## // SYMBOLS

	Internal Diameter		Minimum Burst Pressure		Vacuum
	Outside Diameter		Maximum Working Pressure		Weight
	Minimum Bend Radius		Length		Connection

// **DUNLOP HIFLEX**// **THE FIRST HOSES**

**Scotland, 1887.** John Boyd Dunlop, a Scottish born inventive veterinarian observes his son as he's cycling down a bumpy road. The bike has hard solid rubber tyres and the ride is rough and shaky. The ride is neither fast nor particularly comfortable. He then comes up with an idea of wrapping an air filled rubber hose around the rim. In 1888 he patented the idea and the rest as we say, is history.

// **A PRODUCT THAT CHANGED THE WORLD**

John Dunlop's idea about air-filled rubber hoses was the beginning of an industrial manufacturing of air-filled tires and, later, a development of hydraulic and industrial hoses. We, at Dunlop Hiflex, are specialists at hoses for high and low pressure and through our unique position with manufacturing in our own factories, in Halmstad and Pirkkala, we are leading the development of the next generation of top-quality hoses. Moreover, our widespread branch network throughout the Nordic Countries and Germany provides customers with an excellent service. Today we are a part of the Alfagomma Group, one of the leading manufactures of hoses in the world. But we still carry the name that originated from a Scot and bike with pride.

## // ALFAGOMMA GROUP

Dunlop Hiflex was acquired by Alfagomma Group in 2005. The Group, established in 1956, is a global manufacturer specialized in highly engineered, technically demanding hydraulic and industrial products, created with a commitment to excellence in quality and innovation.

### // RESEARCH AND DEVELOPMENT

Alfagomma is focused on continuous improvement, proven by its constant engineering innovation at product, process and production level, which has made it possible to quickly respond to evolving international regulations, improving products performance, safety and efficiency.

The company's distinguishing feature is its ability to innovate, by investing in research and development of products and materials, and designing solutions that meet customer's requirements, in compliance with international regulations.

# // KNOWLEDGE, QUALITY AND SERVICE

**Dunlop Hiflex**, formerly known as GKL (Gummi K Lund) was established in 1898. In 2005, the Dunlop Hiflex Group was bought by the Italian group ALFAGOMMA which is one of the world's leading producer of hoses and is represented in all continents. We at Dunlop Hiflex are Europe's leading supplier of hoses and couplings.

We manufacture a complete range of hydraulic and industrial hoses, fittings, adapters and manipulated tubes and more according to costumers specifications. With our global presence, local service centers and independent service partners all across the nordic countries and the Baltic states we are where our costumers are. Our Scandinavian headquarter in Halmstad, Sweden is a modern logistic and production center and with our 10.000m<sup>2</sup> we have the largest warehouse for hoses and fittings in Scandinavia.

Our production center has the capacity for cutting, assembling, pressing, pressure testing, cleaning and tubing from 6 to 42 mm.

Our philosophy regarding quality is that Dunlop Hiflex should be known as the leading supplier of all the products we sell, quality, delivery, pricing, technical expertise, environment, flexibility and service.

By working sparingly with resources, energy and transport as well as through the choice of products we try to have as little impact as we can on the environment. We are quality and environmentally certified according to ISO 14000, our employees are trained continuously and we strive to minimize wast and emissions.

We also cooperate with authorities and try as much as possible to provide environmentally friendly products.
