases with the increase in the dimensions of the filter (of its ports).

It is advisable to choose a filter of such dimensions that, at the requested flow, the fall in pressure is maintained within the limits indicated above. In this case the filter also works well for the separation of the condensation.

An under-sized filter causes excessive falls in pressure, whilst the filtering effect is poor.

Normally a filter capable of providing the required flow, without high filtering capacities, but suitable for the supply of compressed air to the valves and pneumatic cylinders, is installed at the beginning of a system. Filters that provide better quality air are installed downstream of the derived devices - with a lower flow - that require it.

Type: A12F

Pressure regulators

Pressure adjustment is always necessary upstream of a pneumatic device: it prevents falls of pressure in the network from distorting the conditions of use. The performance of valves and pneumatic cylinders are highly dependant on the value of the supply pressure. Some components require precise and constant pressures in order to work properly.

A pressure regulator is always installed upstream of the system, and its task is to maintain the operating pressure at the output opening constant with the variation of the flow and the constant pressure in the tank.

Rapid and considerable variations in flow, corresponding to consumption peaks, tend to cause falls in pressure that can be controlled by the use of suitably sized reserve tanks.

The reduced operating pressure is less than the output pressure of the compressor; both must be appropriately controlled. Indeed, whilst it is true that lower material costs and, at an equivalent power, lower flows of used air would be incurred by making the pneumatic components function at high pressure, it is equally true that the production costs of compressed air are very high and increase considerably with the increase in the value of the pressure at which the air is supplied. If the thermodynamic efficiency of the compressor - which is notoriously bad and decreases with the increase in the final pressure - is multiplied by the bad conversion efficiency of mechanical energy into pressure energy, a very low final efficiency figure is obtained that justifies the high production costs of compressed air. In addition, it is necessary to consider the fact that it is, in practice, impossible to eliminate the losses of compressed air, which increase proportionately with the pressure.

On average, a system can lose up 20% of its compressed air through bad connections in correspondence with fittings and plugs. In the presence of two cost causes, one increasing and the other decreasing in relation to the pressure, it is possible to identify a pressure value that corresponds to the minimum cost.

The optimum operating pressure has long been established as 6 bar. The pressure in the tank must be that much higher in order to guarantee its cooling and energy flywheel functions.

Pressure regulators are basically constituted by:

- a body, divided into a bell (with hand-wheel for adjustments and spring) and an actual valve body (with obturator disc) equipped with threaded openings.
- a diaphragm between the two parts.

The air that arrives from the supply port is blocked (or allowed to pass) by an obturator disc which is opened and closed by means of a small rod controlled by the diaphragm in equilibrium between the two forces: one, above, (caused by a charged spring or a pressure) that is preset; the other, below, caused by the reduced pressure in the pipe downstream of the regulator.

Each variation in flow causes a temporary variation of the reduced pressure and thus an imbalance in these two forces that causes the movement of the diaphragm with the consequent opening or closure of the disc.

A reduction in flow causes the following temporary effects: an increase in the reduced pressure with the closure of the disc; an increase in the pressure fall, due to the reduction of the passage space and a decrease in the reduced pressure, with oscillations around the point of equilibrium, until it returns the previous value, which is the only one capable of balancing the preset force.

An increase in flow causes: a decrease in the reduced pressure; the opening of the disc; a decrease in the pressure fall, due to the increased passage space and an increase in the reduced pressure until it returns to the previous value.

In both cases the pressure regulator restores the conditions of equilibrium with a new position of the obturator disc, which is suited to the changed flow demand.

In the case of constant supply pressure and highly variable flows, the pressure regulators are self-adjusting; i.e. they maintain the reduced pressure basically constant. The greater the dimensions of the diaphragm, the greater the sensitivity of the reducer and its ability to maintain the reduced pressure constant.

Choosing size of pressure regulators

The characteristic "fall in reduced pressure - flow" curves are used for this purpose as they provide the range of use of the component in an immediately comprehensible manner.

It is always advisable to choose a regulator capable of supplying the flow of air required by the system, upstream of which it is installed, with as low a possible fall in reduced pressure: max. 0.5 bar.

The range of use of the regulator is associated with the dimensions of the ports used (standardized) and thus to the dimensions of the regulator. In order to achieve sensitivity, speed of response and small falls, it is necessary to choose large bodies with large diaphragms.

Two basic types of regulators can be identified:

- precision regulators, with large diaphragms
- commercial regulators, where the aesthetic aspect is important.

In order to achieve the most precise and easiest setting of the pressure, various ranges of reduced pressure are supplied for each type of regulator, by equipping them with pre-charging springs with different elastic constants.

Another significant construction characteristic for the choice of a regulator is the presence of a device that enables excess pressure in relation to the preset reduced value to be discharged into the atmosphere; in the absence of flow, this is achieved by simply varying the charge of the spring.

This process, known as relieving, consists in equipping the diaphragm with a hole with a seal upon which the controlled rod rests. As the disc reaches the end of its stroke against the closure opening, each further increase in pressure raises the diaphragm above the rod, releasing the air from a hole in the bell until equilibrium is restored.

### Lubricators

The pneumatic devices are equipped with mechanical organs with relative movement and consequently require lubrication, which is also important in order to limit wear of the seals.

Valves and pneumatic cylinders are currently supplied with assembly lubrication, which is capable of ensuring them a long life in normal working conditions.

Lubrication is necessary in the case of pneumatic tools and particular working conditions (e.g. components that operate at high speeds or in the presence of high temperatures, which are conditions that cause the assembly lubrication to evaporate and be removed by the air).

Lubrication is performed by lubricating the air that flows through the components with mineral oil that does not contain additives that could corrode the seals.

The task of the lubricators is to dose the air with a certain quantity of nebulized oil.

The air itself transports the oil along stretches of piping, the length of which increases as the size of the drops of the micro-mist decrease.

The lubricators are made up of:

- a body with threaded ports, containing a Venturi connected by means of a small tube
- a cup, to be screwed onto the body, into which the lubricating oil is poured.

The air, entering from the supply opening, crosses the Venturi constriction, where it creates a reduction in pressure that draws the oil from the cup through the small tube, nebulizing it and sending into the pipes.

An adjustment screw makes it possible to regulate the quantity of oil introduced.

There is a minimum operating flow, characteristic of each range of lubricators, beneath which a sufficient fall in pressure is not achieved in the constriction and consequently the oil is not drawn.

### Choosing size of lubricators

The characteristic "fall in pressure - flow" curves are used for this purpose as they permit the rapid identification of the range of use.

It is advisable to choose the lubricator in such a way as to limit the falls of pressure.

The flows provided are, as always, associated with the dimensions and thus to the ports of the lubricator.

## Main features and certifications

Aluminium modular air treatment units.  
Supplied as standard in compliance to Reach and RoHS directives, and SIL certified.

### Filters series A..F, 1/4" ÷ 1"

from page 3.2.20

Aluminium modular filters, available in sizes 1/4", 3/8", 1/2" and 1". Equipped with 25µm filtering element and semi-automatic condense drain. The polycarbonate cup is with metal protection.  
Mounting brackets to be ordered separately.  
Spare parts available for filter cartridge, cup and cup seals.

### Mist separators series A..FD, 3/8" ÷ 1"

from page 3.2.30

Aluminium modular mist separators, available in sizes 3/8", 1/2" and 1". Equipped with 0.3µm filtering element and semi-automatic condense drain. The polycarbonate cup is with metal protection.  
Mounting brackets to be ordered separately.  
Spare parts available for filter cartridge, cup and cup seals.

### Regulators series A..R, 1/4" ÷ 1"

from page 3.2.50

Aluminium modular regulators, available in sizes 1/4", 3/8", 1/2" and 1". Equipped with relieving valve and practical plastic regulation knob with position lock.  
Pressure-gauges and mounting brackets to be ordered separately.  
Spare parts available for regulator diaphragm.

### Precision regulators series A..RP, 1/8" ÷ 1/2"

from page 3.2.60

Aluminium modular precision regulators, available in sizes 1/8", 1/4" and 1/2". Equipped with relieving valve (also with threaded exhaust for size 1/2" only) and practical plastic regulation knob.  
Pressure-gauges and mounting brackets to be ordered separately.

Note:  
Size 1/8" can be mounted in combination with modular component size 1/4" only.  
Size 1/4" can be mounted in combination with modular component size 3/8" only.  
Size 1/2" can be mounted in combination with modular component size 1/2" only.

### Lubricators series A..L, 1/4" ÷ 1"

from page 3.2.80

Aluminium modular lubricators, available in sizes 1/4", 3/8", 1/2" and 1". Equipped with oil regulation cup, and polycarbonate cup with metal protection.  
The lubricant can be added without stopping the air supply.  
Mounting brackets to be ordered separately.  
Spare parts available for oil regulation cup, cup and cup seals.

Lubricators with large capacity cup series A..LG, 1/4" from page 3.2.90

Aluminium modular lubricators with large capacity cup, available in size 1/4" only. Equipped with oil regulation cup and wide visibility polycarbonate cup. The lubricant can be added without stopping the air supply. Mounting brackets to be ordered separately.

Filter-regulators series A..FRR, 1/4" ÷ 1" from page 3.2.110

Aluminium modular filter-regulators, available in sizes 1/4", 3/8", 1/2" and 1". Equipped with 25µm filtering element, semi-automatic condensate drain, relieving valve and plastic handy regulation knob with position lock. The polycarbonate cup is with metal protection. Pressure-gauges and mounting brackets to be ordered separately. Spare parts available for regulator diaphragm, filter cartridge, cup and cup seals.

Filter-regulators + lubricators series A..FRRL, 1/4" ÷ 1" from page 3.2.140

Aluminium modular filter-regulators with lubricator, available in sizes 1/4", 3/8", 1/2" and 1". Equipped with 25µm filtering element, semi-automatic condensate drain, relieving valve, oil regulation cup and plastic handy regulation knob with position lock. The polycarbonate cups are with metal protection. The lubricant can be added without stopping the air supply. Supplied assembled with "T" type bracket. Pressure-gauges and further mounting brackets to be ordered separately. Spare parts available for regulator diaphragm, oil regulation cup, filter cartridge, cup and cup seals.

Soft-start solenoid operated valves series AVP..E, 1/4" ÷ 1/2" from page 3.2.200

Aluminium modular soft-start solenoid operated valves, available in sizes 1/4", 3/8" and 1/2", allow the gradual pressurization of pneumatic systems at startup. Ideal as emergency sectioning valves, with rapid downstream line exhaust. These valves ensure low consumption, are equipped with manual override and exhaust function. Coils, connectors, pressure-gauges and mounting brackets to be ordered separately.

Soft-start air operated valves series AVP..P, 1/4" ÷ 1/2" from page 3.2.210

Aluminium modular soft-start air operated valves, available in sizes 1/4", 3/8" and 1/2", allow the gradual pressurization of pneumatic systems at startup. Ideal as emergency sectioning valves, with rapid downstream line exhaust. These valves ensure low consumption and are equipped with exhaust function. Pressure-gauges and mounting brackets to be ordered separately.

Exhaust manual operated valves series VMS, 1/4" ÷ 1" from page 3.2.250

Aluminium modular exhaust manual operated 3 way valves, available in sizes 1/4", 3/8", 1/2" and 1", allow manual exhaust of residual air from the system. Padlock applicable to the operating knob to prevent unauthorized use. Mounting brackets to be ordered separately.

## Options

Description	Symbol	Suffix
Filter cartridge 5 µm		<b>5</b>
Automatic condense drain for filter (only for sizes 3/8" - 1/2" - 1")		<b>SA</b>
Metal cup		<b>TM</b>
Regulation range 0,5 ÷ 4 bar		<b>04</b>
Regulation range 0,1 ÷ 4 bar		<b>01-4</b>
Regulation range 0,1 ÷ 8 bar		<b>01-8</b>
NPT thread		<b>NPT</b>

The options, when this is possible, can be combined with each other. For options matching see table on the next page; For code key see from page 3.2.6

090274	A14RP01-2	1/4"		
090277	A12RP01-2	1/2"		

### Technical data

Type	A18RP01-2	A14RP01-2	A12RP01-2
Size	1/8"	1/4"	1/2"
Fluid	Compressed air		
Maximum inlet pressure	10 bar		
Pressure regulation range	0,1 ÷ 2 bar (standard)	0,1 ÷ 4 bar (01-4)	0,1 ÷ 8 bar (01-8)
Temperature range	0°C ÷ +60°C		
Pressure regulator	Piston		
Overpressure relief	Relieving		Relieving + threaded exhaust (1/2")
Gauges port	1/8"		
Weight	150	330	680

### Matching note

Size 1/8" can be mounted in combination with modular component size 1/4" only.  
 Size 1/4" can be mounted in combination with modular component size 3/8" only.  
 Size 1/2" can be mounted in combination with modular component size 1/2" only.

### Notes

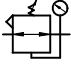

Spacers and mounting brackets to be ordered separately, see page 3.2.300  
 Pressure-gauges to be ordered separately, see from page 3.30.1

Pressure-gauges to be ordered separately, see from page 3.30.1

Coils and connectors to be ordered separately, see page 2.315.1

## Operating conditions

Pressure in the start-up phase of the valve

Flow rate related to turns of adjustment needle (P = 5 bar)

### Start-up phase

By actuating the electro-pilot E, or pushing the manual override M, air will push the poppet T down opening this way the main power valve and at the same time, closing the exhaust (R). Air from inlet (P) will go through the regulation needle S and then to the outlet (A). Opening speed can be adjustable by the side screw.

### Switching and working phase

In the moment the pressure difference between (A) and (P) is  $(A) \geq \frac{1}{2} (P)$ , the poppet U fully open and outlet pressure (A) rapidly increase until equalize inlet pressure in (P). Soft-start valve will not represent any obstacle for the air-flow going through it.

### Closing and exhausting phase

By deactivating electro-pilot E, or releasing the manual override M, the poppet T will reposition stopping the air from inlet (P) and contemporary exhaust the downstream air in the circuit from the exhaust (R).

# F-R-L UNITS

1-1/2" and 2"

Find out our  
key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Aluminium air treatment units: filters (F), regulators (R) and lubricators (L) available in sizes 1-1/2" and 2". The regulators are equipped with relieving valve. Polycarbonate cups with metal protection.  
 Supplied as standard in compliance to Reach and RoHS directives, and SIL certified.  
 Pressure-gauges to be ordered separately.

## Filters series A..F, 1-1/2" and 2"

from page 3.6.20

Aluminium filters available in sizes 1-1/2" and 2". Equipped with 25µm filtering element and semi-automatic condense drain. The polycarbonate cup is with metal protection.  
 Spare parts available for filter, cup and cup seals.

