

QUICK RELEASE COUPLINGS

ARGUS is one of the ALFAGOMMA's Group brands.

Since 1936 ARGUS has been manufacturing high-quality hydraulic components. Ever since the name ARGUS has stood for quality, safety and technical competence. Many years of experience and constant effort to optimize our products enable us to quickly and flexibly respond to customers' needs.

The products are manufactured in our Italian plants.

// QUICK RELEASE COUPLING

For fast and easy connections of hydraulic hoses, the ALFAGOMMA range of fluid components includes the ARGUS series of quick disconnect couplings, with products complying to international standards ISO 7241-1 A & B, ISO 5675 and ISO 16028, having poppet and flat face valve respectively.

The standardised design assures the complete interchangeability with corresponding couplings currently in use.

Made from high strength carbon steel as the basic material, hardened in parts subject to wear, ARGUS couplings feature a chrome-III zinc plating with a long lasting resistance to oxidation (**TOP COAT**, patented).

The mechanical and fluid dynamic performance are maximised by means of specific geometries defined through CFD calculations. Additional extensive testing is carried out after production following the requirements of ISO 7241-2 standard.

ISO-A range includes the true general purpose quick release couplings, with sizes from 1/4" to 1 1/2", BSPP, NPTF and metric threaded connections, and working pressure up to 350 bar. Agricultural machinery is the main application for ISO-A for ISO-A couplings.

ISO 7241-1 B series is more employed in the industrial sector (pressures can reach 400 bar), for equipment powered and controlled by hydraulic systems.

The **flat faced range** is the optimal choice to avoid circuit contamination and oil leakage when connecting and disconnecting.

Flat faced couplings are widely used on construction equipment, but also in hostile environments where spillage can constitute a danger. They have sizes from 1/4" to 1", constant working pressure of 350 bar and minimised flow losses.

Screw quick couplings are also included in the ARGUS family. Connection under residual pressure is made possible by specific couplings with poppet or flat face valve. Further sizes and types, including customised multi-coupling systems, are available on request.

// TOP COAT TREATMENT

Thanks to the exclusive ALFAGOMMA **TOP COAT** – Galvanic Coating – proprietary technology, the complete range of ARGUS Quick release couplings can boast an extraordinary wear and corrosion resistance, so as to guarantee a longer lifespan to your system.

ALFAGOMMA **TOP COAT** is based on a system of trivalent passivation which reaches outstanding rusting and corrosion resistance levels. Tested in accordance with ASTM B117-03 and UNI ISO 9227 standards, ALFAGOMMA **TOP COAT** ensures over 1000 hours to red rust.

All ALFAGOMMA metal parts feature TOP COAT an innovative proprietary surface treatment developed and patented by the ALFAGOMMA Research & Development team

- // Corrosion resistance exceeding 500 hrs white and 1000 hrs red rust resistance – ASTM B117-03 and UNI ISO 9227 standards
- // Exceptional interfacial adhesion and outstanding impact resistance, with almost no micro-cracking, chipping and delamination
- // Trivalent passivation and high resistance sealing
- // Chromium(VI)-free in conformity with the European directive 2000/53/EC

// Quick and simple coupling and uncoupling

// Cost effective

General features: ARGUS ISO 7241-1 series "A" quick release couplings are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SVK-ISO-A quick release coupling, formed by the coupling plug and the coupling socket, is connected by pushing on a sleeve. This guarantees a flush connection between the two coupling halves.

Materials: galvanised steel with hardened parts subject to wear - NBR O-rings (other materials optional) - Thermoplastic dust cap and dust plug. Cr-III zinc plating through additional passivation for improved surface protection (TOP COAT for metric version).

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

Norm:
ISO 7241 A

Temperature range:
-20 °C +100 °C
Temp. range for metric version -30 °C to +125 °C

Note: rated flow / pressure drop compliant with ISO 7241-1 standard.
Specific instructions for installation, use and maintenance are separately provided.