## Regulators series A..R, 1-1/2" and 2"

from page 3.6.50

Aluminium regulators available in sizes 1-1/2" and 2". Equipped with relieving valve and practical plastic regulation knob.  
 Pressure-gauges to be ordered separately.

## Lubricators series A..L, 1-1/2" and 2"

from page 3.6.80

Aluminium lubricators available in sizes 1-1/2" and 2". Equipped with oil regulation cup, and polycarbonate cup with metal protection. The lubricant can be added without stopping the air supply.  
 Spare parts available for oil regulation cup, cup and cup seals.

Options		
Description	Symbol	Suffix
Filter cartridge 5 µm		<b>5</b>
Automatic condense drain		<b>SA</b>
Metal cup		<b>TM</b>
NPT thread		<b>NPT</b>

The options, when this is possible, can be combined with each other. For options matching see the table below; For code key see from page 3.6.4

# MICROREGULATORS

Find out our  
key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Components to reduce, regulate and maintain constant pressure in an industrial plant.  
Supplied as standard in compliance to Reach and RoHS directives.  
Pressure-gauges and mounting brackets to be ordered separately.

## Microregulators series AC700, 1/8" ÷ 1/4"

from page 3.10.10

Series of microregulators with compact design.  
Standard relieving with safety knob position lock.  
Mounting brackets and pressure-gauges to be ordered separately.

## Code key

Series	Type		Size

# PRESSURE-GAUGES

vacuum-gauges and pressure switches

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Analogic or digital pressure gauges, digital vacuum-gauges and pressure switches.  
 Supplied as standard in compliance to Reach and RoHS directives.  
 Mounting brackets to be ordered separately.

### Analogic pressure-gauges, series M

from page 3.30.20

"Dry" analogic pressure-gauges for pressure sensing in pneumatic systems, with rear connection. Available in three dial sizes (Ø 40, 50 and 63), 1/8" or 1/4" connections, in different scale (from -1+0 bar up to 0+12 bar).

### Analogic pressure-gauges, series MR

from page 3.30.20

"Dry" analogic pressure-gauges for pressure sensing in pneumatic systems, with in-line connection. Available in three dial sizes (Ø 40, 50 and 63), 1/8" or 1/4" connections, in different scale (from -1+0 bar up to 0+12 bar).

### Analogic pressure-gauges, series MF

from page 3.30.20

"Dry" analogic pressure-gauges for pressure sensing in pneumatic systems, with rear connection and flange. Available in three dial sizes (Ø 40, 50 and 63), 1/8" or 1/4" connections, in different scale (from -1+0 bar up to 0+12 bar).

### Analogic pressure-gauges, series MP

from page 3.30.20

"Dry" analogic pressure-gauges for pressure sensing in pneumatic systems, with rear connection and panel bracket. Available in three dial sizes (Ø 40, 50 and 63), 1/8" or 1/4" connections, in different scale (from -1+0 bar up to 0+12 bar).

### Digital pressure-gauges, series AKP60P

from page 3.30.40

Digital pressure-gauges for pressure sensing in pneumatic systems, with rear 1/8" or 1/4" connections, with these features: backlight; easy and fast reading; lithium battery power supply; quick and easy installation; 4 programmable pressure units (MPa, kgf/cm<sup>2</sup>, bar, psi) shown on display; power-saving mode; protection class IP65.

### Digital vacuum-gauges, series AKP60V

from page 3.30.40

Digital vacuum-gauges for vacuum sensing in pneumatic systems, with rear 1/8" or 1/4" connections, with these features: backlight; easy and fast reading; lithium battery power supply; quick and easy installation; 4 programmable pressure units (kPa, bar, psi, mmHG) shown on display; power-saving mode; protection class IP65.

### Digital pressure switches, series AKP43

from page 3.30.60

Digital pressure switches for instantaneous pressure display and also transmission of electrical signals, in positive pressure, vacuum and combined pressure versions. Available with 1/8" connection, PNP or NPN circuit, and these features: three color LCD display; backlight, easy and fast reading; 12+24 VDC (±10%) power supply; 7 programmable pressure units (kPa, MPa, kgf/cm<sup>2</sup>, bar, psi, mmHG, inHG) shown on display.

## Analogic pressure-gauges code key

## Digital pressure switches, 1/8"

### Main features

Series	Description	Symbol
AKP43P..	Positive pressures digital switch	
AKP43V..	Vacuum digital switch	
AKP43C..	Combined pressures digital switch	

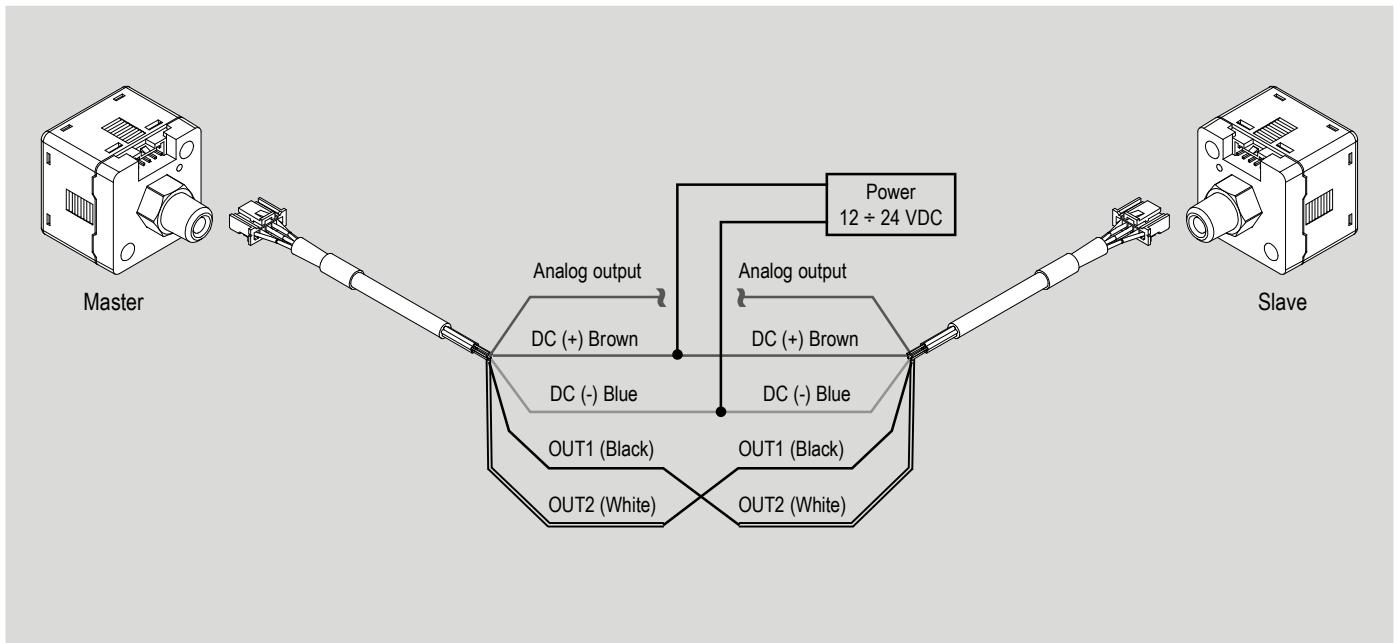

### Technical data

Series	AKP43P	AKP43V	AKP43C
Fluid	Compressed filtered air, incombustible and non-corrosive gases		
Function	Positive pressures digital switch	Vacuum digital switch	Combined pressures digital switch
Rated pressure range <sup>(1)</sup>	0 ÷ 10 bar	-1,01 ÷ 0 bar	-1 ÷ 1 bar
Display pressure range <sup>(2)</sup>	0,1 ÷ 10 bar	-1,01 ÷ + 0,1 bar	-1,01 ÷ + 1,01 bar
Maximum pressure	15 bar	3 bar	
Pressure units	MPa, kgf/cm2, bar, psi	kPa, kgf/cm2, bar, psi, inHg, mmHg	
Pressure resolution	- 0.001 MPa 0.01 kgf/cm2 0.01 bar 0.1 psi - -	1 kPa - 0.001 kgf/cm2 0.001 bar 0.01 psi 0.01 inHg 1 mmHg	
Repeatability	≤ ±0.2% F.S. ±1 digit		
LCD display	Red / Green main&unit display - Orange sub-display (7 segment)		
Protection class	IP40		
Temperature range	0 ÷ +50°C		
Ambient humidity range	35 ÷ 85 %RH (without condense)		
Voltage	12 ÷ 24 V DC (±10%)		
Current consumption	≤ 40 mA (without load)		
Switch output (protected from over-run)	Open collector NPN (two outlets)	Open collector PNP (two outlets)	
	Max. load current: 125 mA	Max. load current: 125 mA	
	Max. supply voltage: 30V DC	Max. supply voltage: 24V DC	
	Residual voltage: ≤ 1.5V	Residual voltage: ≤ 1.5V	
	Response time: ≤ 2,5 ms (chattering-proof function 25, 100, 250, 500, 1000, 1500 ms)		
Hysteresis <sup>(3)</sup>	Adjustable		
Analog output	Output current: 1 ÷ 5V ± 2,5% F.S.		
	Linearity ± 1% F.S.		
	Output impedance ≈ 1kΩ		
Connections	1/8" - M5		
Main cable (included)	Oil resistant cable (0,15mm2) - Lenght 200 mm		

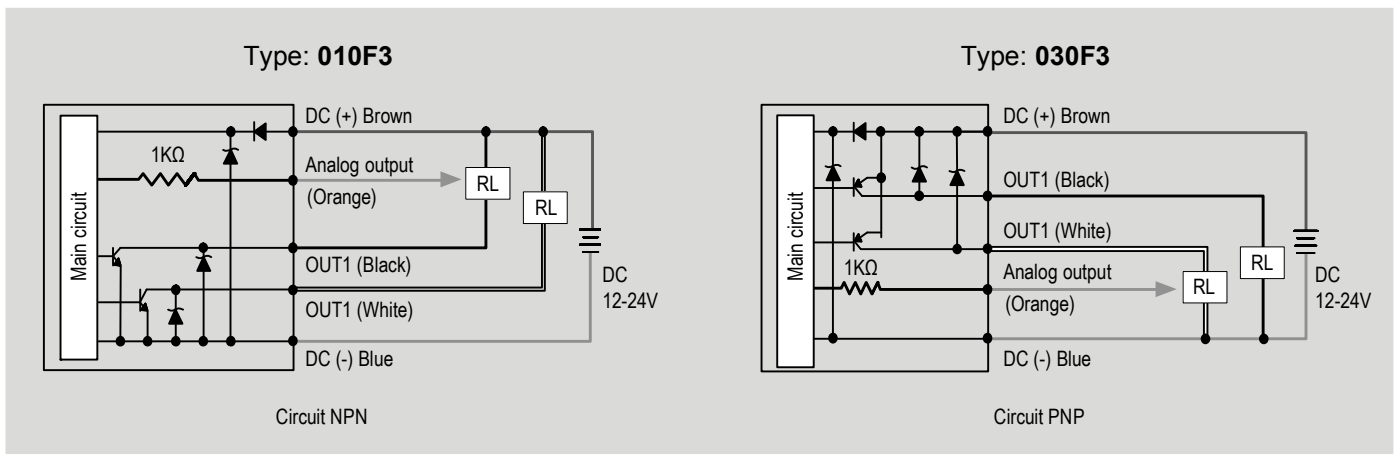

### Notes

- (1) Pressure range within technical features of components are granted.  
 (2) Pressure range possible to display on component. Pressure values displayed can also be off the nominal pressure range and in this case technical features are not granted.  
 (3) Hysteresis value adjustable from 1 to 8 digits.

Fast delivery

## Main features and certifications

End-of-line components. Accessories with different functions to meet a variety of needs in an industrial plant. Supplied as standard in compliance to Reach and RoHS directives.

### Automatic condense drains series A..FLSA, 1/4" ÷ 1/2"

from page 3.40.10

Automatic condense drains, available in size 1/4", 3/8" and 1/2". For installation at the end of the line to grant the drain of the condense accumulating in the system.  
With metal cup protection and air interception as standard, and with automatic or manual exhaust option.

### Silenced exhaust filters series A..FLFS, 1/4" ÷ 1/2"

from page 3.40.30

Silenced exhaust filters, available in size 1/4", 3/8" and 1/2". For installation at the end of the line to reduce the noise of the system exhaust, recover residual oil and water, and keep the whole system clean.  
Supplied complete of mounting bracket

Code key

Series	Size	Type
<b>A</b>	<b>12</b>	<b>FLSA</b>
A	14 = 1/4"	FLSA = Automatic condense drains
	38 = 3/8"	FLFS = Silenced exhaust filters
	12 = 1/2"	

How to order

Notes

For standard materials see table below.  
Options in the same grid are alternative to each others.

Standard materials

Position	Description	Material	
		A..FLSA	A..FLFS
1	Body	Aluminium	
2	Cup	Polycarbonate	
3	Cup protection	Aluminium	-
4	Drain system	Acetalic resin - NBR	Aluminium alloy (LY12)
5	Air release valve	Acetalic resin - NBR	-
6	Seals	NBR	
7	Support screw	POM	Stainless Steel
8	Filtering element	POM	Noise-absorbing fiber with metal protection
9	Drain valve	POM	Nylon (PA6)

3 - AIR TREATMENT

Main features

Code	Item	Size	Function	Symbol
090295	A14FLSA	1/4"	Automatic condense drain	
090296	A38FLSA	3/8"		
090257	A12FLSA	1/2"		

Technical data

Type	A14FLSA	A38FLSA	A12FLSA
Size	1/4"	3/8"	1/2"
Fluid	Compressed air		
Maximum inlet pressure	15 bar		
Pressione d'esercizio	1,5 ÷ 10 bar		
Temperature range	+5°C ÷ +60°C		
Drain type	Normally open		
Drain operation	Automatic		
Mounting	Vertical		

Operation notes

When any pressure is applied, the float drops and the valve closes the chamber bore. The piston is pushed down by the spring and drainage passes through the elongated chamber bore to enter the housing and be discharged.

When a pressure greater than 1.5 bar is applied in the chamber, it overcomes the spring force, allowing the piston to rise and, adhering to the o-ring, insulates the inside of the chamber from the outside.

When the condense is accumulated the float rises and opens the chamber bore, allowing drainage through its guide.

# MOUNTING

accessories

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Mounting accessories for modular components, for microregulators and for digital pressure-gauges, vacuum-gauges and pressure switches. Available in different types and sizes. Supplied as standard in compliance to Reach and RoHS directives.

### Spacers series D, 1/4" ÷ 1"

from page 3.92.1

Spacers for modular components, available in sizes from 1/4" to 1". Equipped with O-ring, allow the mounting of two modular components through the "in"/"out" port. Compatible with all modular components.

### Spacers with "T" type porting block series DT, 1/4" ÷ 1"

from page 3.92.1

Spacers with "T" type porting block for modular components, available in sizes from 1/4" to 1". Equipped with O-ring, allow the mounting of two modular components through the "in"/"out" port. Thanks to the threaded "T" connection on the component, it is possible to obtain an air flow detour or apply pressure switches. It can be used for connection between filters type A..F and regulators type A..R, mounted with knob facing the opposite side from the "T" type port.

### Spacers with "L" type bracket series DSL, 1/4" ÷ 1"

from page 3.92.2

Spacers with "L" type bracket for modular components, available in sizes from 1/4" to 1". Equipped with O-ring, allow the mounting of two modular components through the "in"/"out" port, and allow also the fastening of the assembly, thanks to the "L" bracket. Spare brackets to be ordered separately.

### Spacers with "T" type bracket series DST, 1/4" ÷ 1"

from page 3.92.3

Spacers with "T" type bracket for modular components, available in sizes from 1/4" to 1". Equipped with O-ring, allow the mounting of two modular components through the "in"/"out" port, and allow also the fastening of the assembly, thanks to the "T" bracket. Spare brackets to be ordered separately.

### Brackets series SR, 1/4" ÷ 1"

from page 3.94.1

Mounting brackets for regulators, filter-regulators and microregulators, available in sizes from 1/4" to 1". Allow the single component panel mounting.

### Brackets series SRP, 1/8" ÷ 1/2"

from page 3.94.2

Mounting brackets for precision regulators available in sizes from 1/8" to 1/2". Allow the single component panel mounting.

### Brackets series SFL, 1/4" ÷ 1"

from page 3.94.2

Mounting brackets for filters, mist separators and lubricators, available in sizes from 1/4" to 1". Allow the single component panel mounting.

### Mounting brackets series ABT and AKP, 1/8" ÷ 1/4"

from page 3.96.1

Mounting brackets for digital pressure-gauges, vacuum-gauges and pressure switches. Compatible with size 1/8" and 1/4". Available in versions straight and type "L". Allow the component panel mounting.

### Panel adapters series APAC and APAD, 1/8" ÷ 1/4"

from page 3.96.10

Panel adapters for digital pressure-gauges, vacuum-gauges and pressure switches. Compatible with 1/8" and 1/4". Available in version with or without front protective lip. Allow the component panel mounting.

# PUSH-IN

fittings

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Push-in fittings in nickel-plated brass, for high pressures, and main body in acetalic resin (POM). Available in many versions, threads and tube diameters. Supplied as standard in compliance to Reach and RoHS directives.

## Series R

from page 4.3.1

Series of push-in fittings in nickel-plated brass, with reduced dimensions, for connecting Nylon and Polyurethane tubes, with new collet and release collet design. Available in different configurations, with taper BSPT threads and BSP with O-ring, in various sizes. Stud threaded versions are supplied as standard with internal and external hexagonal wrench (for narrow places mounting).

## Series RHP

from page 4.5.1

Series of push-in fittings in nickel-plated brass for high pressures, suitable for use in the lubrication field. They can be used up to 250 bar. Available in different configurations, with taper BSPT threads, in various sizes.

## Series RP

from page 4.7.1

Series of push-in fittings in acetalic resin (POM), with reduced dimensions, for connecting Nylon and Polyurethane tubes, with new collet and release collet design. Available in different configurations, with taper BSPT threads and BSP with O-ring, in various sizes. Stud threaded versions are supplied as standard with internal and external hexagonal wrench (for narrow places mounting).

# Push-in fittings

### Notes

For standard materials see the table below.

\* For matching between fitting type, tube diameter and thread, see from page 4.3.2; for the specific type, see the following pages.

### How to order

Series	Type	Ø Tube	Thread	Option
<b>R</b>	<b>11</b>	<b>08</b>	<b>18</b>	<b>V</b>

### Technical data

Version	Series R	
Fluid	Compressed air	
Maximum pressure	20 bar	
Vacuum	-99 KPa	
Temperature range	-20°C ÷ +80°C (standard) -10°C ÷ +150°C (V)	
Parallel threads	UNI - ISO 228 / 1 (BSP)	
Taper threads	UNI EN 10226-1 (BSPT)	
Metric threads	UNI EN ISO 965-1	
Tubes	Calibrated Nylon (PA6), PU and Rilsan (PA11)	
Tubes tolerance	Ø 3 mm ÷ Ø 10 mm	±0,07 mm
	Ø 12 mm ÷ Ø 16 mm	±0,1 mm

### Standard materials

Position	Description	Material
1	Body	Nickel-plated brass
2	Release collar	Nickel-plated brass
3	Sealing ring	Acetalic resin (POM)
4	Collet	Stainless Steel AISI 301
5	Protection ring	Acetalic resin (POM)
6, 7	Seals	NBR

Cartridge seat drilling plan

Drill the cartridge seat with the drilling tool (fig. 1) following the instructions (fig. 4);  
Then manually press the cartridge inside the seat, until it rests on the seat plane, with the Assembly Tool (fig.2);  
Doing this way will ensure that the insertion has been made (fig. 3).  
Drilling tool and Assembly tool available on request. For further informations, please contact the sales department.

key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Rapid fittings in nickel-plated brass. Available in many versions, threads and tube diameters. Supplied as standard in compliance to Reach and RoHS directives.

## Series C

from page 4.20.10

Series of rapid fittings, for connecting Nylon and Polyurethane tubes, to use in all those applications needing a safer tube-fitting connection. Available in different configurations, with taper BSPT threads and BSP threads, in various sizes. Some types are equipped with washer and O-ring.

Code key

**Notes**

For standard materials see the table below.

\* For matching between fitting type, tube diameter and thread, see from page 4.20.11; for the specific type, see the following pages.

Technical data

Version	Series C	
Fluid	Compressed air	
Maximum pressure	Always higher than the tube	
Vacuum	-99 KPa	
Temperature range	-20°C ÷ +90°C	
Parallel threads	UNI - ISO 228 / 1 (BSP)	
Taper threads	UNI EN 10226-1 (BSPT)	
Metric threads	UNI EN ISO 965-1	
Tubes	Calibrated Nylon (PA6), PU and Rilsan (PA11)	
Tubes tolerance	Ø 4 mm ÷ Ø 10 mm	±0,07 mm
	Ø 12 mm ÷ Ø 15 mm	±0,1 mm

Standard materials

Position	Description	Material
1	Body	Nickel-plated brass

# COMPRESSION

## fittings

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Compression fittings in nickel-plated brass. Available in many versions, threads and tube diameters. Supplied as standard in compliance to Reach and RoHS directives.

8434

2353

## Series O

from page 4.25.10

Series of compression fittings for brass tubes. The ogive crushing onto the tube, by screwing down the external nut, allows to get a safe connection even at high pressures. The ogive is single cone.

The fitting seats, the ogives and the nuts are conforming to DIN 3870-3861 standards. The series of compression fittings is also suitable for connecting "soft" tubes (Rilsan, Polyurethane, Nylon etc.), by applying a tube insert inside the tube. Available in different configurations, with taper BSPT threads and BSP threads, in various sizes.

# Compression fittings

## Series O

### Code key

Series	Type*	Ø Tube*	Thread (or Ø Tube 2)*
<b>O</b>	<b>11</b>	<b>06</b>	<b>18</b>
O	11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27	04 = Ø 4 mm 06 = Ø 6 mm 08 = Ø 8 mm 10 = Ø 10 mm 12 = Ø 12 mm 15 = Ø 15 mm	M5 = M5x0,8 18 = 1/8" 14 = 1/4" 38 = 3/8" 12 = 1/2"

Series	Type	Ø Tube	Thread
<b>O</b>	<b>11</b>	<b>06</b>	<b>18</b>

**Notes**

For standard materials see the table below.

\* For matching between fitting type, tube diameter and thread, see page 4.25.11; for the specific type, see the following pages.

### Technical data

Version	Series O
Fluid	Compressed air
Maximum pressure	According to the used tube. Maximum 60 bar.
Temperature range	According to the used tube.
Parallel threads	UNI - ISO 228 / 1 (BSP)
Taper threads	UNI EN 10226-1 (BSPT)
Metric threads	UNI EN ISO 965-1
Tubes	Metal Calibrated Nylon (PA6), PU and Rilsan (PA11) (with tube insert)

### Standard materials

Position	Description	Material
1	Body	Nickel-plated brass
2	Ogive	Brass
3	Nut	Nickel-plated brass

# STANDARD

fittings

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Standard fittings in nickel-plated brass. Available in many versions and threads.  
Supplied as standard in compliance to Reach and RoHS directives.

## Series A

from page 4.35.10

Series of standard fittings available in many configurations, to adapt the connections of every installation. Available with taper BSPT threads and BSP threads, in various sizes.

# Standard fittings

## Series A

### Code key

Series	Type*	Thread 1*	Thread 2*
<b>A</b>	<b>002</b>	<b>12</b>	<b>14</b>

A

001, 002, 003, 004, 005, 006, 007, 008, 009, 010, 011, 012, 013, 014, 015, 016, 021, 022, 023, 024, 025, 026, 027, 035, 036, 039, 040, 041, 042, 044, 045, 046, 047

M5 = M5x0,8
18 = 1/8"
14 = 1/4"
38 = 3/8"
12 = 1/2"
34 = 3/4"
01 = 1"

### Notes

For standard materials see the table below.

For special versions (**/S**), contact the sales department.

\* For matching between fitting types and thread, see from page 4.35.12; for the specific type, see the following pages.

### How to order

Series	Type	Thread 1	Thread 2
<b>A</b>	<b>002</b>	<b>12</b>	<b>14</b>

### Technical data

Version	Series A
Fluid	Compressed air
Maximum pressure	60 bar
Temperature range*	-40°C ÷ +150°C
Parallel threads	UNI - ISO 228 / 1 (BSP)
Taper threads	UNI EN 10226-1 (BSPT)
Metric threads	UNI EN ISO 965-1

\* For fittings with NBR seal is -20°C ÷ +80°C

### Standard materials

Position	Description	Material
1	Body	Nickel-plated brass
2	Thread	Nickel-plated brass
3	Seal*	NBR

\*Where present

# QUICK-LOCK

fittings

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Quick-lock couplings single shut off (only on coupling) in brass not nickel-plated. Connection tightness of the coupling with the stem is granted by a series of spheres. This allows a longer life time even when connections and disconnections are frequent. Divided in couplings (type KA) and stems (type SF), are available in different sizes (20, 21 and 26) and many configurations. Supplied as standard in compliance to Reach and RoHS directives.

## Quick-lock couplings

from page 4.40.10

Quick-lock couplings in standard brass (not nickel-plated) with european profile. Available in many configurations and in three sizes. Size 20 (DN 2,7) is compact dimensions and can be used in different fields, suitable for chemical, medical, pharmaceutical and similar. Size 21 (DN 5) is the most common size, so is used in various fields. Size 26 (DN 7,2) is the biggest, is used in almost every field, and is often called "universal".

## Notes

The options in the same grind are alternative to each others.  
 For standard materials and technical features see page 4.40.12  
 (1) For matching between size, coupling, stem, type and thread or tube diameter, see from page 4.40.11; for the specific type, see the following pages.  
 On request are also available other types, sizes, material, seals and surface treatments. For further infomations and availability, please contact the sales department.

# MULTIPLE

connectors

Find out our  
key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Multiple connectors available in different sizes and configurations.  
Supplied as standard in compliance to Reach and RoHS directives.

### Series A013P (complete connector)

from page 4.55.10

Series of multiple connectors size 1, available in different configurations (number and size of tubes), with check valve.

### Series A113P (complete connector)

from page 4.55.10

Series of multiple connectors size 1, available in different configurations (number and size of tubes), without check valve.

### Series A213P (complete connector)

from page 4.55.10

Series of multiple connectors size 2, available in different configurations (number and size of tubes), without check valve.

### Plugs and Sockets (supplied separately)

from page 4.55.20

Series of plugs and sockets for multiple connectors size 1 and 2, supplied separately in different configurations (number and size of tubes), with or without check valve.

## Code key\*

Series	Type <sup>(1)</sup>	-	Tubes size <sup>(1)</sup>	-	Tubes number <sup>(1)</sup>

# Multiple connectors

## Complete connector

### Main features

Type	Description	Symbol
A013P..	Size 1, with push-in fittings and check valve. In technopolymer.	
A113P..	Size 1, with push-in fittings, without check valve. In technopolymer.	
A213P..	Size 2, with push-in fittings, without check valve. In technopolymer.	

### Function

Multiple connectors are normally used when is required to disconnect more connections quickly with only one operation. The disconnection of tubes in the socket is with push-in fittings. Is also possible to connect a smaller number of tubes. The plug cannot be assembled in the reverse side of the socket.

### Technical data

Series	A013P..		A113P..			A213P..		
Size	1					2		
Fluid	Compressed air							
Pressure range	0 ÷ 7 bar		0 ÷ 12 bar

# COLLECTORS

Find out our  
key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Collectors in anodized aluminium, available in different configurations, sizes and thread. Supplied as standard in compliance to Reach and RoHS directives.

### Series RX

from page 4.60.10

Series of collectors with cross outlets. Sizes from 1/8" to 1/2".

### Series RY

from page 4.60.20

Series of collectors with outlets on one side.

### Series RZ

from page 4.60.30

Series of collectors with outlets on both sides.

### Series RR

from page 4.60.40

Series of collectors with push-in fitting outlets on one side. Sizes 1/4" and 3/8", with tube from Ø 4 to Ø 10.

Main features

Type	Description
RX	Collectors with cross outlets.

Technical data

Type	RX			
Fluid	Compressed air and other fluids			
Connections	1/8"	1/4"	3/8"	1/2"
Pressure range	Always higher than the ones used in pneumatic installations			
Parallel threads	UNI - ISO 228 / 1 (BSP)			

Standard materials

Type	RX
Body	Anodized aluminium

# TUBES

tube cutters, blow guns, washers

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Tubes and accessories for pneumatic systems.  
Supplied as standard in compliance to Reach and RoHS directives.

## Flexible linear tubes and spirals

from page 4.65.10

Series of flexible linear tubes and spirals for pneumatic systems, available in different materials, sizes and colors, according to application and fitting need. Multi-tube version, linear or spiral, available on request.

## Spatter resistant tubes

from page 4.65.20

Series of single and double layer spatter resistant tubes, designed for welding.

## Tube cutters

from page 4.65.50

Series of tube cutters and tube peeling in different materials, sizes and colors. Replacing blades available.

## Blow guns

from page 4.65.70

Series of blow guns for compressed air, industrial use, in different materials and configurations.

## Washers

from page 4.65.90

Series of washers for parallel (BSP) male threads, for tightening on female thread, in different materials and sizes.  
Special sizes available on request.