// SVK-ISO-A SS

POPPET STANDARD ISO 7241 A SS

DN 6 to 40

to max WP 140 bar

// Quick and simple coupling and uncoupling

// Stainless steel AISI 316

General features: ARGUS ISO 7241-1 series "A" quick release couplings are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SVK-ISO-A SS quick release coupling, formed by the coupling plug and the coupling socket, is connected by pushing on a sleeve. This guarantees a flush connection between the two coupling halves.

Materials: stainless steel AISI 316 - FKM O-rings (other materials optional) - Thermoplastic dust cap and dust plug.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2, water or other aggressive fluids. Resistant to outdoor and harsh environments.

Norm: ISO 7241 A

Temperature range:

-20 °C +100 °C

Note: rated flow / pressure drop compliant with ISO 7241-1 standard.

Specific instructions for installation, use and maintenance are separately provided.

// SHK

HIFLOW TRUCK TYPE POPPET

TOP COAT

DN 25

WP 300 bar

// Compatibility with other couplings in-use
 // Optional pressure elimination system

General features: ARGUS SHK are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SHK quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves.

Materials: galvanised steel with hardened parts subject to wear - HNBR O-rings (other materials optional). Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

Temperature range:
 -20 °C +125 °C

Note: rated flow / pressure drop values on request. Specific instructions for installation, use and maintenance are separately provided.

// SLK

LOCKABLE TYPE POPPET

TOP COAT

DN 6 to 25

to max WP 450 bar

- // Locking system for safety purposes
- // Optional pressure elimination system
- // Compatibility with other couplings in-use
- // Nordic range

General features: ARGUS SLK are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SLK quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves.

Materials: galvanised steel with hardened parts subject to wear – NBR O-rings (other materials optional). Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

Temperature range:

-30 °C +125 °C

Note: rated flow / pressure drop values on request. Other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

// SVK-1H-ISO-A

POPPET STANDARD ISO 7241 A

TOP COAT

DN 6 to 25

to max WP 400 bar

// Quick and simple coupling and uncoupling

// One-hand push pull operation

// Break-away function

// Low pressure drop

General features: ARGUS SVK-1H-ISO-A quick release couplings are used for quick coupling and uncoupling of loaded lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SVK-1H-ISO-A quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves. SVK-1H-ISO-A quick release couplings can be used as pull-off couplings by panel mounting the sleeve bush.

Materials: galvanised steel with hardened parts subject to wear - HNBR O-rings (other materials optional) - Galvanised steel threaded adapters for various connection types - Thermoplastic dust cap and dust plug (see SVK-ISO-A). Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

Norm:

ISO 7241 A
ISO 5675
SAE J 1036

Temperature range:

-30 °C +125 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

Metric connection according to DIN EN ISO 8434-1.

// SVK-1H

POPPET STANDARD ISO 5675

TOP COAT

DN 8 to 19

to max WP 400 bar

// Quick and simple coupling and uncoupling

// One-hand push pull operation

// Break-away function

// Low pressure drop

// DN 12 compatible with ISO 7241-1-A

General features: ARGUS SVK-1H quick release couplings are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SVK-1H quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves. SVK-1H quick release couplings can be used as pull-off couplings by panel mounting the sleeve bush.

Materials: galvanised steel with hardened parts subject to wear - Brass valve stem guide - TPE poppet valve seal (PTFE optional) - HNBR O-rings (other materials optional) - Galvanised steel threaded adapters for various connection types - Polyethylene dust cap and dust plug. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

Norm:

ISO 5675
SAE J 1036

Temperature range:

-30 °C +100 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

PUSH PULL

DN 8 to 13

WP 20 bar

- // Base material aluminium
- // Break-away function
- // One-hand push pull operation
- // Low pressure drop

General features: ARGUS PVK-Racing quick release couplings are used for quick coupling and uncoupling of fluid lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The PVK-Racing quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves. PVK-Racing quick release couplings can be used as pull-off couplings by panel mounting the sleeve bush.