Code key

Type <sup>(1)</sup>	Diameter <sup>(1)</sup>	Color <sup>(1)</sup>
<b>TR</b>	<b>8X6</b>	<b>NE</b>

TR = Linear in Rilsan (PA12)
SR = Spiral without straight terminals in Rilsan (PA11)
TPU = Linear in Polyurethane (PU)
SPU = Spiral with straight terminals in Polyurethane (PU)
TP = Linear in Polyethylene (PE)
TN = Linear in Nylon (PA6)
TT = Linear in PTFE

4x2 = Ø 4x2 mm
4x2,5 = Ø 4x2,5 mm
4x2,7 = Ø 4x2,7 mm
5x3 = Ø 5x3 mm
6x4 = Ø 6x4 mm
8x5,5 = Ø 8x5,5 mm
8x6 = Ø 8x6 mm
10x6,5 = Ø 10x6,5 mm
10x8 = Ø 10x8 mm
12x8 = Ø 12x8 mm
12x9 = Ø 12x9 mm
12x10 = Ø 12x10 mm
14x10 = Ø 14x10 mm
14x12 = Ø 14x12 mm
15x12 = Ø 15x12 mm
15x12,5 = Ø 15x12,5 mm
16x14 = Ø 16x14 mm

NT = Neutral
AZ = Azure
NE = Black

How to order

Notes

The options in the same grind are alternative to each others. For standard materials see page 4.65.13.

(1) For matching between tube type, diameter and color, see tables from page 4.65.11

Different tube types, sizes and colors available on request.

Type / diameter matching

# Tubes, tube cutters, blow guns and washers

## Tube cutters, series PTP

### Main features

Type	Description
PTPNE 	Black plastic tube cutter for tubes

### Technical data

Type	PTPNE
Color*	Black
Tube type	Rilsan, polyurethane, polyethylene, nylon
Tube Ø	Ø 2 mm ÷ Ø 12 mm
Body material	Acetalic resin (POM)
Blade material**	Stainless Steel

### Dimensions

Code	Item	L	H	Weight (g)
022911	PTPNE	81	27	-

\*On request, for bulk quantities, available in different colors or customized.

\*\*For replacement blades see the table below.

### Spare parts

Code	Item	Description	Matching	Material
022910	LPTP	Replacing blades for tube cutter	PTP..	Stainless Steel

# Tubes, tube cutters, blow guns and washers

## Tube cutters, series PTM

### Main features

Type	Description
PTM.. 	Metal tube cutter for tubes

### Technical data

Type	PTM12	PTM25
Tube type	Rilsan, polyurethane, polyethylene, nylon	
Tube Ø	Ø 2 mm + Ø 12 mm	Ø 2 mm + Ø 25 mm
Body material	Chrome-plated steel	
Blade material*	Steel	

### Dimensions

Code	Item	L	H	Weight (g)
022981	PTM12	130	30	-
022982	PTM25	185	46	-

\*For replacement blades see the table below

### Spare parts

Code	Item	Description	Matching	Material
022991	LPTM12	Replacing blades for tube cutter	PTM12	Steel
022991	LPTM25	Replacing blades for tube cutter	PTM25	Steel

# Tubes, tube cutters, blow guns and washers

## Tube cutters, series TSC

### Main features

Type	Description
TSC..	Peeler for double layers spatter resistant tubes

### Technical data

Type	TSC8-6	TSC10-12
Color	Black	
Tube type	Series FW	
Tube Ø	Ø 6 mm ÷ Ø 8 mm	Ø 10 mm ÷ Ø 12 mm
Body material	Acetalic resin (POM)	
Blade material	Stainless Steel	

### Dimensions

Code	Item	L	H	B	Weight (g)
750010	TSC8-6	75	49	39	-
750011	TSC10-12	75	49	39	-

# Tubes, tube cutters, blow guns and washers

## Blow guns, series AH13

### Main features

Description	Code	Item
Metal blow gun. For compressed air, industrial use.	572384	AH13

### Technical data

Type	AH13
Fluid	Compressed air
Pressure range	0 ÷ 10 bar
Temperature range	-10°C ÷ +60°C
Connection	1/4" (female)

### Standard materials

Type	AH13
Body	Die-cast zamak
Nozzle	Die-cast zamak
Seals	NBR

# Tubes, tube cutters, blow guns and washers

## Blow guns, series AN13

### Main features

Description	Code	Item
Plastic blow gun with short nozzle. For compressed air, industrial use.	570167	AN13

### Technical data

Type	AN13
Fluid	Compressed air
Pressure range	0 ÷ 10 bar
Temperature range	-10°C ÷ +60°C
Connection	1/4" (female)

### Standard materials

Type	AN13
Body	Acetalic resin (POM)
Nozzle	Brass
Seals	NBR

# Tubes, tube cutters, blow guns and washers

Blow guns, series AK13

## Main features

Description	Code	Item
Plastic blow gun with extension tube. For compressed air, industrial use.	570166	AK13

## Technical data

Type	AK13
Fluid	Compressed air
Pressure range	0 ÷ 10 bar
Temperature range	-10°C ÷ +60°C
Connection	1/4" (female)

## Standard materials

Type	AK13
Body	Acetalic resin (POM)
Nozzle	Brass
Seals	NBR

# Tubes, tube cutters, blow guns and washers

Blow guns, series AM13

## Main features

Description	Code	Item
Plastic blow gun with interchangeable nozzles (to be ordered separately, see table below). For compressed air, industrial use.	570166	AM13

## Technical data

Type	AM13
Fluid	Compressed air
Pressure range	0 ÷ 10 bar
Temperature range	-10°C ÷ +60°C
Connection	1/4" (female)

## Standard materials

Type	AM13
Body	Acetalic resin
Nozzle	See table below
Seals	NBR

## Nozzles

Type	Code	Item	Description	Materials
	AR12	570169	Silenced nozzle, noise reduced up to 63 dB.	Aluminium
	AT12	570170	Venturi Nozzle, energy saving use 2/3 of the surrounding air for better wide-range blowing.	Acetalic resin (POM)
	VR12	570171	150 mm. extended tube nozzle	Nickel-plated brass
	SD12	570172	Safety nozzle, during blowing create a protective shield against chips.	Nickel-plated brass

# Tubes, tube cutters, blow guns and washers

## Washers

### Main features

Type	Description
RA	Washer for parallel (BSP) male threads, for tightening on female thread. In aluminium.

### Dimensions\*

Code	Item	For thread	D1 (Ø external)	D2 (Ø internal)	L1 (thickness)	Weight (g)

# AIR-RESERVOIRS

Find out our  
key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Air-reservoirs and accessories for compressed air, built according to 2014/68/UE and 2014/29/UE directives in the field of pressure equipment. Supplied as standard in compliance to Reach and RoHS directives. On request, can be supplied according to 2014/34/EU ATEX directive.

## Series SBCV

from page 4.70.10

Series of air-reservoirs for compressed air, available in sizes from 0,5 l. to 100 l.

Code key

Notes

For standard materials see the table below.

(1) For matching between size and connections see the table at page 4.70.12; for the specific type see from page 4.70.13.

(2) ATEX versions require 4 connections air-reservoirs only. One connection is necessarily used for grounding. For further information on 2014/34/EU ATEX Directive, on classifications and protections, see from page III.1

**Warning:** for safety use of air-reservoirs strictly follow the user manual provided with each product.

How to order

Size	Series	Connections
<b>24</b>	<b>SBCV</b>	<b>4</b>

How to order ATEX version

Size	Series	Connections	ATEX version
<b>24</b>	<b>SBCV</b>	<b>4</b>	<b>/ ATEX</b>

Main features

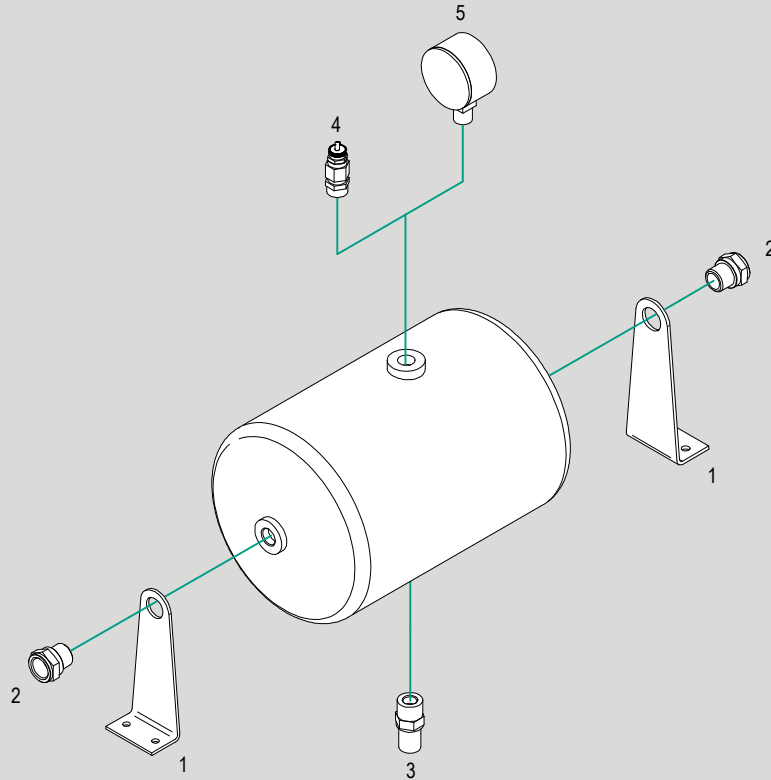

Series	SBCV
Fluid	Compressed air
Pressure range	11 bar
Pressure range (hydrostatic test)	16,5 bar
Temperature range	-10°C ÷ +60°C
Parallel threads	UNI - ISO 228/1 (BSP)
Capacity	0,5 lt. ÷ 100 lt.
Connections number	2, 4
Tolerance on dimensions*	±5 mm

Standard materials

Series	SBCV
Bottom	Steel Fe PO4
Shell	Steel Fe PO4
Socket joint	Fe 45.1
External treatment	Epoxide powder painting
Color	RAL 5015-110
Bottom/Shell welding	Wire
Bottom/Socket joint welding	Submerged arc
Shell/Socket joint welding	Submerged arc

\*For dimensions see from page 4.70.13

# FLOW

and exhaust regulators

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Flow and exhaust regulators. Available in different functions, versions and threads. Supplied as standard in compliance to Reach and RoHS directives.

## In-line flow regulators

from page 4.92.1

Series of in line flow regulators, available with uni-directional or bi-directional regulation.

## Flow regulators for cylinders

from page 4.94.1

Series of flow regulators generally directly mounted on cylinder connections to control translation speed . Available in different functions: uni-directional with out adjustment, uni-directional with in adjustment and bi-directional with adjustment in both the directions. Use of two uni-directional out adjustment regulators is recommended for the accurate control of the cylinder speed, as they act on the outgoing flow of the cylinder chambers, and don't interfere with the incoming flow to the chambers.

## Silenced exhaust restrictors

from page 4.97.1

Series of silenced exhaust restrictors, generally used to decrease the speed and thus the translation speed of the cylinders, are usually mounted on power valve outlets or quick exhaust valves. The main feature of these regulators is to include two functions in one component: flow regulation and silencing.

## Exhaust restrictors

from page 4.99.1

Series of exhaust restrictors, generally used to decrease the speed, are usually mounted on power valve outlets or quick exhaust valves.

# Flow and exhaust regulators

## Flow regulators type V38

### Main features

Type	Description	Function
V38..C	Swivel BSP with knob adjustment and push-in fitting. For cylinders. In acetalic resin (POM).	
V38..V	Swivel BSP with knob adjustment and push-in fitting. For valves. In acetalic resin (POM).	
V38..B	Swivel BSP with knob adjustment and push-in fitting. Bi-directional. In acetalic resin (POM).

# ACCESSORIES

with integrated function

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Accessories with integrated function. Available in different versions, functions, and threads. Supplied as standard in compliance to Reach and RoHS directives.

## Fittings with non return valve type V56

from page 4.121.10

Series of parallel (BSP) push-in fittings in nickel-plated brass with non-return valve. Available in sizes from M5 to G1/2", tube from Ø 4 to Ø 14.

## Stop fittings type V59

from page 4.121.20

Series of parallel (BSP) push-in fittings in nickel-plated brass with poppet. Available in sizes G1/8" and G1/4", tube Ø 6 and Ø 8.

## Pressure regulators type V47

from page 4.122.10

Series of pressure regulators in nickel-plated brass. Available in sizes G1/8" and G1/4". Compatible with banjo fittings.

## Uni-directional pressure regulators type V57 e V58

from page 4.122.20

Series uni-directional pressure regulators in acetalic resin (POM) with reduced dimensions and micro-pressure-gauge. Available in two versions: in-line version (V57) for tube Ø 6 and Ø 8, and 90° version (V58), for tube from Ø 4 to Ø 8 with M5, R1/8" and R1/4" threads.

## Pneumatic switches type V46

from page 4.123.10

Series of pneumatic switches in nickel-plated brass. Available in 2 ways and 3 ways versions, sizes G1/8" and G1/4". Compatible with banjo fittings.

## In-line pneumatic switches type V48

from page 4.123.20

Series of in-line pneumatic switches in acetalic resin. Available in 2 ways and 3 ways versions, sizes Ø 6 and Ø 8.

## Circuit selectors type V60

from page 4.124.10

Series of circuit selectors in anodized aluminium. Available with connections G1/8" and G1/4".

## In-line pressure-gauges type V51

from page 4.125.10

Series of In-line pressure-gauges with reduced dimensions, in acetalic resin. Available in configuration with push-in fittings connections Ø 6 and Ø 8, or with threaded connections G1/8" and G1/4" in and push-in fittings connection Ø 6 or Ø 8 out.

## Adjustable pressure switches type PR

from page 4.126.10

Series of adjustable pressure switches in brass, with rubber cover cap. Available in size G1/8", in version "Normally open" or "Normally closed", and in size G1/4" in version "Normally closed".

## Stop valves type V45

from page 4.127.10

Series of stop valves in nickel-plated brass. Available in versions uni-directional and bi-directional, in size from G1/8" to G1/2". Compatible with banjo fittings.

## Uni-directional throttle fittings type V44

from page 4.128.10

Series of uni-directional throttle fittings with fixed section and elbow push-in fitting in nickel-plated brass. Available in sizes from M5 to G1/4", for tube from Ø 4 to Ø 8, with calibrated hole from Ø 0,2 mm to Ø 1,5 mm

## Slow starters type V61

from page 4.129.10

Series of slow starters in nickel-plated brass. Available in sizes from G1/4" to G1/2".

## Threshold sensors type V62

from page 4.130.10

Series of threshold sensors in nickel-plated brass. Available in sizes from G1/8" to G3/8", for tube Ø 4.

## Fittings with non return valve

### Main features

Type	Description	Symbol
V56	BSP stud push-in fitting with non return valve. In nickel-plated brass.	

### Dimensions

Code	Item	Symbol	T (Øe tube)	D1	D2	L1	L2	CH	Weight (g)
024490	V5604M5		4	M5x0,8	8	4	37,2	9	10
024491	V560418		4	G1/8"	13	6	30,9	11	13
024492	V560618		6	G1/8"	13	6	38	13	18
024493	V560614		6	G1/4"	16	8	39	14	26
024494	V560818		8	G1/8"	13	6	38,5	15	23
024495	V560814		8	G1/4"	16	8	39,5	16	27
024496	V561014		10	G1/4"	16	8	44	18	36
024497	V561038		10	G3/8"	20	9	43,5	18	42
024498	V561212		12	G1/2"	25	10	46,5	22	68
024499	V561412		14	G1/2"	25	10	54,7	25	90

### Function

The non-return valve have the function of allowing the free flow in one direction (from the tube towards the thread), while it intercepts the flow coming from the thread in the direction of the tube.

### Technical data

Type	V56
Fluid	Compressed air
Pressure range	2 ÷ 10 bar
Minimum working pressure	0,2 bar
Temperature range	-20°C ÷ +80°C
Parallel threads	UNI - ISO 228 / 1 (BSP)
Metric threads	UNI EN ISO 965-1
Tubes	Calibrated Nylon (PA6), Polyurethane (PU) and Rilsan (PA11).
Tubes tolerance	±0,05 mm

### Standard materials

Type	V56
Body	Nickel-plated brass
Release collar	Nickel-plated brass
Valve	Nickel-plated brass
Collet and spring	Stainless Steel
Seals	NBR

# Accessories with integrated function

## Stop fittings

### Main features

Type	Description	Symbol
V59	BSP stud push-in fitting , with poppet. In nickel-plated brass.	

### Dimensions

Code	Item	Symbol	T (Øe tube)	D1	D2	L1	L2	CH	Weight (g)
024470	V590618		6	G1/8"	13,5	5	27,7	12	14,9
024471	V590614		6	G1/4"	16	6,5	27,7	12	18
024472	V590818		8	G1/8"	14,5	5	27,9	13	17
024473	V590814		8	G1/4"	16	6,5	27,9	13	20,4

### Function

The poppet inside the component is unlocked only if a tube is inserted, thus allowing air to flow from the thread to the tube, and only allow this as long as the tube remains inserted. If, for any reason, the tube were disconnected, the flow of air through the fitting would stop as poppet close.

### Technical data

Type	V59
Fluid	Compressed air
Pressure range	0 ÷ 10 bar
Temperature range	-20°C ÷ +80°C
Parallel threads	UNI - ISO 228 / 1 (BSP)
Tubes	Calibrated Nylon (PA6), Polyurethane (PU) and Rilsan (PA11).
Tubes tolerance	±0,05 mm

### Standard materials

Type	V59
Body	Nickel-plated brass
Release collar	Nickel-plated brass
Poppet	Nickel-plated brass
Collet and spring	Stainless Steel
Seals	NBR

Regulation range	0 ÷ 8 bar	
Temperature range	-20°C ÷ +80°C	
Parallel threads	UNI - ISO 228 / 1 (BSP)	
Function	See page 4.122.11	
Matching with banjo fittings	See page 4.122.11	
Flow at 6 bar with ΔP 1 bar	205 NI/min	290 NI/min

### Standard materials

Type	V47
Body	Nickel-plated brass
Spring	Stainless Steel AISI 302
Seals	NBR

### Function

Type V47

Pressure regulators, installed in a pneumatic system, allow the adjustment of specific connected equipment working pressure, maintaining this regulation constant in time. Particularly interesting is the application as an energy saver, which is achieved by connecting the regulator between the valve and the cylinder. This way, it is possible to reduce pressure in one desired direction, thus limiting air consumption of the cylinder.

### Function

Uni-directional pressure regulators, with extremely reduced overall dimensions, supplied complete with a micro-pressure-gauge (MPa scale), to be used when is necessary to reduce the working pressure directed to a specific component.

To adjust the pressure, is necessary to unlock the adjustment knob (C1) by lifting it upwards. Turn the knob clockwise to increase pressure, or counter-clockwise to decrease pressure. Once reaching the desired pressure, visible through the built-in pressure-gauge, lock the knob again by pushing it downwards.

### Technical data

Type	V57
Fluid	Compressed air
Pressure range	1 ÷ 8 bar

## Pneumatic switches

### Function

Type V46..2V, 2/2  
(2 ways)

Type V46..3V, 3/2  
(3 ways)

Pneumatic switches are valves with the function of selecting a circuit (ON/OFF) simply by operating the control lever. Using the 3-way valve, the circuit downstream of the switch is not only disconnected, but also discharged into the atmosphere.

024394	PR14C		G1/4"	22,2	10	51	24	32	5	66	65

### Function

Adjustable pressure switches are designed to control the minimum and maximum pressure of compressed air in a pneumatic system or in a circuit. Are made with a NO/NC electrical contact capable of controlling an electrical load of 0.5A with a voltage of 250V. It is advisable to mount the pressure switch vertical to the line to control, in order to avoid collecting of impurities or condensate inside the body, which could block the regular operation or change the switching pressure. Through the adjustment screw, the value of the switching pressure can be recreated after removing the contact holder.

### Technical data

Type	PR18A	PR18C	PR14C
Fluid	Filtered compressed air with or without lubrication		
Regulation range	1 ÷ 10 bar ( $\pm 0,5 - 20^\circ$ )		
Maximum overpressure limit	80 bar		
Maximum fluid pressure	40 bar		
Port	1/8" Gas taper (BSPT)		1/4" Gas BSPT (BSPT)
Function	Normally open	Normally closed	Normally closed
Maximum switch voltage	250 V		
Maximum switch current	0,5 A		
Acting type	1B		
Pollution situation	Normal		
Protection class	IP 00 (without cap) - IP 54 (with cap)		
Temperature range	$-15^\circ\text{C} \div +100^\circ\text{C}$		
Mechanical working life	$10^6$ cycles		
Electrical working life	$10^5$ cycles		
Compliance	EN60730-i

### Function (with K option)

Type V45..U  
(Uni-directional)

Type V45..B  
(Bi-directional)

Series of stop valves available in uni-directional and bi-directional versions. When mounted in pairs on a cylinder, they block the movement in the event of a sudden drop in piloting pressure.  
By means of the manual release device (with option K, available on request) it is possible to manually reset the piston stroke.

### Piloting pressure in function of feeding pressure

\*Only for bi-directional versions (type V45..B)

\*Note: is required to indicate the calibrated hole diameter desired. For choosing the quote D4, please refer to the table below.

### Technical data

Type	V44
Fluid	Filtered compressed air with lubrication
Pressure range	0 ÷ 15 bar
Temperature range	-20°C ÷ +80°C
Parallel threads	UNI - ISO 228 / 1 (BSP)

### Standard materials

Type	V44
Body	Nickel-plated brass
Fitting	Series R (see page 4.3.1)
Seals	NBR

### Function

These fittings have an internal bush, with a calibrated hole whose diameter results in a flow restriction. Typical uses of these components are applications where the desired flow or cylinders speed is known in advance and following adjustments are not required. The advantages of using throttle fittings is the impossibility of making unwanted adjustments to the flow and the constancy over time of the adjustment, which is essential in the presence of vibrations.

### Flow diagram

P = 6 bar, with ΔP 1 bar

024477	V61 00 12		G1/2"	G1/2"	10,5	24,5	72,4	25	180

### Technical data

Type	V61								
Size	1/4"			3/8"			1/2"		
Fluid	Compressed air								
Pressure range (P1)	3 ÷ 10 bar								
Full open	2/3 of P1								
Temperature range	-20°C ÷ +80°C								
Parallel threads	UNI - ISO 228 / 1 (BSP)								
Flow at 6 bar with ΔP 1 bar	1.040 NI/min			1.900 NI/min			2.570 NI/min		

The slow starter allows the system to be gradually pressurised, protecting any actuators in the line from the so-called "water hammer" caused by immediate pressurisation of the previously unloaded system. Slowly opening, as the user setting through the adjustment screw, this component progressively introduces pressure into the circuit up to the desired pressure P1, within the indicated operating range (3 ÷ 10 bar), allowing the actuators to reach the operating position gradually and without suffering any sudden shocks. The filling speed of the circuit is determined by the rotation of the adjustment needle: turning clockwise will result in increasingly slower filling.

### Standard materials

Type	V61
Body	Nickel-plated brass
Spring	Stainless Steel AISI 302
Ring	Nickel-plated brass
Seals	NBR - Polyurethane (PU)
Washer	Nylon (PA6)

### Technical data

Type	V62
Fluid	Compressed air
Pressure range	0 ÷ 10 bar
Temperature range	-20°C ÷ +80°C
Parallel threads	UNI - ISO 228 / 1 (BSP)
Function	See page 4.130.11
Commutation pressure range	See table below

### Standard materials

Type	V62
Body	Nickel-plated brass
Fitting	Series R (see page 4.3.1)
Seals	NBR

### Pressure range / Commutation pressure range

Type V62									
Pressure range	3 bar	4 bar	5 bar	6 bar	7 bar	8 bar	9 bar	10 bar	
Commutation pressure range	0,3 bar	0,5 bar	0,65 bar	0,9 bar	1,0 bar	1,2 bar	1,4 bar	1,6 bar	

### Function

Type V62

Pneumatic limit switches can detect a pressure drop, and in this case send a signal (S). Particularly interesting is the application as a 'limit switch sensor' mounted directly to the cylinder. When the cylinder complete the stroke, i.e. when the exhaust backpressure in the chamber was discharged, a control signal (S) is sent to the directional valve, which, when switched, will send the input to the cylinder to reverse the stroke. The main advantage is that the cylinder stroke can be controlled without need for electrical wiring. The only condition imposed for correct operation of the pneumatic sensor is that the cylinder must make the full stroke, no intermediate positions are permitted.

# SILENCERS

Find out our  
key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Silencers available in different type, materials, functions and threads. To apply at the exhaust to reduce noise. Supplied as standard in compliance to Reach and RoHS directives.

## Silencers in plastic polymer

from page 4.151.10

Series of plastic polymer silencers. Available in different versions. Sizes from M5 to 1".

## Sintered silencers

from page 4.153.10

Series of sintered silencers. Available in different shapes and types. Sizes from M5 to 1".

## Metal silencers

from page 4.155.10

Series of metal silencers. Available in two versions: with aluminium body and noise absorbing cartridge (type M and type MD) and in zinc-plated steel with stainless steel cartridge (type MI). Sizes from 1/8" to 6".

Fluid	Compressed air
Pressure range	0 ÷ 10 bar
Temperature range	-10°C ÷ +80°C
Parallel threads	UNI - ISO 228 / 1 (BSP)
Filtering element porosity	36 µm

### Standard materials

Type	ATT
Nipple	Brass
Filtering element	Sintered spherical bronze

Code key

Type	Size <sup>(1)</sup>	Options	
<b>M</b>	<b>12</b>	<b>NPT</b>	<b>/40</b>
MI	01 = 1/8"	NPT = NPT thread (according to ANSI B 1.20.1)	/40 <sup>(2)</sup> = Up to 40 bar
M	02 = 1/4"		
MD	00 = 3/8"		
	05 = 1/2"		
	07 = 3/4"		
	10 = 1"		
	12 = 1 1/4"		
	15 = 1 1/2"		
	20 = 2"		
	30 = 3"		
	40 = 4"		
	60 = 6"		

How to order

Notes

For standard materials see single product data sheets.

(1) For matching between type and thread, see from page 4.155.11; for the specific type, see the following pages.

(2) Available only for type M and type MD. The silencer with /40 option have same efficiency features of standard silencers, but in addition is equipped with a safety valve in the top, which allows air to discharge as the output pressure change. Thus avoid risk of damages due to "water hammer" and pulsating pressures.

Metal silencers

Type			Taper threads (BSPT)	Data sheet and code page

Technical data

Type	M								
Size	3"			4"			6"		
Fluid	Compressed air								
Pressure range	0 ÷ 8,5 bar								
Temperature range	-25°C ÷ +100°C								
Taper threads	UNI EN 10226-1 (BSPT)								
Flow at 6 bar with ΔP 1 bar	254.000 NI/min.			508.000 NI/min.			1.130.000 NI/min.		
Flow tolerance	±10%								

Standard materials

Type	M								
Body	Aluminium								
Tie-rods	Steel								
Cartridge	Noise-absorbing material (covered by a metal drilled plate)								

Function

Mufflers type M are suitable for large plant exhausts thanks to their high flow and noise reducing capacity.

# Silencers

## Metal, series MD

### Main features

Type	Description	Symbol
MD	Single chamber metal muffler, with aluminium body and noise-absorbing material cartridge covered by a metal drilled plate. Equipped with a balanced valve. For air dryers.	

### Dimensions

Code	Item	Symbol	A	Ø B	C	D	E	CH

Flow tolerance	±10%									

### Standard materials

Type	MD
Body	Aluminium
Tie-rods	Steel
Cartridge	Noise-absorbing material (covered by a metal drilled plate)

### Function

Specifically designed to manage the service issues associated with desiccant regenerative type air dryers, which often expel air laden with moisture and desiccant dust. The primary stage traps particulates, allowing cleaner air to escape freely through the secondary stage, which also have a noise reduction function. Equipped with a safety valve to avoid damages (standard is maximum working pressure 12 bar, while for higher pressure /40 option is required allowing to withstand up to 40 bar).

Main features

## Main features and certifications

Exhaust conveyors. For plants where many exhausts converge into a single silenced element.  
Supplied as standard in compliance to Reach and RoHS directives.

## Type CSC1

from page 4.170.10

Exhaust conveyors with acetal resin body.

### Main features

Type	Description	Symbol
CSC1	Exhaust conveyors with acetalic resin (POM) body	

### Function

The exhaust conveyor series CSC is useful and practical to be used when more exhausts of one or more machines need to be conveyed into one single silencing element; another advantage, compared with the traditional silencer, is that the discharge conveyor keeps the working environment clean, because it not spray the atomised oil from the system in the air.

The various tubes from different machines are connected with the exhaust conveyor upper side by pre mounted push-in fittings (1" female BSP thread can also be used).

The air mixed with oil flows into the respective chamber and into a thick aluminium wire filter which separates air from oil; the air passes through the filter and than flow outside through a second sintered bronze filter (covering the whole conveyor circumference), while the oil drop in a vessel below, which can be emptied by a manual exhaust placed at the bottom of the component.