Materials: aluminium - Brass valve stem guide - TPE poppet valve seal (PTFE optional) - NBR O-rings (other materials optional) - Thermoplastic dust cap and dust plug.

Temperature range:

-30 °C +100 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

DN 13

WP 250 bar

// Connectable with male part under pressure

// One-hand push pull operation

// Break-away function

// Low pressure drop

// Compatible with ISO 7241-1-A

General features: connectable under pressure ARGUS SPK-1H quick release couplings are not only for coupling to hydraulic auxiliary equipment under residual pressure, but they also prevent from unintentional closing through the intervening backflow effect (i.e. through quickly reducing loads). The double valve stroke required for the coupling to a pressurized plug is limited in the operating condition by a lock, which is not disengaged until decoupling occurs. This prevents any uncontrolled blocking of the hydraulic flow. The sleeve must be relieved during the coupling action. The pressurized cartridge valve is opened by applying pressure on the socket side.

Materials: materials, flow losses and temperatures are comparable to ARGUS SVK-1H quick release couplings. The two couplings can be interchanged, coupled and used as a pull-off coupling. For use with SVK-ISO-A or SVK-1H coupling plugs.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

Norm:

ISO 5675
SAE J 1036

Temperature range:

-30 °C +125 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

WP 250 bar

- // Connectable with male part under pressure and female part under full pressure
- // No back drainage required
- // One-shot connection under pressure
- // One-hand push pull operation
- // Break-away function
- // Compatible with ISO 7241-1-A

General features: connectable under pressure ARGUS SRK-1H PLUS quick release couplings are specifically designed to be directly connected to rigid pipes or distributors.

Materials: galvanised steel with hardened parts subject to wear
 - Brass valve stem guide - TPE poppet valve seal (PTFE optional)
 - HNBR O-rings (other materials optional) - Thermoplastic dust cap and dust plug. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

Norm: ISO 5675

Temperature range:

// To easily adapt flat face to ISO A couplings

General features: ARGUS Quick Release Adapters provide an easy and reliable connection between female poppet ISO 7241 A and male flat face ISO 16028 couplings, or between female flat face ISO 16028 and male poppet ISO 7241 A couplings. This allows the user to adapt an already existing quick release part to a new type of connection.

Materials: housing and valves galvanised steel with hardened parts subject to wear. Seals HNBR (other materials on request) - backup rings PTFE - Thermoplastic dust cap and dust plug. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +125 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

FLAT FACE STANDARD ISO 16028

TOP COAT

PATENT PENDING

DN 6 to 25

WP 350 bar

// Flow performance optimized by CFD

// Low leak-oil rates, eco-friendly

// Robust, compact and lightweight

// Extended temperature range

General features: ARGUS FPK flat face quick release couplings are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The FPK flat face quick release coupling, formed by a coupling plug and a coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed to be moved in the relevant direction for disconnecting or connecting the coupling halves. A safety system against accidental uncoupling is present on the female part.

Materials: galvanised steel with hardened parts subject to wear. HNBR seals (other materials on request) - Backup rings PTFE - Thermoplastic dust cap and dust plug. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

Norm: ISO 16028

PATENT PENDING

DN 10 to 19

WP 350 bar

// Connectable under pressure with patented system

// Low effort to connect under pressure

// Robust, compact and light weight

// Low leak-oil rates, eco-friendly

// Low pressure drop

General features: connectable under pressure ARGUS FPK-P flat face quick release couplings are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low pressure ranges, valves that release or block the flow are automatically activated. The FPP flat face quick release coupling, formed by a coupling plug and a coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed to be moved in the relevant direction for disconnecting or connecting the coupling halves.