### Technical data

Type	CSC1
Fluid	Compressed air
Pressure range	0 ÷ 12 bar
Temperature range	-20°C ÷ +70°C
Connections	n° 10 push-in fittings for tube Øe. 8 mm; n° 1 BSP female size 1"
Tubes	Calibrated Nylon (PA6), Polyurethane (PU) and Rilsan (PA11)
Tubes tolerance	±0,05 mm

### Standard materials

Type	CSC1
1 Body	Acetalic resin (POM)
2 Separator filter	Aluminium mesh
3 External filter	Sintered bronze
4 Connections	Brass
5 Manual exhaust	Brass
6 Bracket	White zinc-plated steel

## Main features and certifications

Series of stainless steel cylinders conforming to ISO 6432 standards, available in bores from Ø 10 to 25, double acting magnetic. The heads joined to barrel through rolling ensure perfect tightening. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request can be supplied according to 2014/34/ EU ATEX directive.

### Type MDMX Ø 10 ÷ 25

from page 5.2.20

Stainless Steel cylinders conforming to ISO 6432 standards, available in bores from Ø 10 to 25, double acting, magnetic, the heads joined to barrel through rolling ensure perfect tightening. Equipped with rubber bumpers to cushion the impact of the piston. Possibility of applying one or more magnetic reed switches. Complete with stainless steel head nut and rod nut.

### Type MDMAX Ø 20 ÷ 25

from page 5.2.40

Stainless Steel cylinders conforming to ISO 6432 standards, available in bores from Ø 20 to 25, double acting, magnetic, the heads joined to barrel through rolling ensure perfect tightening. Equipped with adjustable air cushioning on both ends. Possibility of applying one or more magnetic reed switches. Complete with stainless steel head nut and rod nut.

## Main features and certifications

Series of Stainless Steel AISI 316L cylinders conforming to ISO 15552 standards in bores from Ø 32 to 200, double acting, magnetic. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. Lubrication with synthetic grease long lasting, for applications with low start up, granting low friction and a permanent lubrication film. Fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1). On request, can be also supplied according to the 2014/34/EU ATEX Directive.

## Type AMX Ø 32 ÷ 200

from page 5.5.20

Stainless Steel AISI 316L Cylinders ISO 15552, available in bores from Ø 32 to 200, double acting magnetic with adjustable cushioning, made with round tube and tie-rods. Rod seal in special polyurethane developed for chemical and food&beverage. The design is modern and clean, with care for the details. Particular attention was addressed to the end caps design, infacts no external casting cavities are present, thus avoid contamination traps. In order to easy and fast replace the rod seal for standard maintenance, nose was designed demountable.

		Bellow (Z)	-	●	-	●	-	-	-	-

Key

● allowed matching; - not allowed matching

Options matching - note

- (1) Option **WH=.** require to indicate the desired dimension in mm, whereas for some combinations the option **WH=.** should be required or optional. For further information please contact the sales department. If you choose the female thread (option **F**), please indicate the dimension **WF=.** and then the actual desired dimension.
- (2) Option **R-M.** require to indicate the desired thread. For further information please contact the sales department.
- (3) For some bore and strokes, with bellow option (**Z**) could be necessary the extended rod option (**WH=.**), or the **WH=.** as an option can be different according to customer choiche. For further information please contact the sales department.
- (4) With through rod (option **P**) the option female thread (**F**) and the option special male thread (**R-M.**) are applied on both sides of the rod. While the option extended rod (**WH=.**) is applied only to one side at the rod.

How to order

Notes

For standard materials see the table at page 5.5.5  
 Options in the same grid are alternative to each others.  
 For further information on options and their matching, see page 5.5.3 and 5.5.4  
 For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

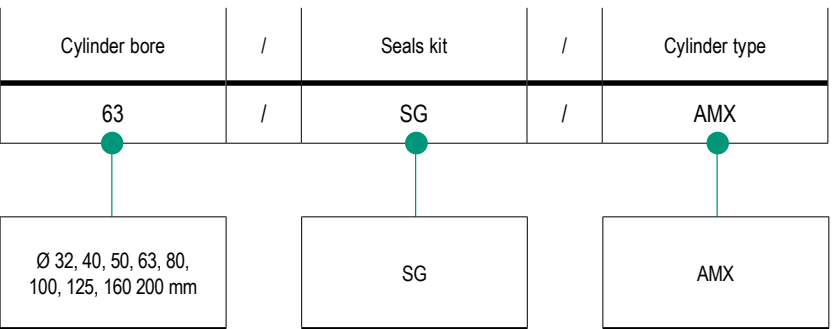

**Standard\* seal kit**

Number of components	Description
n. 1	Rod seal
n. 2	Cushioning seal
n. 2	Piston seal
n. 1	Nose seal
n. 1	Plug seal
n. 1	Linear rubber ring for piston (damper)
n. 2	Tube-head O-ring
n. 1	Piston guiding ring
n. 4	Adjustment screw O-ring
n. 1	Semipiston O-ring

\*For cylinders with options P, H, H1, V, V1 and BT, the kit include further components.

# Stainless Steel round cylinders

Series RXD

## Main features and certifications

Series of Stainless Steel AISI 316L Round Cylinders in bores from Ø 32 to 63, double acting, magnetic with adjustable cushionings. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. Lubrication with synthetic grease long lasting, for applications with low start up, granting low friction and a permanent lubrication film. Fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1). On request, can be also supplied according to the 2014/34/EU ATEX Directive.

## Series RXD Ø 32 ÷ 63

from page 5.11.10

Stainless Steel AISI 316L Round Cylinders, available in bores from Ø 32 to 63, double acting magnetic with adjustable cushioning, characterized by an essential design to prevent the accumulation of impurities. The cylinder body surface is smooth with no chamfers or cavities where dirt could settle. The rod seal is in special polyurethane developed for chemical and food&beverage. These features make these cylinders particularly suitable for the food&beverage, chemical, pharmaceutical and medical fields, and in general for all applications where maximum hygiene and cleaning are required, even in corrosive environments. Various configurations are possible, some of which make the cylinder with ISO dimensions.

Options		
Description	Symbol	Suffix
Through rod		<b>P</b>
FKM seals	-20°C ÷ +150°C	<b>V</b>
FKM rod seal	-20°C ÷ +80°C	<b>V1</b>
Low temperature seals	-40°C ÷ +80°C	<b>BT</b>
Extended rod (indicate the requested WH dimension in mm, E.g.: WH=100; for further information please contact the sales department)		<b>WH=..</b>
Without adjustable cushionings		<b>D</b>
Adjustable rear cushioning only		<b>D1</b>
Adjustable front cushioning only		<b>D2</b>
Special male thread (indicate the requested thread. E.g.: R-M 10x1,5; the dimension AM of the special thread will be the same as the standard; cylinder will be supplied without rod nut; for further information please contact the sales department)		<b>R-M..</b>
NBR rod seal	-20°C ÷ +80°C	<b>H1</b>
ATEX versions on request		<b>/ATEX</b>
Special versions on request		<b>/S</b>

The options, when this is possible, can be combined with each other. For options matching see from page 5.11.4; For code key see from page 5.11.6.

## Version

32 ÷ 63

**RXDVA**

Bores  $\emptyset$

Double acting  
Magnetic  
With cushionings

Threaded front  
end cap

Flat rear end cap

Type

## Peculiar characteristics

The assembly is through the threaded front end cap. The rear end cap is flat, the cylinder body is with no chamfers or cavities where dirt can settle. For the same reason, the adjusting cushioning screws are not recessed but protruding the body of the cylinder.

On this type through rod option (P) is available. For dimensions see page 5.11.10

Stainless steel head nut type GHX..AQM (see page 5.11.91) is compatible with front end cap.

**RXDBA**

Bores Ø

Double acting  
Magnetic  
With cushionings

Front end cap  
with pins

Flat rear end cap

Type

Peculiar characteristics

The front end cap is clean design, with no cavities and demountable nose, allowing maintenance directly on the machine where cylinder is assembled, thus reducing maintenance time. Two pins are integrated in the front end cap, thus allow mounting to supports, and provide an oscillatory movement.  
The rear end cap is flat, the cylinder body is with no chamfers or cavities where dirt can settle. For the same reason, the adjusting cushioning screws are not recessed but protruding the body of the cylinder.

## Series RXDBP

### Version

32 ÷ 63

**RXDBP**

Bores  $\emptyset$

Double acting  
Magnetic  
With cushionings

Front end cap with  
demountable nose

Flat rear end cap  
with pins

Type

### Peculiar characteristics

The front end cap is clean design, with no cavities and demountable nose, allowing maintenance directly on the machine where cylinder is assembled, thus reducing maintenance time. Two pins are integrated in the flat rear end cap, thus allow mounting to supports, and provide an oscillatory movement.

The cylinder body is with no chamfers or cavities where dirt can settle. For the same reason, the adjusting cushioning screws are not recessed but protruding the body of the cylinder.

# Stainless Steel round cylinders

Series RDX - RDMX - RDMAX

## Main features and certifications

Series of Stainless Steel Round Cylinders in bores from  $\varnothing$  32 to 63, double acting, magnetic or not magnetic, with or without cushionings. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. On request, can be also supplied according to the 2014/34/EU ATEX Directive.

### Type RDX $\varnothing$ 32 ÷ 63

from page 5.13.20

Stainless Steel round cylinders not conforming to standards, available in bores from  $\varnothing$  32 to 63, double acting, not magnetic. Heads are joined to barrel through rolling, thus ensure a perfect tightening. Supplied complete with rod nut and head nut.

### Type RDMX $\varnothing$ 32 ÷ 63

from page 5.13.20

Stainless Steel round cylinders not conforming to standards, available in bores from  $\varnothing$  32 to 63, double acting, magnetic. Heads are joined to barrel through rolling, thus ensure a perfect tightening. Supplied complete with rod nut and head nut.

### Type RDMAX $\varnothing$ 32 ÷ 40

from page 5.13.40

Stainless Steel round cylinders not conforming to standards, available in bores from  $\varnothing$  32 to 63, double acting, magnetic, with adjustable cushionings. Heads are joined to barrel through rolling, thus ensure a perfect tightening. Supplied complete with rod nut and head nut.

Options		
Description	Symbol	Suffix
Through rod		<b>P</b>

## Main features and certifications

Series of Stainless Steel compact cylinders conforming to ISO 21287 standards in bores from Ø 25 to 100, single or double acting, magnetic. Compatible with mounting accessories for cylinders ISO 15552. Supplied as standard in compliance to Reach and RoHS directives, and SIL certified. Lubrication with synthetic grease long lasting for applications with low start up, granting low friction and a permanent lubrication film. Fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1). On request, can be also supplied according to the 2014/34/EU ATEX Directive.

## Type CIXS Ø 25 ÷ 100

from page 5.20.20

Stainless Steel compact cylinders conforming to ISO 21287 standards in bores from Ø 25 to 100, single acting, magnetic, with female thread and equipped with elastic dampers on the piston

## Type CIX Ø 25 ÷ 100

from page 5.20.20

Stainless Steel compact cylinders conforming to ISO 21287 standards in bores from Ø 25 to 100, double acting, magnetic, with female thread and equipped with elastic dampers on the piston

Options		
Description	Symbol	Suffix

 ● matching accessory; - not matching accessory

## Options matching - note

- (1) Option **WH=..** require to indicate the desired dimension in mm; for models with through rod option (**P**) the extended rod option (**WH=..**) is applied only to one side of the rod. For further information please contact the sales department.
- (2) Option **R-M..** require to indicate the desired thread; for models with through rod option (**P**) the special male thread option (**R-M..**) are applied on both sides of the rod. For further information please contact the sales department.

rod accessories for cylinders

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Stainless Steel rod accessories for cylinders. Wide range of accessories for the cylinder piston rod fully made of stainless steel, to suite all applications. All rod accessories are supplied in compliance with Reach and RoHS directives.

### Stainless Steel clevis ISO

from page 5.52.1

Series of stainless steel female clevis conforming to ISO 8140 standards for mounting onto the male piston rod of the cylinder.

### Stainless Steel clevis DIN

from page 5.52.1

Series of stainless steel female clevis conforming to DIN 71752 standards for mounting onto the male piston rod of the cylinder.

### Stainless Steel bearing heads

from page 5.54.1

Stainless Steel Bearings. Self-lubricating bearing heads (DIN 648K) with female thread, servicing-free conforming to ISO 8139 standard.

### Stainless Steel self-aligning articulated coupling

from page 5.55.1

Bearings. Self-aligning articulated coupling. Supplied with hexagonal nut. For mounting onto the male piston rod of the cylinder. Allow to compensate the angular and parallel misalignments. Suitable for applications with high tractions.

### Stainless Steel self-aligning coupling

from page 5.57.1

Couplings. Self-aligning articulated coupling for mounting onto the male piston rod of the cylinder. Allow to compensate the angular and parallel misalignments.

## Main features and certifications

Series of stainless steel mounting accessories for cylinders. For front, rear or center mounting, or to couple with other accessories (e.g.: hinges), to allow the choice of the most appropriate mounting. All mounting accessories are supplied in compliance with Reach and RoHS directives.

## Stainless Steel mountings for cylinders ISO 6432

from page 5.71.1

Series of stainless steel mountings for cylinders ISO 6432. Rear clevises ISO MP3, flanges ISO MS3 and high feet ISO MF8.

## Stainless Steel mountings for round cylinders type RDX, RDMX, RDMAX

from page 5.73.1

Series of stainless steel mountings for round cylinders type RDX, RDMX and RDMAX. Rear clevises, foot-hinges, pins and head nuts.

## Stainless Steel mountings for round cylinders series RXD

from page 5.73.50

Series of stainless steel mountings for round cylinders series RXD (only for type with integrated clevises or with threaded end caps): rear clevises ISO MP2, rear eyes ISO MP4, narrow rear clevises ISO AB6, 90° rear hinges ISO AB7 CETOP RP107P, pins ISO AA4, pins ISO AA6, foot-hinges and head nuts.

## Stainless Steel mountings for cylinders ISO 15552

from page 5.75.1

Series of stainless steel mountings for cylinders ISO 15552. Rear clevises ISO MP2, rear eye ISO MP4, narrow rear clevises ISO AB6 and narrow rear eyes ISO MP6 with spherical bearing DIN 648K, flanges ISO-VDMA MF1/MF2, 90° rear hinges ISO AB7 CETOP RP107P and 90° rear hinges ISO CS7 with spherical bearing DIN 648K, low feet ISO MS1, pins ISO AA4, pins ISO AA6 and center trunnions ISO MT4.

## Stainless Steel mountings for compact cylinders ISO 21287

from page 5.77.1

Series of stainless steel mountings for compact cylinders ISO 21287. Rear clevises ISO MP2, rear eye ISO MP4, narrow rear clevises ISO AB6 and narrow rear eyes ISO MP6 with spherical bearing DIN 648K, flanges ISO-VDMA MF1/MF2, 90° rear hinges ISO AB7 CETOP RP107P and 90° rear hinges ISO CS7 with spherical bearing DIN 648K and low feet ISO MS1.

## Stainless Steel mounting screws and grains for cylinders

from page 5.79.1

Series of stainless steel mounting elements for cylinders. Screws conforming to UNI5931 standards, screws conforming to DIN 6912 standards and grains conforming to DIN 127B standards.

## solenoid operated valves Series AX1

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Series of stainless steel spool valves, with in-line connections. Available in size 1/4", solenoid operated also with external air pilot, Ø 9 mm or Ø 13 mm plunger, with functions: 3/2 solenoid/spring normally closed, 3/2 solenoid/spring normally open, 3/2 solenoid/solenoid, 5/2 solenoid/spring, 5/2 solenoid/solenoid and solenoid/solenoid differential, 5/3 open centres, closed centres and pressurized centres. Supplied as standard with HNBR seals for low temperature (down to -25°), in compliance to Reach and RoHS directives, SIL certified, and with valve body conforming to 2014/34/EU ATEX Directive, in classification Ex h. Coils and connectors to be ordered separately. For solenoid operated valves with ATEX coil and connector, in different classification, see from page 5.150.1.

## Series AX1 1/4" 3/2 Solenoid/Spring

from page 5.105.10

Series of stainless steel spool valves, with in-line connections, size 1/4", in function 3/2 solenoid/spring normally closed, also with external air pilot, and 3/2 solenoid/spring normally open.

Valve body conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb

II 2D Ex h IIIC T100°C Db

Coils and connectors to be ordered separately.

## Series AX1 1/4" 3/2 Solenoid/Solenoid

from page 5.105.20

Series of stainless steel spool valves, with in-line connections, size 1/4", in function 3/2 solenoid/solenoid, also with external air pilot.

Valve body conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb

II 2D Ex h IIIC T100°C Db

Coils and connectors to be ordered separately.

## Series AX1 1/4" 5/2 Solenoid/Spring

from page 5.105.40

Series of stainless steel spool valves, with in-line connections, size 1/4", in function 5/2 solenoid/spring, also with external air pilot.

Valve body conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb

II 2D Ex h IIIC T100°C Db

Coils and connectors to be ordered separately.

## Series AX1 1/4" 5/2 Solenoid/Solenoid

from page 5.105.50

Series of stainless steel spool valves, with in-line connections, size 1/4", in function 5/2 solenoid/solenoid, also with external air pilot, and 5/2 solenoid/solenoid differential.

Valve body conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb

II 2D Ex h IIIC T100°C Db

Coils and connectors to be ordered separately.

## Series AX1 1/4" 5/3

from page 5.105.70

Series of stainless steel spool valves, with in-line connections, size 1/4", in function 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres, also with external air pilot.

Valve body conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb

II 2D Ex h IIIC T100°C Db

Coils and connectors to be ordered separately.

<b>AX1</b>	<b>E</b>		<b>2</b>	<b>50</b>	
AX1	E = Electric K <sup>(1)</sup> = Electric with external air pilot	= Ø 9 mm plunger G <sup>(2)</sup> = Ø 13 mm plunger	2 = 1/4" Gas 2N = 1/4" NPT	30 = 3/2 Normally closed 31 = 3/2 Normally open 32 = 3/2 Solenoid/Solenoid 50 = 5/2 Solenoid/Spring 51 = 5/2 Solenoid/Solenoid 52 = 5/2 Solenoid/Solenoid differential 70 = 5/3 Closed Centres 71 = 5/3 Open Centres 72 = 5/3 Pressurized Centres	V = FKM seals

## ATEX note

Valves bodies of series AX1 are supplied as standard according to 214/34/EU ATEX Directive, in classification:

**CE** **Ex** II 2G Ex h IIC T5 Gb  
II 2D Ex h IIC T100°C Db

**WARNING:** by combining an ATEX valve body with a standard coil and/or connector, the resulting solenoid valves will not comply with 2014/34/EU ATEX Directive, in any classification.

For ATEX coils and connectors, see page 5.150.1

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

## How to order

Series	Actuation	Size	Function
<b>AX1</b>	<b>E</b>	<b>2</b>	<b>50</b>

## Notes

For standard materials, see page 5.102.5

(1) The actuation with external air pilot (K) is available only for functions 3/2 N.C. (30), 3/2 solenoid/solenoid (32), 5/2 solenoid/spring (50), 5/2 solenoid/solenoid (51) and for functions 5/3 (70, 71, 72).

(2) The actuations with Ø 13 mm plunger (EG and KG) are compatible only with ASA34 coils (with increased voltage) for applications with high working pressures (up to 12 bar).

Coils and connectors to be ordered separately, see page 5.109.1

key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Series of stainless steel spool valves, with in-line connections. Available in size 1/4", air operated, with functions 3/2 pilot/spring normally closed, 3/2 pilot/spring normally open, 3/2 pilot/pilot, 5/2 pilot/spring, 5/2 pilot/pilot and pilot/pilot differential, 5/3 open centres, closed centres and pressurized centres. Supplied as standard with HNBR seals for low temperature (down to -25°), in compliance to Reach and RoHS directives, SIL certified, and conforming to 2014/34/EU ATEX Directive, in classification Ex h.

### Series AX1 1/4" 3/2 Pilot/Spring

from page 5.116.10

Series of stainless steel spool valves, with in-line connections, size 1/4" air operated, in function 3/2 pilot/spring normally closed and 3/2 pilot/spring normally open.

Conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db

### Series AX1 1/4" 3/2 Pilot/Pilot

from page 5.116.20

Series of stainless steel spool valves, with in-line connections, size 1/4" air operated, in function 3/2 pilot/pilot.

Conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db

### Series AX1 1/4" 5/2 Pilot/Spring

from page 5.116.40

Series of stainless steel spool valves, with in-line connections, size 1/4" air operated, in function 5/2 pilot/spring.

Conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db

### Series AX1 1/4" 5/2 Pilot/Pilot

from page 5.116.50

Series of stainless steel spool valves, with in-line connections, size 1/4" air operated, in function 5/2 pilot/pilot and 5/2 pilot/pilot differential.

Conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db

### Series AX1 1/4" 5/3

from page 5.116.70

Series of stainless steel spool valves, with in-line connections, size 1/4" air operated, in function 5/3 closed centres, 5/3 open centres and 5/3 pressurized centres.

Conforming to 2014/34/UE ATEX Directive in classification:

II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db

Options		
Description	Symbol	Suffix
FKM seals	-10°C ÷ +150°C 	<b>V</b>

NAMUR solenoid operated valves Series AX1N

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Series of stainless steel spool valves, with Namur interface. Available in size 1/4", solenoid operated also with external air pilot, Ø 9 mm or Ø 13 mm plunger, in functions: 3/2 solenoid/spring normally closed, 3/2 solenoid/solenoid, 5/2 solenoid/spring and 5/2 solenoid/solenoid. Supplied as standard with HNBR seals for low temperature (down to -25°), in compliance to Reach and RoHS directives, SIL certified, and with valve body conforming to 2014/34/EU ATEX Directive, in classification Ex h.. Coils and connectors to be ordered separately. For solenoid operated valves with ATEX coil and connector, in different classification, see from page 5.150.1.

### Series AX1N 1/4" 3/2 Solenoid/Spring

from page 5.122.10

Series of stainless steel spool valves, with Namur interface, size 1/4", in function 3/2 solenoid/spring normally closed. Valve body conforming to 2014/34/UE ATEX Directive in classification: II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db  
Coils and connectors to be ordered separately.

### Series AX1N 1/4" 3/2 Solenoid/Solenoid

from page 5.122.20

Series of stainless steel spool valves, with Namur interface, size 1/4", in function 3/2 solenoid/solenoid. Valve body conforming to 2014/34/UE ATEX Directive in classification: II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db  
Coils and connectors to be ordered separately.

### Series AX1N 1/4" 5/2 Solenoid/Spring

from page 5.122.40

Series of stainless steel spool valves, with Namur interface, size 1/4", in function 5/2 solenoid/spring. Valve body conforming to 2014/34/UE ATEX Directive in classification: II 2G Ex h IIC T5 Gb  
II 2D Ex h IIIC T100°C Db  
Coils and connectors to be ordered separately.

### Series AX1N 1/4" 5/2 Solenoid/Solenoid

<b>AX1N</b>	<b>E</b>		<b>2</b>	<b>50</b>	
AX1N	E = Electric	= Ø 9 mm plunger G <sup>(1)</sup> = Ø 13 mm plunger	2 = 1/4" Gas 2N = 1/4" NPT	30 = 3/2 Normally closed 32 = 3/2 Solenoid/Solenoid 50 = 5/2 Solenoid/Spring 51 = 5/2 Solenoid/Solenoid	V = FKM seals

## ATEX note

Valves bodies of series AX1N are supplied as standard according to 214/34/EU ATEX Directive, in classification:

**WARNING:** by combining an ATEX valve body with a standard coil and/or connector, the resulting solenoid valves will not comply with 2014/34/EU ATEX Directive, in any classification.

For ATEX coils and connectors, see page 5.150.1

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

## How to order

Series	Actuation	Size	Function
<b>AX1N</b>	<b>E</b>	<b>2</b>	<b>50</b>

## Notes

For standard materials, see page 5.120.5

(1) The actuations with Ø 13 mm plunger (EG) are compatible only with ASA34 coils (with increased voltage) for applications with high working pressures (up to 12 bar).

Coils and connectors to be ordered separately, see page 5.124.1

# Stainless Steel NAMUR solenoid operated valves series AX1N

1/4", 5/2 solenoid/spring

## Standard dimensions

Type: **5/2 solenoid/spring**

II 2G Ex h IIC T5 Gb  
 II 2D Ex h IIC T100°C Db

Version	Actuation	Symbol	Code	Item
1/4" 5/2 solenoid/spring	Electric Ø 9		037008X	AX1NE250
	Electric Ø 13		*	AX1NEG250

\*For code, please contact the sales department.

For availability and code of versions with NPT threads (AX1NE2N.. and AX1NEG2N..), please contact the sales department.

# Stainless Steel NAMUR solenoid operated valves series AX1N

1/4", 5/2 solenoid/solenoid

## Main features

Version	Actuation	Code	Item	Symbol
5/2 solenoid/solenoid	Electric Ø9	037031X	AX1NE251	
	Electric Ø13	*	AX1NEG251	

## Technical data

Version	5/2 solenoid/solenoid	
Code	037031X	*
Item	AX1NE251	AX1NEG251
Size	1/4"	
Fluid	Compressed air with or without lubrication. Lubrication, if started, must be continued.	
Pressure range	1 ÷ 10 bar	1 ÷ 12 bar
Temperature range	-25°C ÷ +70°C (standard)	-10°C ÷ +150°C (V)
Plunger Ø	9 mm	13 mm
Orifice Ø	8 mm	
Flow at 6 bar with ΔP 1 bar	1.100 NI/min.	
ATEX compliance	II 2G Ex h IIC T5 Gb II 2D Ex h IIIC T100°C Db	
Mounting	In every position (vertical not recommended when in presence of vibrations)	
Manual override	Bistable	

## Notes

Coils and connectors to be ordered separately.

For matching between valve body and coils, see page 5.120.6

For coils ASA12, ASA2 and ASA34 (with increased voltage, only for actuation EG) and for connectors A122 and A182 see page 5.124.1

For ATEX coils and connectors see from page 5.150.1

**WARNING:** by combining the ATEX valve body with a standard coil and/or connector, result in the assembly not to comply with 2014/34/EU ATEX Directive, in any classification

\* For code, please contact the sales department

For code and availability of NPT threads, please contact the sales department

## Main features and certifications

Stainless Steel solenoid operated valves, supplied complete or configurable, for applications in potentially explosive atmospheres. The valve bodies are supplied conforming to Reach and RoHS directives, SIL certificated, and 2014/34/EU Directive in classification Ex h. Coils and connectors are conforming to ATEX 2014/34/EU Directive, in different classifications, and to Reach and RoHS directive as well.

## Complete stainless steel solenoid operated valves conforming to ATEX series XA (valve body mounted with intrinsically safe coil)

Solenoid operated valves supplied complete with coil and connector mounted, composed by: desired stainless steel valve body, 30 mm Ex ia intrinsically safe coil (voltage 21.6 ÷ 28 V DC) and compatible connector.  
Conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T6, protection grade IP65..

## Complete solenoid operated valves conforming to ATEX series XA1 (valve body mounted with intrinsically safe coil)

Solenoid operated valves supplied complete with coil and connector mounted, composed by: desired stainless steel valve body, 30 mm Ex ia intrinsically safe coil (voltage 21.6 ÷ 28 V DC) and compatible connector.  
Conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T4, protection grade IP65.

## Complete solenoid operated valves conforming to ATEX series XC (valve body mounted with explosion-proof coil)

Solenoid operated valves supplied complete with coil mounted, composed by: desired stainless steel valve body, Ex d explosion-proof coil with integrated pilot, available in different voltages.  
Conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas, temperature class T6.

## Solenoid operated valves conforming to ATEX Ex ec (to be configured by combining valve body to coil and connector)

Solenoid operated valves to be configured by combining the desired stainless steel valve body, to 22 mm Ex ec coil type ASA12/ATEX113 (available in different voltages) and 22 mm connector type A12209N/ATEX.  
This way, these solenoid valves are conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 3 Gas & Powders, temperature class T5, protection grade IP65.

## Solenoid operated valves conforming to ATEX Ex dm (to be configured by combining valve body to coil/connector)

Solenoid operated valves to be configured by combining the desired stainless steel valve body, to 36 mm encapsulated coil Ex dm type ASA4/ATEX112, complete with integrated connector available in different voltages.  
This way, these solenoid valves are conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T5, protection grade IP66.

## Solenoid operated valves conforming to ATEX Ex mb (to be configured by combining valve body to coil/connector)

Solenoid operated valves to be configured by combining the desired stainless steel valve body, to 30 mm encapsulated coil Ex mb type ASA2/ATEX112, complete with 2 mt cabled connector integrated available in different voltages.  
This way, these solenoid valves are conforming to 2014/34/EU ATEX Directive for applications in potentially explosive atmospheres, Group II, cat. 2 Gas & Powders, temperature class T5, protection grade IP66.

## Types and configurations

Solenoid valve	Classification	Coil/Connector	Configuration
Series XA	II 2G Ex ia IIC T6 Gb II 2D Ex tb IIIC T80°C Db X IP65		Stainless steel solenoid operated valve supplied complete with Ex ia intrinsically safe coil and connector mounted. key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Stainless Steel ancillary valves.  
 Different series of ancillary valves with different functions, sizes and configurations.  
 Supplied as standard in compliance to Reach and RoHS directives.