Materials: galvanised steel with hardened parts subject to wear. HNBR seals (other materials on request) - backup rings PTFE - Thermoplastic dust cap and dust plug. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

Norm: ISO 16028

Temperature range:

-30 °C +125 °C

Note: rated flow / pressure drop values on request.

Other sizes and connection types available on request.

Specific instructions for installation, use and maintenance are separately provided.

SCREW TYPE POPPET STANDARD ISO 14541

TOP COAT

DN 8 to 32

to max WP 450 bar

- // For high pressure load
- // Robust construction
- // Excellent flow rate
- // Can be coupled at up to 50 bar
- // German standard

General features: ARGUS HDK high pressure couplings can be used for connecting and disconnecting hydraulic lines. Their robust construction and tested components make them ideally suited for high and intermittent pressure loads. During the coupling action, valves that release and/or block the flow are automatically activated. The HDK quick release coupling, formed by coupling plug and coupling socket, is coupled by a screwing action with the hand nut of the plug component. Can be coupled to a max. of 50 bar residual pressure.

Materials: galvanised steel - Brass valve stem guide - TPE poppet valve seal (PTFE optional) - HNBR O-rings (other materials optional) - Polyethylene dust cap and plug - Stainless steel compression spring. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Norm: ISO 14541

Temperature range:

-30 °C +125 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

// RK

SCREW TYPE FLAT FACE

TOP COAT

DN 10 to 25

to max WP 315 bar

// Low leak-oil rates, eco-friendly

// Robust construction

// Low pressure drop

// Can be coupled by hand at up to 20 bar

General features: ARGUS RK pipe couplings enable oil leakfree connection and disconnection of hydraulic lines. The coupling consists of one fixed and one loose half. The two halves are coupled by a screwing action with hand nuts and/or hand wheel. During this process, valves in the two halves open against spring force. During decoupling, these valves close before the coupling halves separate. This prevents air intake into the lines, eliminating the need of secondary venting. Coupling can be carried out by hand while pressurised at up to approx. 20 bar, or by means of tools under higher pressures. In the uncoupled status, the coupling halves are protected from contamination and damage with the components indicated as accessories.

Materials: galvanised steel housing and internal components
 - Brass vent sleeve in the loose half - All seals HNBR (FPM seals optional) - Polyethylene dust cap and plug. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +125 °C

Temperature up to 200°C when FPM seals are used

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

TOP COAT

PATENT PENDING

DN 10 to 25

to max WP 450 bar

// Very low leak-oil rates, eco-friendly

// Highly robust construction

// Low pressure drop

// Locking system for safety purposes

General features: ARGUS RKN quick release couplings enable oil leak-free connection and disconnection of hydraulic lines. Their robust construction and tested components make them ideally suited for high and intermittent pressure loads. During the coupling action, valves that release and/or block the flow are automatically activated. The RKN quick release coupling, formed by coupling plug and coupling socket, is coupled by a screwing action with the hand nut of the plug component.

Materials: galvanised steel - Brass valve stem guide - HNBR O-rings (other materials optional). Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +125 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

// RPK

SCREW TYPE FLAT FACE

TOP COAT

DN 25 to 32

to max WP 450 bar

- // Flat sealing
- // Low leak-oil rates, eco-friendly
- // High flowrate, low pressure drop
- // Can be coupled by hand at up to 20 bar
- // Connection under higher residual pressure available

General features: ARGUS RPK high pressure couplings can be used for connecting and disconnecting hydraulic lines. The valve flush design reduces fluid leakage during connection and disconnection at minimum. Their robust construction and tested components make them ideally suited for high and intermittent pressure loads. During the coupling action, valves that release and/or block the flow are automatically activated. Type DN 25 compatible with Argus RK coupling.

Materials: high tensile steel - Brass valve stem guide - TPE poppet valve seal (PTFE optional) - HNBR O-rings (other materials optional) - Stainless steel compression spring. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +100 °C

Note: rated flow / pressure drop values on request
Other sizes and connection types available on request.
Specific instructions for installation, use and maintenance are separately provided.

// AK

SCREW TYPE FLAT FACE

TOP COAT

DN 10 to 16

to max WP 315 bar

- // Break-away function
- // Extremely low leak-oil rates, very eco-friendly
- // Low pressure drop
- // Can be coupled by hand at up to 20 bar

General features: ARGUS AK break-away couplings enable a leak-oil free connection or disconnection of hydraulic lines. The coupling consists of one fixed and one loose half. The two halves are coupled by a screwing action with hand nut and/or hand wheel. During this process, valves in the two halves open against spring force. During decoupling, these valves close before the coupling halves separate. This prevents air intake into the lines, eliminating the need of secondary venting. Coupling can be carried out by hand while pressurised at up to approx. 20 bar, or by means of tools under higher pressures. The coupling halves can also be pulled apart. This possibility prevents the pipeline system bursting under tensile load and thereby the medium escaping. During the pull-off stroke, the fixed half must be connected to a hose assembly or a spring-mounted pipe. In the uncoupled status, the coupling halves are protected from contamination and damage with the components indicated under Accessories.

Materials: galvanised steel housing and internal parts - Brass vent bush in the loose half - Steel DN 6 to 10 pull-off housing, from DN 12 (13) malleable iron - All seals NBR (FPM optional). Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +100 °C

Note: other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

Same dust protection and blind socket as RK range.

// PTK

SCREW TYPE POPPET STANDARD ISO 14540

TOP COAT

DN 6 to 10

WP 700 bar

// Typically employed in power tools
 // Compatibility with other couplings in-use

General features: ARGUS PTK high pressure couplings can be used for connecting and disconnecting hydraulic lines. Their robust construction and tested components make them ideally suited for high and intermittent pressure loads. During the coupling action, valves that release and/or block the flow are automatically activated. The PTK quick release coupling, formed by coupling plug and coupling socket, is coupled by a screwing action with the hand nut of the plug component.

Materials: galvanised steel - HNBR O-rings (other materials optional) - Thermoplastic dust cap and dust plug. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

Norm: ISO 14540

Temperature range:
 -30 °C +125 °C

Note: rated flow / pressure drop values on request. Other sizes and connection types available on request. Specific instructions for installation, use and maintenance are separately provided.

TOP COAT

PATENT PENDING

DN 10 to 13

WP 250 bar

// Tailor-made according to customer's needs
 // Compact, reliable and safe

General features: ARGUS multi-couplings, which consist of a fixed and a mobile part, are developed following the specific needs of the user. The multi-connection plates are obtained from an anodized aluminium block as standard, and include the locations for flat-face couplings built of carbon steel with TOP COAT surface protection, but every component can be manufactured in different materials on request. The number of lines and possible electric or pneumatic connections can be defined depending on the application requirements. Connecting and disconnecting are carried out by means of a camleverage group with guiding pins, and a safety device is always present. Hose connections can be executed with threads of every type (e.g. BSP, NPT, SAE, metric) or also with the quick connect system "Plug-In Connector".

Note: a complete range of spare parts and accessories are available specific instructions for installation, use and maintenance are separately provided.

COMPONENTS AND MATERIALS

- Mobile and fixed plate in anodized aluminium 6082
- Quick release coupling in steel with galvanic protection
- Seal and back-up ring in NBR and PTFE
- Springs according to EN 102070-1
- Lock lever in steel with galvanic protection
- Safety block in steel and aluminium

// RV

NON RETURN VALVE

TOP COAT

DN 6 to 25

to max WP 400 bar

// One-piece housing

// Low pressure drop

General features: non return valves enable a flow in one direction and block it in the opposite direction. They therefore belong to the group of check valves (DIN 24300). ARGUS non return valves guarantee an extremely low-resistant flow through their streamlined internal parts. The valves are sealed by spring-hydraulic poppets and washer. Stroke limitation ensures free outlet opening. Depending on opening pressure, they can also be used as a suction and safety valve.