## Stainless steel miniature ball valves from hexagonal bar

from page 5.161.10

Series of stainless steel miniature ball valves, manual operated, from hexagonal bar. In line mounting, to close or open the flow in both directions. Available in sizes 1/4", 3/8" and 1/2", in configuration female-female or male-female. With blue lever.

## Stainless Steel ball valve "full bore"

from page 5.162.10

Series of stainless steel full bore ball valves, manual operated with long lever. In line mounting, to close or open the flow in both directions. Available in sizes from 1/4" to 2" in configuration female-female. With blue lever.

## Stainless Steel unidirectional valves

from page 5.163.10

Series of stainless steel unidirectional valves, from hexagonal bar, female threads with piston. In line mounting, allow the compressed air to flow in one direction only; therefore they are suitable for those applications where no return of compressed air to the feeding is allowed. Available from size 1/8" to 2" in configuration female-female.

## Stainless Steel quick exhaust valves

from page 5.165.10

Series of stainless steel quick exhaust valves, to increase the speed of a cylinder. Available in sizes from 1/8" to 1". Equipped with FKM/PU seals as standard.

How to order

Notes

For standard materials see the table at page 5.165.10

Options in the same grid are alternative to each others.

\*Available for sizes from 3/8" to 1" only (size 1/8" and 1/4" are equipped with FKM seals as standard)

Standard dimensions

Code	Item	ØF (size)	L	L1	L2	B	CH
030810	1VSRX	G1/8"	37,5	21	16,5	32	22
030809	2VSRX	G1/4"	37,5	21	16,5	32	22
030811	3VSRX	G3/8"	44,5	25,5	19	37	26
030812	4VSRX	G1/2"	54	23	31	45	32
030813	5VSRX	G3/4"	79	35	44	65	46
030814	6VSRX	G1"	79	35	44	65	46

Important note

The valve must be directly mounted on the port of the cylinder to achieve the maximum possible speed.  
When the supply is in **P** the diaphragm closes the exhaust **R** and so the air flows through **A** into the chamber of the cylinder. When the supply **P** fails the diaphragm get back in its original position (closing **P**) due to the exhaust air from **A** to **R**. The noise of the exhaust **R** can be reduced by a silencer (for silencers see from page 4.150.1, for stainless silencers see page 5.390.1).

key products

**Solution for most applications**

**Easy and intuitive choice**

**Excellent value for money**

**Wide availability**

**Fast delivery**

## Main features and certifications

Stainless Steel AISI 316 modular units for air treatment. Characterised by resistance to chemical and corrosive elements, are also suitable for high pressure, thus fit to food&beverage, medical, chemical, Oil&Gas and mining applications.  
 Available in different sizes, these modular units are light and with reduced overall dimensions, effective in removing water and particles, with the possibility of accurate and sensitive pressure adjustment, can guarantee excellent performances in both chemical and outdoor environments.  
 Supplied with material qualification according to NACE MR0175 / UNI EN ISO 15156-1:2009 standards, conforming to Reach and RoHS directive, SIL certified and in compliance with 201/34/EU ATEX Directive, classification Ex h.

### Stainless Steel Filters series A..FX, 1/4" ÷ 1"

from page 5.202.20

Stainless Steel modular filters, available in sizes 1/4", 1/2" and 1". Equipped as standard with 5µm filter cartridge (40µm as option) and semi-automatic condense drain (manual or automatic drain as option).  
 Supplied complete with stainless steel mounting bracket.

### Stainless Steel Regulators A..RX, 1/4" ÷ 1"

from page 5.202.50

Stainless Steel modular regulators, available in sizes 1/4", 1/2" and 1". Equipped as standard with relieving valve and regulation screw.  
 Supplied complete with stainless steel mounting bracket and stainless steel pressure-gauge.

### Stainless Steel Lubricators series A..LX, 1/4" ÷ 1"

from page 5.202.80

Stainless Steel modular lubricators, available in sizes 1/4", 1/2" and 1". Equipped as standard with oil regulation cup.  
 Lubricant can be added without stopping the air supply.  
 Supplied complete with stainless steel mounting bracket.

### Stainless Steel Filter-regulators A..FRRX, 1/4" ÷ 1"

from page 5.202.110

Stainless Steel modular filter-regulators, available in sizes 1/4", 1/2" and 1". Equipped as standard with 5µm filter cartridge (40µm as option), semi-automatic condense drain (manual or automatic drain as option), relieving valve and regulation screw.  
 Supplied complete with stainless steel mounting bracket and stainless steel pressure-gauge.

### Stainless Steel Filter-regulators + lubricators series A..FRRLX, 1/4" ÷ 1"

from page 5.202.140

Stainless Steel modular filter-regulators, available in sizes 1/4", 1/2" and 1". Equipped as standard with 5µm filter cartridge (40µm as option), semi-automatic condense drain (manual or automatic drain as option), oil regulation cup, relieving valve and regulation screw.  
 Lubricant can be added without stopping the air supply.  
 Supplied already assembled and complete with stainless steel mounting bracket and stainless steel pressure-gauge.

## Options

Description		Symbol	Suffix
High pressure (out). Only for size 1/2" and 1".	12 ÷ 30 bar (1/2") 12 ÷ 28 bar (1")		<b>HP</b>
Filter cartridge 40 µm			<b>40</b>
NPT thread	(ANSI B 1.20.1 standard)		<b>N</b>
Manual condense drain			<b>H</b>
Automatic condense drain*	P <sub>max</sub> 10 bar		<b>D</b>
EPDM seals for low temperatures	-40°C ÷ +70°C		<b>BT</b>

The options, when this is possible, can be combined with each other. For options matching see page 5.202.4; For code key see page 5.202.5.

\***Warning:** with option D the maximum inlet pressure is 10 bar.

How to order

Notes

For standard materials see the table at page 5.202.6  
 Options in the same grid are alternative to each others.  
 (1) For information on options and their matching, see page 5.202.3 and following.  
 (2) **Warning:** with option D the maximum inlet pressure is 10 bar.  
 Assembling modular components (body FRRX + body LX for size 1/4" and 1/2", and body FFRX + body LX or combinations between body FX, body RX and body LX size 1") require the VOXKIT (see table below). For further information, please contact the sales department.

ATEX note

Stainless Steel modular units are supplied as standard conforming to 2014/34/EU ATEX Directive in classification

II 2G Ex h IIC T6 Gb  
 II 2D Ex h IIIC T85° Db

For further information on the ATEX 2014/34/EU Directive, on classifications and protections, see from page III.1

# STAINLESS STEEL

push-in fittings

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Stainless Steel push-in fittings. Available in different versions, threads and for different tube sizes.

Supplied conforming to Reach and RoHS directives. Lubricated with synthetic grease long lasting and fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1).

## Series RX

from page 5.302.10

Stainless Steel push in fittings, with reduced dimensions, for connecting PVDF, PTFE or Stainless Steel tubes, with new collet and release collet design. Available in different configurations, with taper BSPT threads and BSP with O-ring, in various sizes. Stud threaded versions are supplied as standard with internal and external hexagonal wrench (for narrow places mounting).

## Series RX

### Code key

Series	Type*	Tube Diameter*	Thread (or Tube Diameter 2)*
<b>RX</b>	<b>11</b>	<b>08</b>	<b>18</b>
RX	11, 12, 13, 14, 15, 16, 20, 21, 25, 26, 27, 28, 29, 31, 35	04 = Ø 4 mm 06 = Ø 6 mm 08 = Ø 8 mm 10 = Ø 10 mm 12 = Ø 12 mm	M5 = M5x0,8 18 = 1/8" 14 = 1/4" 38 = 3/8" 12 = 1/2"

### How to order

Series	Type	Ø Tube	Thread
<b>RX</b>	<b>11</b>	<b>08</b>	<b>18</b>

### Notes

\* For matching between fitting type, tube diameter and thread, see from page 5.302.11; for the specific type, see the following pages.  
For standard materials see the table below

### Technical data

Version	Series RX	
Fluid	Compressed air	
Maximum pressure	20 bar	
Vacuum	-99 KPa	
Temperature range	-20°C ÷ +180°C	
Parallel threads	UNI - ISO 228 / 1 (BSP)	
Taper threads	UNI EN 10226-1 (BSPT)	
Metric threads	UNI EN ISO 965-1	
Tubes	PVDF, PTFE or in Stainless Steel	
Tubes tolerance	Ø 4 ÷ Ø 8	±0,7 mm
	Ø 10 ÷ Ø 12	±0,1 mm

### Standard materials

Position	Description	Material
1	Body	Stainless Steel AISI 316L
2	Release collar	Stainless Steel AISI 316L
3	Sealing ring	Stainless Steel AISI 316L
4	Collet	Stainless Steel AISI 301
5	Protection ring	Stainless Steel AISI 316L
6, 7*	Seals	FKM (according to FDA)

\*O-ring only for types with BSP thread

rapid fittings

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Stainless Steel rapid fittings. Available in different versions, threads and for different tube sizes.

Supplied conforming to Reach and RoHS directives. Lubricated with synthetic grease long lasting and fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1).

## Series CX

from page 5.304.10

Series of stainless steel rapid fittings, with reduced dimensions, for connecting PTFE tubes, suitable for applications with high temperatures or aggressive fluids. Available in different configurations, with taper BSPT threads and BSP, in various sizes.

# Stainless Steel rapid fittings

Series CX

## Code key

Series	Type*	Tube Diameter*	Thread (or Tube Diameter 2)*
<b>CX</b>	<b>11</b>	<b>08</b>	<b>18</b>
CX	11, 14, 13, 15, 16, 18, 19, 20, 21, 27	06 = Ø 6 - 4 08 = Ø 8 - 6 10 = Ø 10 - 8 12 = Ø 12 - 10	18 = 1/8" 14 = 1/4" 38 = 3/8" 12 = 1/2"

## How to order

Series	Type	Ø Tube	Thread
<b>CX</b>	<b>11</b>	<b>08</b>	<b>18</b>

## Notes

\*For matching between fitting type, tube diameter and thread, see from page 5.304.11; for the specific type, see the following pages.

For standard materials see the table below

## Technical data

Version	Series CX	
Fluid	All fluids compatible with stainless steel	
Maximum pressure	25 bar	
Vacuum	-99 KPa	
Temperature range	-40°C ÷ +250°C	
Parallel threads	UNI - ISO 228 / 1 (BSP)	
Taper threads	UNI EN 10226-1 (BSPT)	
Tubes	PTFE (suggested)	
Tubes tolerance	Ø 6 ÷ Ø 10	±0,7 mm
	Ø 12	±0,1 mm

## Standard materials

Position	Description	Material
1	Body	Stainless Steel AISI 316L
2	Nut	Stainless Steel AISI 316L
-	Seals*	FKM (according to FDA)

key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Stainless Steel compression fittings. Available in different versions, threads and for different tube sizes.

Supplied conforming to Reach and RoHS directives. Lubricated with synthetic grease long lasting and fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1).

## Series OX

from page 5.306.10

Stainless Steel AISI 316 L compression fittings conforming to DIN 2353 standards for stainless steel tubes. The ogive crushing onto the tube, by screwing down the external nut, allows to get a safe connection even at high pressures. The ogive is single cone. Available in different configurations, with taper BSPT threads and BSP threads, in various sizes.

quick-lock couplings

Find out our  
key products

Solution for most applications

Easy and intuitive choice

Excellent value for money

Wide availability

Fast delivery

## Main features and certifications

Stainless Steel quick-lock couplings. Available in versions double shut off conforming to ISO ISO 7241-1 "A" standards, double shut off flat face conforming to ISO 16028 standards, in-line and 90° rotary joints, with different threads. Supplied conforming to Reach and RoHS directives.

### Series GXA

from page 5.321.1

Series of stainless steel double shut off quick-lock couplings conforming to ISO 7241-1 "A" standards. Suitable for use in aggressive environments. The tightness of the coupling connection with the plug is ensured by a series of spheres that allow a longer lifetime, even when connections and disconnections are frequent. Available in sizes from 1/4" to 1".

### Series GXF

from page 5.322.1

Series of stainless steel double shut off flat face quick-lock couplings conforming to ISO 16028 standards, leak-free at the moment of disconnection. Suitable for use in aggressive environments, and in general in all those applications where it is important that there is no fluid leaking. The tightness of the coupling connection with the plug is ensured by a series of spheres that allow a longer lifetime, even when connections and disconnections are frequent. Available in size from 1/4" to 1 1/4".

### Series GGLX

from page 5.326.1

Series of stainless in-line rotary joints. Configuration M/F. Used in the connection of two rotating elements, avoiding twisting. Available in size from 1/4" to 2".

### Series GGAX

from page 5.327.1

Series of stainless 90° rotary joints. Configuration M/F. Used in the connection of two rotating elements, avoiding twisting. Available in size from 1/4" to 2".

Wide availability

Fast delivery

## Main features and certifications

Stainless Steel flow and exhaust regulators. Available in different functions, versions and threads. Supplied conforming to Reach and RoHS directives. Lubricated with synthetic grease long lasting, fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1).

## Stainless Steel in-line flow regulators

from page 5.371.1

Series of stainless steel in-line flow regulators, available with uni-directional or bi-directional regulation.

## Stainless Steel flow regulators

from page 5.372.1

Series of stainless steel flow regulators, generally directly mounted on cylinder connections to control translation speed. Available in different functions: uni-directional with "out" adjustment, uni-directional with "in" adjustment and bi-directional with adjustment in both the directions. Use of two uni-directional "out" adjustment regulators is recommended for the accurate control of the cylinder speed, as they act on the outgoing flow of the cylinder chambers, and don't interfere with the incoming flow to the chambers.

## Stainless Steel silenced restrictors

from page 5.375.1

Series of stainless steel silenced exhaust restrictors, generally used to decrease the speed and thus the translation speed of the cylinders, are usually mounted on power valve outlets or quick exhaust valves. The main feature of these regulators is to include two functions in one component: flow regulation and silencing.

## Main features and certifications

Stainless Steel accessories with integrated function. Available in different versions, functions, and threads. Supplied as standard in compliance to Reach and RoHS directives. Lubricated with synthetic grease long lasting, fully composed by non-toxic elements conforming to FDA Directive section 21 CFR 178 about accidental contact with food (registered NSF H1).

## Stainless Steel stop valves

Washer	PTFE											
Seals	FKM											

Function

Type VX45

Series of stop valves available in uni-directional version. When mounted in pairs on a cylinder, they block the movement in the event of a sudden drop in piloting pressure.  
By means of the manual release device is possible to manually reset the piston stroke.

Piloting pressure in function of feeding pressure