Materials: galvanized steel housing and poppet valve - Brass housing also available - Brass valve stem guide - TPE seals (PTFE optional). Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +125 °C

Viscosity range: to 400 cSt (53 °E)

Note: specific instructions for installation, use and maintenance are separately provided.

// PRV

CARTRIDGE NON RETURN VALVE

TOP COAT

DN 6 to 25

to max WP 400 bar

// One-piece housing

// Low pressure drop

General features: ARGUS PRV cartridge non return valves are designed for direct installation into device or machine housings. They enable a flow in one direction and block it in the opposite direction. They therefore belong to the group of check valves (DIN 24300). ARGUS PRV cartridge non return valves ensure particularly low-resistance flow through their streamlined internal parts. The valves are sealed by spring-loaded poppets and washer. Stroke limitation ensures free outlet opening. Depending on opening pressure, they can also be used as suction and safety valves.

Materials: gunmetal housing, galvanized steel valve - Brass valve stem guide - Steel spring compression spring - TPE seals (PTFE optional). Cr-III zinc plating through additional passivation for improved surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +100 °C

Viscosity range: to 400 cSt (53 °E)

Note: customised versions of cartridge non return valves. Argus can develop check valves according to customer's needs or specifications.

Specific instructions for installation, use and maintenance are separately provided.

MIL Standard

// LBS

EXCESS FLOW CHECK VALVE

TOP COAT

DN 6 to 16

to max WP 400 bar

// One-piece housing

// Low pressure drop

General features: ARGUS LBS excess flow check valves are installed in systems to prevent the medium escaping through line breaks. Under normal operation, they are open and installed near to a tank or cylinder to be protected. They close if excess flow speeds occur. Each excess flow check valve is rated for maximum flow speed. The excess flow check valve is held in the OPEN position by a compression spring. If the spring pre-tension is exceeded, the poppet valve moves in the valve seat and closes the line. Outside influences, e.g. sudden movements, impact on moving devices, installed position, can create axial forces and thereby changes in the closing volume. If the user is unable to prevent from such influences, system tests must be run. The excess flow check valve has to be installed as close as possible to the component to be protected (tank or cylinder), whereby high flow resistances between the element to be protected and the excess flow check valve are to be prevented.

Materials: galvanized steel housing and poppet valve - Brass valve stem guide - Steel spring compression spring. Top Coat Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

Application: suitable for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

Temperature range:

-30 °C +125 °C

Viscosity range: to 400 cSt (53 °E)

Note: other closing volumes and connection types on request. Specific instructions for installation, use and maintenance are separately provided.

Symbol:

TOP COAT

PATENT PENDING

DN 10 to 51

to max WP 410 bar

// Extremely low torque for rotation under pressure

// Robust, compact and lightweight

// Outstanding wear resistance

// Long-lasting service life

General features: ALFAGOMMA state-of-the-art Swivel Connector range is specifically designed to withstand the most severe working conditions and to ensure the best performances in the harshest environments up to 350 bar operating pressure. Its innovative ball bearing-less swivel system guarantees long lasting reliability to the hydraulic system, increasing productivity without fluid leakages. The ball bearing-less inner mechanism ensures a consistent rotary movement within the system and prevents damaging torsions to the hose. The result is an increase in components service life and lower operating costs due to easier & inexpensive maintenance. Alfagomma swivel connectors have a compact design, which makes them suitable for use in the smallest of spaces. Thanks to our exclusive TOP COAT -Galvanic Coating- proprietary technology, the complete range of Alfagomma swivel connectors can boast an outstanding wear and corrosion resistance, so as to guarantee a longer lifespan to your hydraulic system.

Materials: high strength carbon steel with TOP COAT surface protection. HNBR and PTFE seals and bushings.

Temperature range:

-35 °C +120 °C
